

Manual "No.1 Quilt Pattern Collection (Nº 1 Coleção de desenhos de recorte para Quilt)"

Este manual contém figuras em tamanho real e mostra como criá-las, depois que os pedaços são preparados para costurar usando a máquina de corte. Quando elaborar os padrões de 1 a 45, corte as peças deixando espaço para as margens de costura. Consulte o Manual de Operações da máquina para instruções detalhadas. Quando imprimir as figuras em escala real, imprima a 100%, ou ajuste a sua impressora de modo que ela não aumente nem reduza a escala. Observação: Use estes mesmos métodos quando costurar à máquina. Consulte o manual de instrução de sua máquina sobre os diferentes comprimentos e reforço dos pontos. Os pés calcadores para acolchoado feitos para a sua máquina também auxiliarão a costurar a medida de margem de costura de 1/4" em todas as mudanças de direção.

Consulte o seguinte para uma explicação de "marcas de finais" e "costura continuada" descritas neste documento.

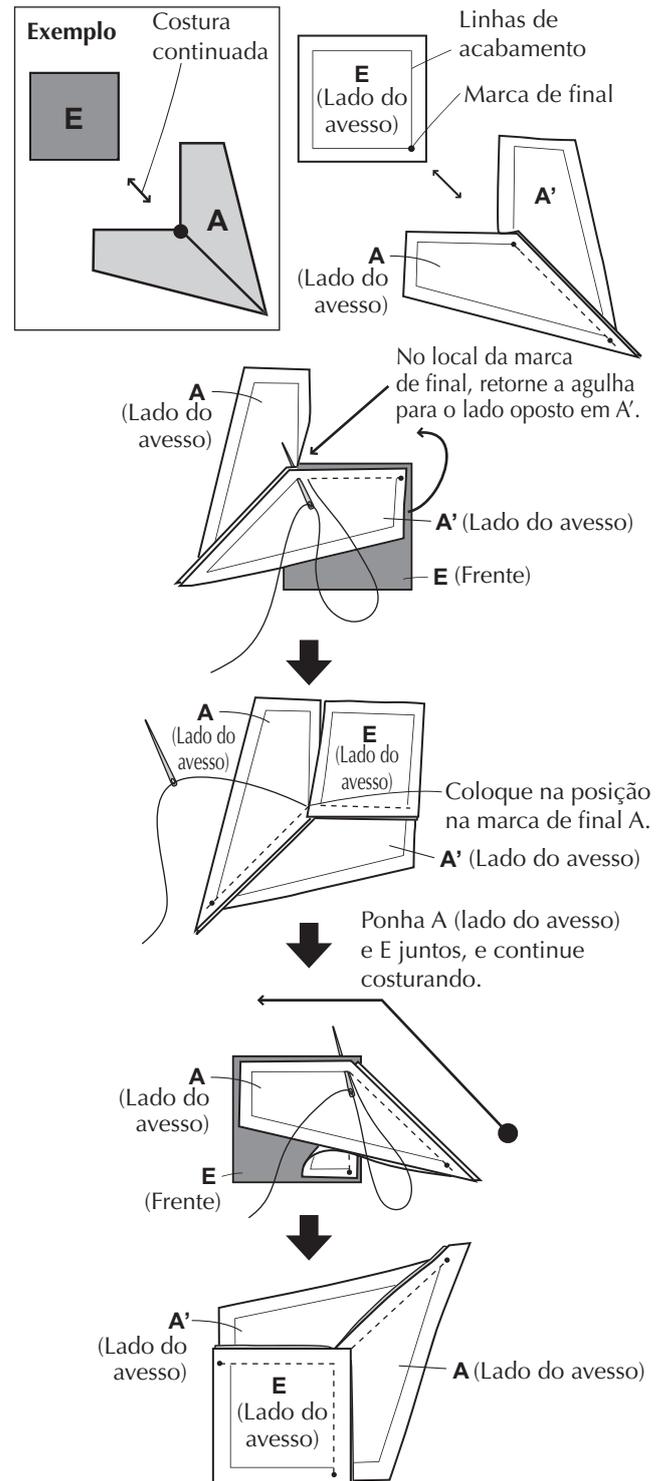

Marcas de finais (ponto de início ou de final de uma costura)

"Marca de final" é o método de costura usado quando os tecidos são unidos com costuras até a marca do final.

