# **Definitions of Notes**

We use the following symbols and conventions throughout this User's Guide:

	WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injuries.
	CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injuries.
IMPORTANT	IMPORTANT indicates a potentially hazardous situation which, if not avoided, may result in damage to property or loss of product functionality.
NOTE	NOTE specifies the operating environment, conditions for installation, or special conditions of use.
	Tips icons indicate helpful hints and supplementary information.
Â	Electrical Hazard icons alert you to possible electrical shock.
	Fire Hazard icons alert you to the possibility of a fire.
	Hot Surface icons warn you not to touch hot machine parts.
$\otimes$	Prohibition icons indicate actions you must not perform.
Bold	Bold style identifies buttons on the machine's control panel or computer screen.
Italics	Italicized style emphasizes an important point or refers you to a related topic.
Courier New	Courier New font identifies messages shown on the machine's LCD.

# **Important Notes**

- · Check support.brother.com/downloads for Brother driver and software updates.
- To keep your machine performance up to date, check <u>support.brother.com/downloads</u> for the latest firmware update. Otherwise, some of your machine's functions may not be available.
- Do not use this product outside the country of purchase as it may violate the wireless telecommunication and power regulations of that country.
- Before giving your machine to anyone else, replacing it, or disposing of it, we strongly recommend resetting it to its factory settings to remove all personal information.
- Windows 10 in this document represents Windows 10 Home, Windows 10 Pro, Windows 10 Education, and Windows 10 Enterprise.
- Windows 11 in this document represents Windows 11 Home, Windows 11 Pro, Windows 11 Education, and Windows 11 Enterprise.
- For macOS v13 Users:

This machine supports macOS v13.

For machine setup and software installation instructions, see the Quick Setup Guide included in the carton.

All features in macOS v11 and macOS v12 are available in the macOS v13 environment and work in a similar way.

- The screens or images in this User's Guide are for illustration purposes only and may differ from those of the actual products.
- Unless otherwise specified, the screens in this manual are from Windows 10. Screens on your computer may vary depending on your operating system.
- The contents of this document and the specifications of this product are subject to change without notice.
- Not all features are available in countries subject to applicable export restrictions.

# **Before Using Your Machine**

Before attempting any printing operation, confirm the following:

- Make sure you have installed the correct software and drivers for your machine.
- For USB or network cable users: Make sure the interface cable is physically secure.

### Simultaneous printing, scanning, and faxing

Your machine can print from your computer while sending or receiving a fax into memory or while scanning a document into the computer. Fax sending will not be stopped during printing from your computer. However, when the machine is copying or receiving a fax on paper, it pauses the printing operation, and then continues printing when copying or fax receiving has finished.

### Firewall (Windows)

If your computer is protected by a firewall and you are unable to network print, network scan, or PC-FAX, you may need to configure the firewall settings. If you are using the Windows Firewall and you installed the drivers using the steps in the installer, the necessary firewall settings have been already set. If you are using any other personal firewall software, see the User's Guide for your software or contact the software manufacturer.

### Related Information

· Introduction to Your Machine

Home > Introduction to Your Machine > Control Panel Overview

### **Control Panel Overview**

### 1. Near Field Communication (NFC) Reader

Use card authentication, if applicable, by touching your Integrated Circuit Card (IC Card) to the NFC symbol on the machine.

### 2. Touchscreen Liquid Crystal Display (LCD)

Access menus and options by pressing them on the touchscreen.

Your machine has eight tabbed screens (referred to as Home screens). Each Home screen can hold up to eight icons which can be used for functions, machine settings and shortcuts. A total of 64 icons can be placed on the Home screens as needed.

The Main Home screen can be selected from the Home screens.

Use the [Admin Settings] menu to group names on the tabs and rearrange the icons.

#### 1. Date & Time

Displays the date and time set on the machine.

This area is also used to display error or maintenance messages.

### 2. (Wired LAN Status)

Press to configure the Wired LAN settings. The icon displays the current wired network status.

The second secon	Wired LAN Disabled (Gray)
	Wired LAN Enabled (Blue)
	No cable connection

### 3. < (Wireless Status)

Press to configure the wireless settings.

If you are using a wireless connection, a four-level indicator displays the current wireless signal strength.

### 4. (Toner)

Displays the remaining toner life. Press to access the [Toner] menu.

### 5. (Admin Settings)

Press to access the [Admin Settings] menu.

If required, enter the password you use to manage this machine in Web Based Management, and then press [OK].

#### 6. IP Address

If the IP Address setting in the Display Information menu has been turned on, your machine's IP Address appears on the Home screens.

#### 7. Function Icons, Setting Icons, and Shortcut Icons

The following descriptions explain basic icons and features. The available features vary depending on your model.

• 🎁 [All Settings]

Press to access the machine's settings menu.

• [Fax]

Press to access Fax mode.

• 📊 [Copy]

Press to access Copy mode.

• 📻 [Scan]

Press to access Scan mode.

• 📕 [Secure Print]

Press to access the [Secure Print] option.

USB]

Press to access the USB menu and select [Scan to USB] or [Direct Print] options.

(Web]

٠

Press to connect your machine to an Internet service.

• 🜍 [Apps]

Press to connect your machine to the Brother Apps service.

