## Definitions of Notes

We use the following symbols and conventions throughout this User's Guide:

<b>IMPORTANT</b>	IMPORTANT indicates a potentially hazardous situation which, if not avoided, may result in damage to property or loss of product functionality.
<b>NOTE</b>	NOTE specifies the operating environment, conditions for installation, or special conditions of use.
	Tips icons indicate helpful hints and supplementary information.
<b>Bold</b>	Bold style identifies buttons on the machine's control panel or computer screen.
<i>Italics</i>	Italicised style emphasises an important point or refers you to a related topic.
Courier New	Courier New font identifies messages shown on the machine's LCD.

## Trademarks

## Connect an External or Extension Telephone

You can connect a separate telephone to your machine as shown in the diagram below.

- 1 Extension telephone
- 2 External telephone
- 3 Protective Cap

## Operation from External and Extension Telephones

If you answer a fax call at an extension or an external telephone, you can make your machine take the call by using the Remote Activation Code. When you press the Remote Activation Code **\*51**, the machine starts to receive the fax.

If the machine answers a voice call and pseudo/double-rings for you to take over, you can take the call at an extension telephone by pressing the Remote Deactivation Code **#51**.

### If you answer a call and no one is on the line:

You are receiving a manual fax.

Press **\*51** and wait for the chirp or until the LCD displays [Receiving], and then hang up.

You can also use the Fax Detect feature to make your machine automatically take the call.

## Use the Remote Codes

### Remote Activation Code

If you answer a fax call on an extension or external telephone, you can tell your machine to receive it by pressing the Remote Activation Code \*51. Wait for the chirping sounds then replace the handset.

If you answer a fax call at the external telephone, you can make the machine receive the fax by pressing the Start button and then selecting the option to receive. (When you set the [Fax Mode] option to [Advanced Mode].)

### Remote Deactivation Code

If you receive a voice call and the machine is in F/T mode, it will start to sound the F/T ring (pseudo/double-ring) after the initial Ring Delay. If you pick up the call on an extension telephone you can turn the F/T ring off by pressing #51 (make sure you press this between the rings).

If the machine answers a voice call and pseudo/double-rings for you to take over, you can take the call at the external telephone by pressing [Pickup].

## Multi-line Connections (PBX)

We suggest you ask the company that installed your PBX to connect your machine. If you have a multi-line system we suggest you ask the installer to connect the unit to the last line on the system. This prevents the machine from being activated each time the system receives telephone calls. If all incoming calls are answered by a switchboard operator, we recommend setting the Receive Mode to [Manual].

We cannot guarantee that your machine will operate correctly under all circumstances when connected to a PBX. Any difficulties with sending or receiving faxes should be reported first to the company that handles your PBX.