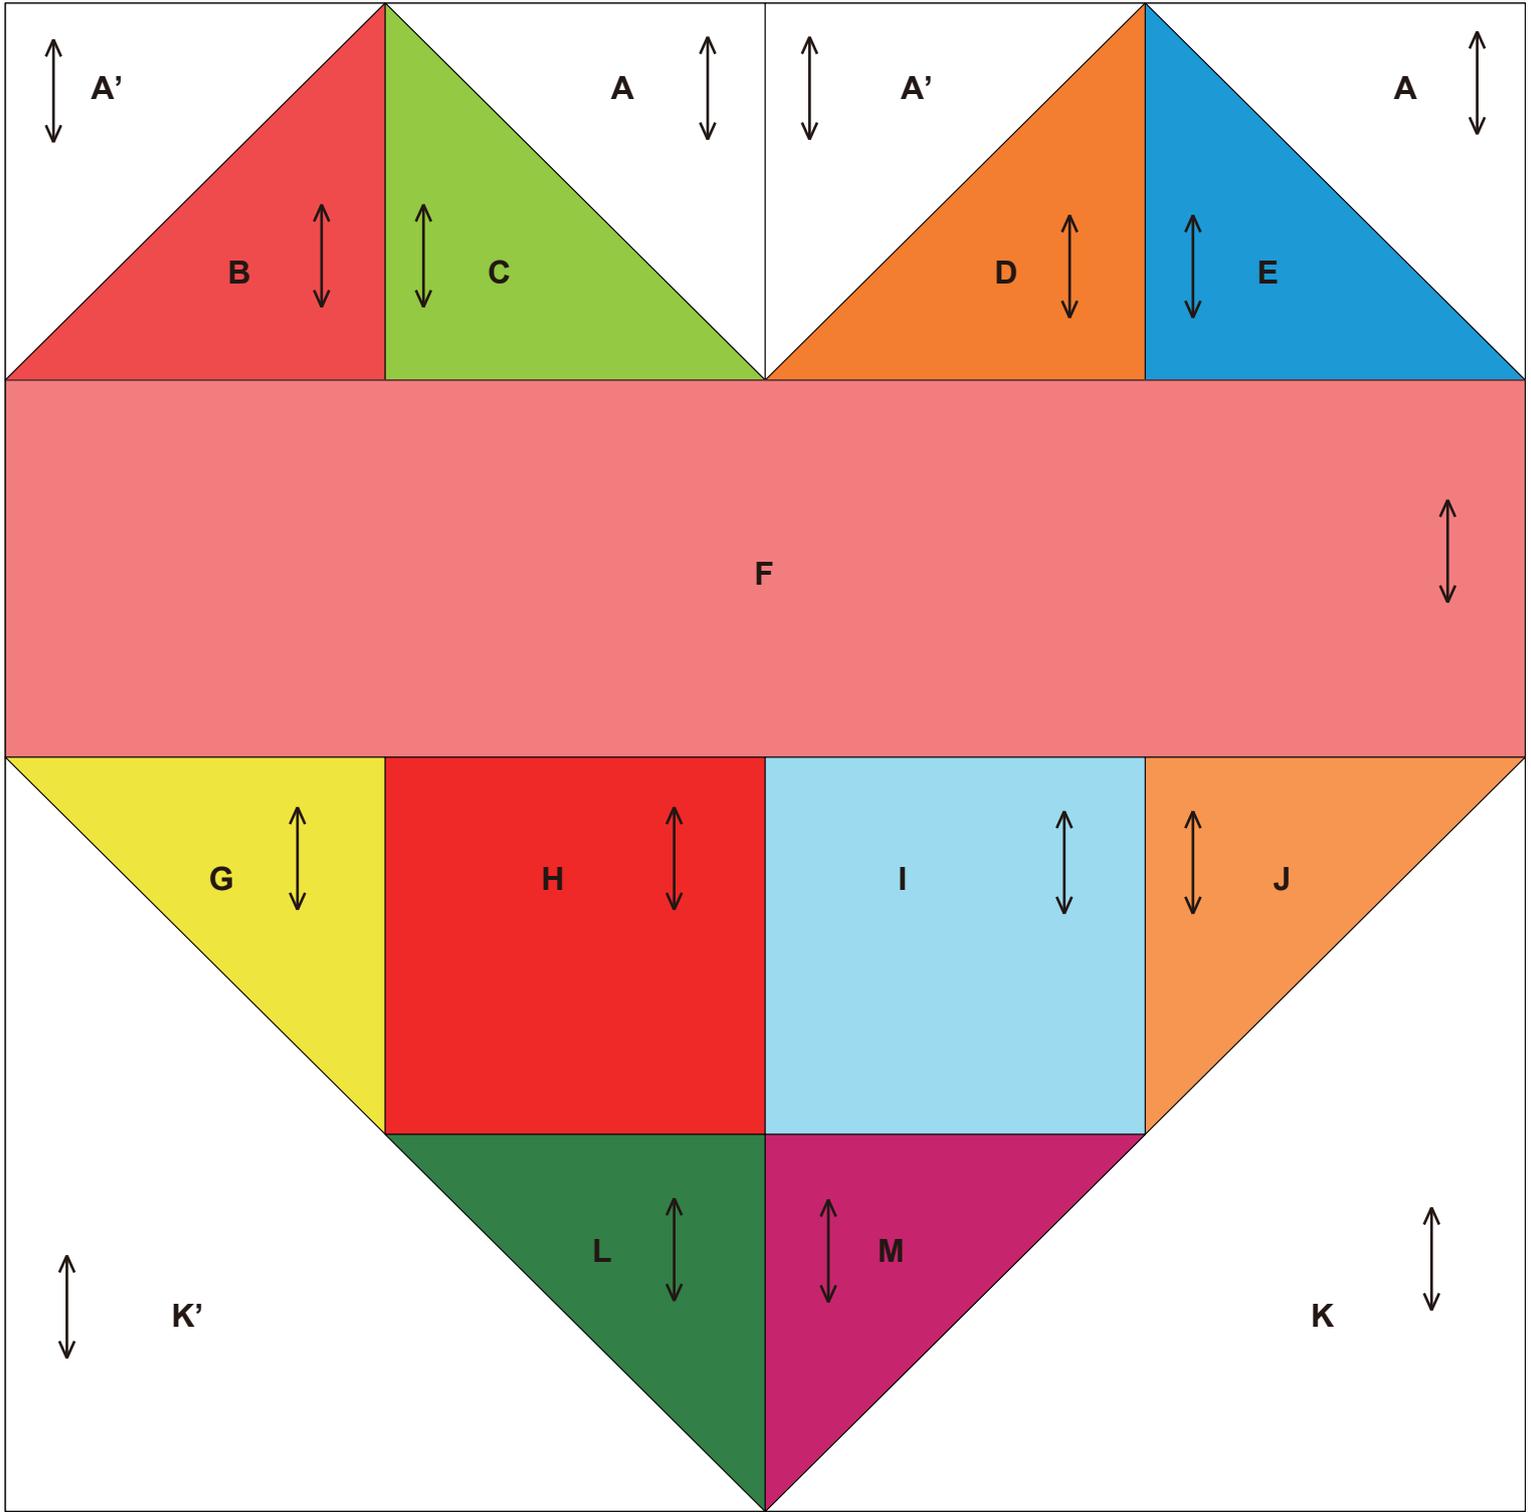

Costura continuada

"Costura continuada" é um método que usa múltiplos pontos contínuos, em vez de cortar a linha a cada vez.

Como fazer

• Aplique sem a margem da costura (sem margem da costura)

Fixe estes apliques usando pespontos de mão/pespontos à máquina de sua escolha.

Memo: As máquinas de costura dos dias de hoje oferecem uma ampla variedade de pontos. Usar o pé calcador recomendado auxiliará na formação do ponto adequado enquanto costura.

<Pesponto reto>

Use pespontos pequenos de modo que a linha não solte. Alternativamente, você também pode usar uma linha colorida para fazer pespontos temporários.

<Ponto caseado>

Você pode bordar em torno do lado de fora das figuras usando o ponto caseado para costurar com firmeza.