• [2 in 1 ID Copy]

Press to access the 2 in 1 ID Copy option.

• [Eco Mode]

Press to access the [Eco Mode] menu.

• + (Shortcuts)

Press to create Shortcuts for frequently-used operations, such as sending a fax, copying, scanning, and using Web Connect.

### 8. Tabs Scroll Buttons

Press to display the Home screens.

### 9. Home Tabs

Press to display the screen for the Home.

New Fax

When [Fax Preview] is set to [On], the number of new faxes you received into the memory appears at the top of the screen.

Warning icon

Cover is Open	>			
Fax	Copy	Scan	+	000
All Settings	Secure Print	2 in 1 ID Copy	+	
K Basic 1	Basic 2	Custom 1	Custom 2	>

The warning icon **1** appears when there is an error or maintenance message. Press the message area to view it, and then press **1** to return to the Main Home screen.

### 3. Touchpanel

### ) (Back)

Press to go back to the previous menu.

# (Home)

Press to return to the Main Home screen.

### (Cancel)

Press to cancel an operation.

### 4. (b) Power On/Off

- Turn on the machine by pressing (<sup>(</sup>)).
- Turn off the machine by holding down (b). The LCD displays [Shutting Down] for a few seconds before the machine turns off. If you have an external telephone or TAD connected, it is still available.

### 5. LED Power Indicator

The LED lights up depending on the machine's power status.

Introduction to Your Machine

▲ Home > Introduction to Your Machine > How to Navigate the Touchscreen LCD

# How to Navigate the Touchscreen LCD

Press your finger on the LCD to operate it. To display and access all the options, swipe left, right, up, and down, or press  $\blacktriangleleft$ ,  $\triangleright$ ,  $\blacktriangle$ , or  $\forall$  on the LCD to scroll through them.

### **IMPORTANT**

DO NOT press the LCD with a sharp object, such as a pen or stylus. It may damage the machine.

## NOTE

DO NOT touch the LCD immediately after plugging in the power cord or turning on the machine. Doing this may cause an error.

This product uses fonts owned by ARPHIC TECHNOLOGY CO., LTD.

# Load Paper in the Paper Tray

- If, when the Check Paper setting is set to On and you pull the paper tray out of the machine, a message appears on the LCD asking if you want to change the paper size and paper type, change these settings, if needed, following the LCD instructions.
- When you load a different size and type of paper in the tray, you must also change the Paper Size and Paper Type settings on the machine, or on your computer.
- 1. Pull the paper tray completely out of the machine.

2. Press the green levers to slide the paper guides to fit the paper.

For Legal or Folio size paper, press the release button (1) in the bottom of the paper tray or the release lever (2) in the back of the tray, and then pull out the back of the paper tray. (Legal and Folio size paper are not available in some regions.)

For trays with a release button:

For trays with a release lever:

3. Fan the stack of paper well.

Ø

4. Load paper in the paper tray with the printing surface face down.

When you use letterhead or preprinted paper, load the paper in the correct orientation. See *Related Information: Change Machine Settings to Print on Letterhead or Preprinted Paper Using the Paper Tray.* 

Make sure the paper is below the maximum paper mark (▼ ▼ ▼).
 Overfilling the paper tray will cause paper jams.

6. Slowly push the paper tray completely into the machine.

7. Lift the support flap to prevent paper from sliding off the output tray.

# Related Information

- Load and Print Using the Paper Tray
  - Change Machine Settings to Print on Letterhead or Preprinted Paper Using the Paper Tray

▲ Home > Paper Handling > Load Paper > Load and Print Using the Paper Tray > Load Paper in the Paper Tray > Change Machine Settings to Print on Letterhead or Preprinted Paper Using the Paper Tray

# Change Machine Settings to Print on Letterhead or Preprinted Paper Using the Paper Tray

When you use letterhead or preprinted paper for 2-sided printing, change the machine's settings.

- DO NOT load different sizes and types of paper in the paper tray at the same time. Doing this may cause the paper to jam or misfeed.
  - If the print position is misaligned with the letterhead or preprinted objects, the print position is adjustable
    using the Print Position setting for the paper tray.
- Some preprinted paper may cause print stains, depending on the printing method and ink type.

## Orientation

Ø

Press i [Settings] > [All Settings] > [Printer] > [2-sided] > [Single Image] > [2-sided Feed].

<sup>6</sup> If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

## 2. Press

Load Paper in the Paper Tray

▲ Home > Paper Handling > Load Paper > Load and Print Using the Paper Tray > Load and Print Thick Paper Using the Paper Tray

# Load and Print Thick Paper Using the Paper Tray

Home > Paper Handling > Paper Settings > Select the Paper Tray For Printing

# Select the Paper Tray For Printing

Change the machine's default paper tray for printing copies, received faxes, and print jobs from your computer.

1. Press 🍟 [Settings] > [All Settings] > [General Setup] > [Tray Setting].

<sup>(</sup> If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

- 2. Swipe up or down or press ▲ or ▼ to display the [Tray Use: Copy], [Tray Use: Fax], or [Tray Use: Print] option, and then press the option you want.
- 3. Swipe up or down or press ▲ or ▼ to display the option you want, and then press it. For example, when you select the [MP>T1] option, the machine pulls paper from the MP tray until it is empty, and then from Tray 1.
- 4. Press
  - When you make a copy using the ADF and give priority to multiple trays, the machine looks for the tray with the most suitable paper and pulls paper from that tray.
  - When you make a copy using the scanner glass, your document is copied from the higher priority tray even if more suitable paper is in another paper tray.
  - Use the following sizes of paper for printing faxes: Letter, A4, Legal, Folio, Mexico Legal, or India Legal. When an appropriate size is not in any of the trays, the machine stores received faxes and [Size Mismatch] appears on the touchscreen.
  - If the tray is out of paper and received faxes are in the machine's memory, [No Paper] appears on the touchscreen. Load paper in the empty tray.

▲ Home > Paper Handling > Load Documents

# Load Documents

You can send a fax, make copies, and scan from the Automatic Document Feeder (ADF) and from the scanner glass.

- Load Documents in the Automatic Document Feeder (ADF)
- Load Documents on the Scanner Glass

▲ Home > Paper Handling > Load Documents > Load Documents in the Automatic Document Feeder (ADF)

# Load Documents in the Automatic Document Feeder (ADF)

Use the ADF when copying or scanning multi page, standard-sized documents.

• The ADF can hold the following sheets and feed each sheet individually:

(MFC-EX915DW)

Up to 80 sheets

- Use standard 20 lb (80 g/m<sup>2</sup>) paper.
- Make sure documents with correction fluid or written in ink are completely dry.

## **IMPORTANT**

- DO NOT leave thick documents on the scanner glass. If you do this, the ADF may jam.
- DO NOT use paper that is curled, wrinkled, folded, ripped, stapled, paper-clipped, glued together, or taped.
- DO NOT use cardboard, newspaper, or fabric.
- To avoid damaging your machine while using the ADF, DO NOT pull on the document while it is feeding.

## **Supported Document Sizes**

Length:	5.8 to 14.0 in. (147.3 to 355.6 mm)
Width:	4.1 to 8.5 in. (105 to 215.9 mm)
Weight:	17 to 24 lb (64 to 90 g/m <sup>2</sup> )

1. Unfold the ADF document output support flap.

- 2. Fan the pages well.
- 3. Stagger the pages of your document and load it into the ADF *face up* and *top edge first*, as shown in the illustration.

4. Adjust the paper guides to fit the width of your document.

## Related Information

Load Documents

▲ Home > Paper Handling > Load Documents > Load Documents on the Scanner Glass

# Load Documents on the Scanner Glass

Use the scanner glass to fax, copy, or scan one page at a time.

## **Supported Document Sizes**

Length:	Up to 14 in. (355.6 mm)
Width:	Up to 8.5 in. (216 mm)
Weight:	Up to 4.4 lb (2kg)

To use the scanner glass, the ADF must be empty.

1. Lift the document cover.

Ø

2. Place the document on the scanner glass face down.

3. Place the corner of the page in the upper left corner of the scanner glass.

4. Close the document cover.

If the document is a book or is thick, gently press on the document cover.

Load Documents

▲ Home > Paper Handling > Unscannable and Unprintable Areas

# **Unscannable and Unprintable Areas**

The measurements in the table below show the maximum unscannable and unprintable areas from the edges of the most commonly-used paper sizes. These measurements may vary depending on the paper size or settings in the application you are using.

Do not attempt to scan, copy, or print in these areas. Any content included in such areas will not be reflected in the output.

Usage	Document Size	Top (1) Bottom (3)	Left (2) Right (4)
Fax (Sending)	Letter, Legal	0.12 in. (3.0 mm)	0.16 in. (4.0 mm)
	A4	0.12 in. (3.0 mm)	(ADF)
			0.04 in. (1.0 mm)
			(Scanner Glass)
			0.12 in. (3.0 mm)
Copy <sup>1</sup>	Letter, Legal	0.16 in. (4.0 mm)	0.16 in. (4.0 mm)
	A4	0.16 in. (4.0 mm)	0.12 in. (3.0 mm)
Scan Letter	Letter	(ADF)	(ADF)
		0.12 in. (3.0 mm)	0.12 in. (3.0 mm)
		(Scanner Glass)	(Scanner Glass)
		0.12 in. (3.0 mm) <sup>2</sup>	0.12 in. (3.0 mm) <sup>2</sup>
	A4	(ADF)	(ADF)
		0.12 in. (3.0 mm)	0.12 in. (3.0 mm)
		(Scanner Glass)	(Scanner Glass)
		0.12 in. (3.0 mm) <sup>2</sup>	0.12 in. (3.0 mm) <sup>2</sup>
	Legal	(ADF)	(ADF)
		0.12 in. (3.0 mm)	0.12 in. (3.0 mm)
		(Scanner Glass)	(Scanner Glass)
		0.12 in. (3.0 mm) <sup>2</sup>	0.12 in. (3.0 mm) <sup>2</sup>
Print	Letter, Legal	0.16 in. (4.2 mm)	0.16 in. (4.2 mm)
	A4	0.16 in. (4.2 mm)	0.16 in. (4.2 mm)

1 A 1 in 1 copy and 100% document size copy

<sup>2</sup> This number is adjustable to 0 in. (0 mm) depending on your model. If the number is set to 0 in. (0 mm), a black shadow may appear around the edges on the scanned image.

## **Related Information**

• Paper Handling

 $\checkmark$ 

#### Home > Paper Handling > Using Special Paper

## **Using Special Paper**

Always test paper samples before purchasing them to ensure desirable performance.

- DO NOT use inkjet paper; it may cause a paper jam or damage your machine.
- If you use bond paper, paper with a rough surface, or paper that is wrinkled or creased, the paper may exhibit degraded performance.

Store paper in its original packaging and keep it sealed. Keep the paper flat and away from moisture, direct sunlight, and heat.

## **IMPORTANT**

Some types of paper may not perform well or may cause damage to your machine.

DO NOT use paper:

- · that is highly textured
- that is extremely smooth or shiny
- that is curled or warped
- · that is coated or has a chemical finish
- · that is damaged, creased, or folded
- · that exceeds the recommended weight specification in this guide
- with tabs and staples
- · with letterhead using low temperature dyes or thermography
- · that is multipart or carbonless
- · that is designed for inkjet printing

If you use any of the types of paper listed above, they may damage your machine. This damage is not covered under any Brother warranty or service agreement.

#### 1. Paper Size

Select the paper size you want to use. You can either choose from standard paper sizes or create a custom paper size.

#### 2. Orientation

Select the orientation (portrait or landscape) of your printout.

If your application contains a similar setting, we recommend that you set the orientation using the application.

#### 3. Copies

Type the number of copies (1-999) that you want to print in this field.

#### Collate

Select this option to print sets of multi-page documents in the original page order. When this option is selected, one complete copy of your document will print, and then reprint according to the number of copies you choose. If this option is not selected, then each page will print according to the number of copies chosen before the next page of the document is printed.

#### 4. Media Type

Select the media type you want to use. To achieve the best print results, the machine automatically adjusts its print settings according to the selected media type.

#### 5. Resolution

Select the print resolution. As print resolution and speed are related, the higher the resolution, the longer it will take to print the document.

#### 6. Print Settings

Select the type of document you want to print.

#### Manual Settings...

Specify additional settings such as brightness, contrast, and other settings.

#### Graphics

#### **Use Printer Halftone**

Select this option to use the printer driver to express halftones.

#### Brightness

Adjust the brightness.

#### Contrast

Adjust the contrast.

#### **Graphics Quality**

Select either Graphics or Text for the best print quality, based on the type of document you are printing.

#### **Improve Gray Printing**

Select this option to improve the image quality of shaded areas.

#### **Improve Pattern Printing**

Select this option to improve the pattern printing if printed fills and patterns are different from the fills and patterns you see on your computer screen.

#### **Improve Thin Line**

Select this option to improve the image quality of thin lines.

#### **Use System Halftone**

Select this option to use Windows to express halftones.

#### TrueType Mode (available for certain models)

#### Mode

Select how the fonts are processed for printing.

#### Use Printer TrueType Fonts

Select whether to use built-in fonts for the font processing.

#### 7. Multiple Page

Select this option to print multiple pages on a single sheet of paper, or print one page of your document on multiple sheets.

#### Page Order

Select the page order when printing multiple pages on a single sheet of paper.

#### **Border Line**

Select the type of border to use when printing multiple pages on a single sheet of paper.

#### 8. 2-sided / Booklet

Select this option to print on both sides of the paper, or print a document in booklet format using 2-sided printing. (The default setting is **2-sided**.)

#### 2-sided Settings

Click this button to select the type of 2-sided binding. Four types of 2-sided bindings are available for each orientation.

#### 9. Paper Source

Select the paper source setting according to your print conditions or purpose.

#### **First Page**

Select the paper source to use for printing the first page.

#### **Other Pages**

Select the paper source to use for printing the second and subsequent pages.

Select this option to enlarge or reduce the document pages manually. When you select this option, type a value into the field.

#### 2. Reverse Print

Select this option to rotate the printed image 180 degrees.

#### 3. Use Watermark

Select this option to print a logo or text on your document as a watermark. Select one of the preset watermarks, add a new watermark, or use an image file you have created.

#### 4. Header-Footer Print

Select this option to print the date, time, and login user name on the document.

#### 5. Toner Save Mode

Select this feature to use less toner to print documents; printouts appear lighter, but are still legible.

#### 6. Secure Print (available for certain models)

This feature ensures that confidential or sensitive documents are not printed out until you enter a password on the machine's control panel.

#### 7. Administrator

This feature allows you to change the administrator password and restrict various printing functions.

#### 8. User Authentication (available for certain models)

This feature allows you to confirm the restrictions for each user.

#### 9. Other Print Options

#### Sleep Time

Select this option to set the machine to enter sleep mode immediately after printing.

#### Macro (available for certain models)

Select this feature to print an electronic form (macro), which you have stored in your machine's memory, as an overlay on the print job.

#### **Density Adjustment**

Specify the print density.

#### **Improve Print Output**

Select this option to reduce the amount of paper curling and improve the toner fixing.

#### **Skip Blank Page**

Select this option to allow the printer driver to automatically detect blank pages and exclude them from printing.

#### **Print Text in Black**

Select this option when you want to print color text in black.

#### **Print Archive**

Select this option to save the print data as a PDF file to your computer.

#### **Eco settings**

Select this option to reduce printing noise.

# Secure Print (Windows)

Use Secure Print to ensure that confidential or sensitive documents do not print until you enter a password on the machine's control panel.

The secure data is deleted from the machine when you turn off the machine.

- 1. Select the print command in your application.
- 2. Select your model's name, and then click the printer's properties or preferences button. The printer driver window appears.
- 3. Click the Advanced tab.
- 4. Click the Settings button in the Secure Print field.
- 5. Select the Secure Print checkbox.
- 6. Type your four-digit password in the **Password** field.
- 7. Type the user name and job name in the User Name and Job Name fields, if needed.
- 8. Click OK to close the Secure Print Settings window.
- 9. Click OK.
- 10. Complete your print operation.
- 11. On the machine's control panel, swipe left or right or press deltor b to display the [Secure Print] option, and then press it.
- 12. Swipe up or down or press ▲ or ▼ to display user names, and then press your user name.
- 13. Enter your four-digit password, and then press [OK].
- 14. Swipe up or down or press ▲ or ▼ to display the print job, and then press it.
- 15. Enter the number of copies you want, and then press [OK].

16. Press [Start].

The secured data will be cleared from the machine's memory after printing.

#### Related Information

Print from Your Computer (Windows)

▲ Home > Print > Print from Your Computer (Windows) > Change the Default Print Settings (Windows)

# Change the Default Print Settings (Windows)

When you change an application's print settings, the changes apply only to documents printed with that application. To change print settings for all Windows applications, you must configure the printer driver properties.

- 1. Do one of the following:
  - For Windows 11

Click > All apps > Windows Tools > Control Panel. In the Hardware and Sound group, click View devices and printers.

For Windows 10, Windows Server 2016, Windows Server 2019, and Windows Server 2022

Click **H** > Windows System > Control Panel. In the Hardware and Sound (Hardware) group, click View devices and printers.

• For Windows Server 2012 R2

Click Control Panel on the Start screen. In the Hardware group, click View devices and printers.

• For Windows Server 2012

Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings**, and then click **Control Panel**. In the **Hardware** group, click **View devices and printers**.

2. Right-click your model's icon, and then select **Printer properties**. (If the printer driver options appear, select your printer driver.)

The printer properties dialog box appears.

3. Click the **General** tab, and then click the **Printing Preferences...** or **Preferences...** button. The printer driver dialog box appears.

0.

• To configure the tray settings, click the **Device Settings** tab (available for certain models).

- To change the printer port, click the **Ports** tab.
- 4. Select the print settings you want to use as default for all of your Windows programs.
- 5. Click OK.
- 6. Close the printer properties dialog box.

## **Related Information**

- Print from Your Computer (Windows)
  - Configure the Optional Tray Settings (Windows)

▲ Home > Print > Print from Your Computer (Windows) > Change the Default Print Settings (Windows) > Configure the Optional Tray Settings (Windows)

# **Configure the Optional Tray Settings (Windows)**

Access your machine's Properties to auto-detect your machine's Optional Tray and check the machine's serial number.

The printer driver automatically detects the Optional Tray during the driver installation. If you added the Optional Tray after the driver installation, follow these steps:

- 1. Do one of the following:
  - For Windows 11

Click > All apps > Windows Tools > Control Panel. In the Hardware and Sound group, click View devices and printers.

• For Windows 10, Windows Server 2016, Windows Server 2019, and Windows Server 2022

Click **H** > Windows System > Control Panel. In the Hardware and Sound (Hardware) group, click View devices and printers.

For Windows Server 2012 R2

Click Control Panel on the Start screen. In the Hardware group, click View devices and printers.

For Windows Server 2012

Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings**, and then click **Control Panel**. In the **Hardware** group, click **View devices and printers**.

2. Right-click your model's icon, and then select **Printer properties**. (If the printer driver options appear, select your printer driver.)

The printer properties dialog box appears.

- 3. Click the Device Settings tab.
- 4. Click the Auto Detect button.

The Optional Tray and the machine's serial number are automatically detected.

- 5. Click the Apply button.
- 6. Close the printer properties dialog box.

The Auto Detect function is not available under the following machine conditions:

- The machine is turned off.
- The machine is shared via a Print Server.
- The machine and your computer are not connected.

Home > Print > Print an Email Attachment

# **Print an Email Attachment**

You can print files by emailing them to your Brother machine.

- Make sure Web Based Management is set to On. For more information, see Related Information.
- You can attach up to 10 documents, 20 MB in total, to an email.
- This feature supports the following formats:
  - Document files: PDF, TXT, and Microsoft Office files
  - Image files: JPEG, BMP, GIF, PNG, and TIFF
- The machine prints both the email content and attachments by default. To print only email attachments, change the settings as necessary.
- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

- 4. Go to the navigation menu, and then click **Online Functions > Online Functions Settings**.
  - Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.
    - If this function is locked, contact your network administrator for access.
- 5. Click the I accept the terms and conditions button.
- 6. Go to your machine, and then follow the machine's instructions to enable the settings.
- 7. On your computer, click General Settings.

The Email Print: General Settings screen appears.

8. Click the Enable button.

The machine prints the instruction sheet.

- 9. Send your email to the email address included on the sheet. The machine prints the email attachments.
  - To change the settings, including email address and printer settings, click the **Online Functions Settings Page** button.
  - You can also configure the settings from your machine. Press [Apps] > [Online Functions], and then follow the on-screen instructions.

### Secure Print Using a USB Flash Drive

USB Storage Print allows you to save secure print data to the USB flash drive and print them later by entering a password on the machine's control panel.

## NOTE

USB flash drive requirements:

- Storage Size: 1 GB or more (Recommended: 16 GB or more)
- Format: FAT32/exFAT
- Data stored on a USB flash drive is encrypted, but this may not protect it from unauthorized access in all circumstances. Make sure you securely manage and store your data and USB flash drive.
- Data on a USB flash drive can only be read on the machine whose data it stores. You cannot read the data on another machine, device, or computer.
- When you no longer need the USB flash drive to store the data from your machine and want to use it for other purposes, delete all stored data, and format the USB flash drive on your computer. To format or clean the USB flash drive, refer to its user manual for instructions.

For more information on the printer driver settings, see Related Information.

1. Connect your USB flash drive to the USB port (Rear).

### 2. Press

3. On the machine's control panel, press i [Settings] > [All Settings] > [Printer] > [Job Save Location].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

4. Press [USB flash drive(Rear port)].

A message appears on the LCD to initialize the USB flash drive.

## NOTE

When you change the location where you save print jobs, all the stored job, Macro, Stream and Font data in the machine's memory will be deleted.

5. Press and hold [OK] for two seconds to initialize.

The machine will restart to activate the USB Storage Print feature.

# NOTE

When the machine restarts to activate the USB Storage Print feature, the Macro, Stream and Font data will be deleted from the USB flash drive.

- 6. In the printer driver, complete the settings for the Secure Print option and execute the print command in your application.
- 7. On the machine's control panel, swipe left or right or press deltor b to display the [Secure Print] option, and then press it.
- 8. Swipe up or down or press ▲ or ▼ to display user names, and then press your user name.
- 9. Enter your four-digit password, and then press [OK].
- 10. Swipe up or down or press ▲ or ▼ to display the print job, and then press it.
- 11. Enter the number of copies you want, and then press [OK].
- 12. Press [Start].

The machine prints the data and deletes the print job from the USB flash drive.

### **IMPORTANT**

DO NOT remove the USB flash drive from the USB port (Rear) until the machine has finished printing.

# Print Data Directly from a USB Flash Drive or Digital Camera Supporting Mass Storage

- Make sure your digital camera is turned on.
- Your digital camera must be switched from PictBridge mode to Mass Storage mode.

### IMPORTANT

To prevent damage to your machine, DO NOT connect any device other than a digital camera or USB flash drive to the USB direct interface.

1. Connect your USB flash drive or digital camera to the USB direct interface. The touchscreen will automatically display the USB menu to confirm that the USB flash drive or digital camera is correctly connected.

- If an error occurs, the USB menu will not appear on the touchscreen.
- When the machine is in Deep Sleep mode, the touchscreen does not display any information even if you connect a USB flash drive to the USB direct interface. Press the touchscreen to wake up the machine.
- If your machine's Secure Function Lock is On, you may not be able to print from a USB flash drive or digital camera.
- (MFC-EX915DW) If the machine prompts you to choose the USB port, select it on the touchscreen.
- 2. Press [Direct Print].
- 3. Swipe up or down, or press ▲ or ▼ to display the file you want to print, and then select the file.

To print an index of the files stored on the USB flash drive or digital camera, press [Index Print] on the touchscreen. Press [Yes] to print the data.

4. Do one of the following:

Ø

- To change the settings, press [Print Settings]. Go to the next step.
- If you want to use the default settings, enter the number of copies, and then press [Start].
- 5. Select the print settings you want to change:
  - [Print Quality]
  - [Tray Use]
  - [Paper Type]
  - [Paper Size]
  - [Multiple Page]
  - [Orientation]
  - [2-sided]
  - [Collate]
  - [PDF Print Options]
  - [PDF Fit to Page]

Depending on the file type, some of these settings may not appear.

- 6. Press [OK].
- 7. Enter the number of copies you want.
- 8. Press [Start] to print the data.
- 9. Press

### IMPORTANT

DO NOT remove the USB flash drive or digital camera from the USB direct interface until the machine has finished printing.

▲ Home > Print > Print Duplicate Copies

# **Print Duplicate Copies**

Use the Carbon Copy function to make multiple copies of the same print data, as if printing on carbon paper. Send the data to individual paper trays that you loaded with different paper types or colors.

For example, you may want to set the machine to send your print data to Tray 1, which you have pre-loaded with blue colored paper, and then reprint the data in a certain location on the page from the MP Tray, which you have loaded with yellow colored paper that already contains text.

If you load blue paper in Tray 1 and yellow paper in the MP tray, the printer will automatically feed paper for Sheet 1 from Tray 1 and Sheet 2 from the MP Tray.

If you enable the Carbon Copy function, the machine will always make copies automatically.

Ø	Windows	
	The Carbon Copy function also allows you to select a different printing macro/stream for each page.	

1. Press 🍟 [Settings] > [All Settings] > [Printer] > [Carbon Menu] > [Carbon Copy] > [On].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

- 2. Swipe up or down or press ▲ or ▼ to display the [Copies] option, and then press the [Copies] option.
- 3. Enter the number of copies you want, and then press [OK].
- 4. Swipe up or down or press ▲ or ▼ to display the [Copy1 Tray] option, and then press the [Copy1 Tray] option.
- 5. Swipe up or down or press ▲ or ▼ to display the paper tray you want to configure for the [Copy1 Macro] option, and then press to select the paper tray.

#### Windows

- a. Swipe up or down or press ▲ or ▼ to display the [Copy1 Macro] option, and then press it.
- b. Swipe up or down or press ▲ or ▼ to display the ID number of the macro/stream you want to use, and then press it.
- 6. Repeat these steps until you have selected all the tray settings for each copy.

## 7. Press 📥.

8. Send your print job to the machine.

• Print

▲ Home > Print > Change Print Settings Using the Control Panel

Scan Using the Scan Button on Your Machine

▲ Home > Scan > Scan Using the Scan Button on Your Machine > Scan to an Editable Text File (OCR)

# Scan to an Editable Text File (OCR)

Your machine can convert characters in a scanned document to text using the optical character recognition (OCR) technology. You can edit this text using your preferred text-editing application.

- The Scan to OCR feature is available only for certain languages.
- Use the Scan button on the machine to make temporary changes to the scan settings. To make permanent changes, use Brother iPrint&Scan.
- 1. Load your document.
- 2. Press [Scan] > [to PC] > [to OCR].
- 3. If the machine is connected over the network, select the computer name where you want to send data.

If the LCD prompts you to enter a PIN for the computer, enter the four-digit PIN on the LCD, and then press [OK].

- 4. To change the settings, press [Options], and then select the scan settings you want to change. If you use the default settings, skip this step.

### **Related Information**

Scan Using the Scan Button on Your Machine

▲ Home > Scan > Scan Using the Scan Button on Your Machine > Send Scanned Data to an Email Recipient

# Send Scanned Data to an Email Recipient

Send scanned data directly from your machine to an email recipient without using a computer. This function allows your machine to scan documents and send them to an email address without your machine being connected to a computer. To send the scanned data as an attachment directly to your default email application using the iPrint&Scan software on your computer or the Scan button on your machine, use the "Scan to Email Attachment" function instead.

- To send scanned data to an email recipient, you must configure your machine to communicate with your network and email server, which is used to send and receive emails.
- Configure these items from the machine's control panel or Web Based Management.
- To use the Scan to Email Server function, connect your machine to the network and access an SMTP server. Set up the following SMTP email settings:
  - Server address
  - Port number
  - User name
  - Encryption type (SSL or TLS)
  - Email server certificate (if used)

If you do not know these settings, contact your email service provider or network administrator.

- 1. Load your document.
- 2. Press [Scan] > [to E-mail Server].
  - If you registered your email address with your user ID, the [to My E-mail] option appears when you
    log on to the machine using Secure Function Lock, Active Directory Authentication, or LDAP
    Authentication.
    - To send scanned data to your email address, press [to My E-mail]. When your email address appears on the LCD, press [Next].
    - To enable this feature in Web Based Management, go to the navigation menu, and then click Scan > Scan to E-mail Server. In the Send to My E-mail field, select On. Click Submit.
- 3. Do one of the following to enter the destination email address:
  - To enter the email address manually, press [Manual], and then enter the email address using the keyboard on the LCD. When finished, press [OK].
  - If the email address is stored in the machine's address book, press [Address Book], and then select the email address.

Press [OK].

- 4. Confirm the email address, and then press [Next].
- 5. To change the settings, press [Options], and then select the scan settings you want to change. If you use the default settings, skip this step.
  - [2-sided Scan]

- To save the settings as a shortcut, press [Save as Shortcut].

(This function may not be available depending on your machine conditions.)

```
6. Press [Start].
```

Ø

The machine starts scanning. If using the machine's scanner glass, follow the touchscreen instructions to complete the scanning job.

### Related Information

• Scan Using the Scan Button on Your Machine

▲ Home > Scan > Scan Using the Scan Button on Your Machine > Scan to FTP

# Scan to FTP

Scan documents directly to an FTP server when you need to share the scanned information. For added convenience, configure different profiles to save your favorite Scan to FTP destinations.

- Set up a Scan to FTP Profile
- Upload Scanned Data to an FTP Server

▲ Home > Scan > Scan Using the Scan Button on Your Machine > Scan to FTP > Set up a Scan to FTP Profile

# Set up a Scan to FTP Profile

Set up a Scan to FTP Profile to scan and upload the scanned data directly to an FTP location.

- We recommend using the latest version of the following web browsers:
  - Microsoft Edge, Firefox, and Google Chrome<sup>™</sup> for Windows
  - Safari, Firefox, and Google Chrome<sup>™</sup> for Mac
  - Google Chrome<sup>™</sup> for Android<sup>™</sup>
  - Safari and Google Chrome<sup>™</sup> for iOS
- Ensure that JavaScript and Cookies are always enabled, regardless of which browser you use.
- 1. Start your web browser.
- Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

Ø

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click Scan > Scan to FTP / SFTP / Network / SharePoint.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Select the FTP option, and then click Submit.
- 6. Click the Scan to FTP / SFTP / Network / SharePoint Profile menu.
- 7. Select the profile you want to set up or change.

Using the following characters: ?, /, \, ", :, <, >, | or \* may cause a sending error.

Option	Description	
Profile Name	Type a name for this server profile (up to 15 alphanumeric characters). The machine will display this name on the LCD.	
Host Address	Type the Host Address (for example: ftp.example.com; up to 64 characters) or the IP address (for example: 192.23.56.189).	
Port Number	Change the <b>Port Number</b> setting used to access the FTP server. The default setting is port 21. In most cases, this setting does not need to be changed.	
Username	Type a user name (up to 32 characters) of a user that has permission to write data to the FTP server.	
Password	Type the password (up to 32 characters) associated with the user name you entered in the <b>Username</b> field. Type the password again in the <b>Retype password</b> field.	
SSL/TLS	Set the <b>SSL/TLS</b> option to scan securely using SSL/TLS communication. Change the <b>CA Certificate</b> setting, if needed.	
Store Directory	Type the path to the folder on the FTP server where you want to send your scanned data. Do not type a slash mark at the beginning of the path (see example).	

Option	Description	
	Store Directory	
	brother/abc	
File Name	Select a file name prefix from the preset names provided, or from user- defined names. The file name used for the scanned document will be the file name prefix you select, followed by the last six digits of the flatbed/ADF scanner counter and the file extension (for example: "Estimate_098765.pdf").	
Quality	Select a quality setting. If you choose the <b>User Select</b> option, the machine will prompt users to select a setting each time they use the scan profile.	
File Type	Select the file type you want to use for the scanned document. If you choose the <b>User Select</b> option, the machine will prompt users to select a setting each time they use the scan profile.	
Document Size	Select your document size from the list. This is necessary to make sure the scanned file is the correct size.	
	If you choose the <b>User Select</b> option, the machine will prompt users to select a setting each time they use the scan profile.	
File Size	Select your file size from the list.	
	If you choose the <b>User Select</b> option, the machine will prompt users to select a setting each time they use the scan profile.	
Auto Deskew	Select the <b>Auto</b> option to set the machine to correct document skewing automatically as the pages are scanned.	
Skip Blank Page	Select the <b>On</b> option to remove blank pages of the document from the scanning results.	
Skip Blank Page Sensitivity	Select the sensitivity level for detecting blank pages in the scanned data. The higher the sensitivity, the easier it is for the machine to detect blank pages.	
2-sided Scan	Select the <b>Long Edge</b> or <b>Short Edge</b> option to scan both sides of the document, depending on the layout of your original.	
Remove Background Color	Change the amount of background color that is removed.	
Margin Settings (available only for certain models)	Adjust your document's margins.	
Document Separation	Split a scanned image.	
	When multiple documents have been scanned, you can split and save the documents separately by using this function.	
B&W TIFF Compression	Select the TIFF compression option for a black and white document.	
Brightness	Select the brightness level.	
Contrast	Select the contrast level.	
Passive Mode	Set the <b>Passive Mode</b> option to off or on depending on your FTP server and network firewall configuration. The default setting is on. In most cases, this setting does not need to be changed.	

8. Click Submit.

Document Separation	Split a scanned image. When multiple documents have been scanned, you can split and save the documents separately by using this function.	
B&W TIFF Compression	Select the TIFF compression option for a black and white document.	
Brightness	Select the brightness level.	
Contrast	Select the contrast level.	
Use PIN for Authentication	To PIN-protect this profile, select <b>On</b> and type a four-digit PIN in the <b>PIN</b> <b>Code</b> field.	
Auth. Method	To set your authentication method, select <b>Auto</b> , <b>Kerberos</b> , or <b>NTLMv2</b> .	
Username	Type a user name (up to 96 characters) of a user that has permission to write data to the folder specified in the <b>Network Folder Path</b> field. If the user name is part of a domain, enter the user name in one of the following styles:	
	• user@domain	
	domain\user	
Password	Type the password (up to 32 characters) associated with the user name you entered in the <b>Username</b> field. Type the password again in the <b>Retype password</b> field.	
Kerberos Server Address	To set the Kerberos Server Address manually, type the Kerberos Server Address (for example: kerberos.example.com; up to 64 characters).	

8. Click Submit.

9. You must configure the SNTP protocol (network time server) or set the date, time and time zone correctly on the control panel for all authentication methods. The machine's time must match the time used by the Kerberos Server and CIFS Server.

- Scan to Network (Windows)
  - Set the Date and Time Using Web Based Management

▲ Home > Scan > Scan Using the Scan Button on Your Machine > Scan to Network (Windows) > Set up a Scan to Network Profile > Set the Date and Time Using Web Based Management

# Set the Date and Time Using Web Based Management

Make sure the date and time and the time zone settings are set correctly using Web Based Management or the control panel. The machine's time must match the time used by the server providing authentication.

- We recommend using the latest version of the following web browsers:
  - Microsoft Edge, Firefox, and Google Chrome<sup>™</sup> for Windows
  - Safari, Firefox, and Google Chrome<sup>™</sup> for Mac
  - Google Chrome<sup>™</sup> for Android<sup>™</sup>
  - Safari and Google Chrome<sup>™</sup> for iOS
- Ensure that JavaScript and Cookies are always enabled, regardless of which browser you use.
- Ignore step 1, if you already have a Web Based Management window open.
- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click **Administrator > Date&Time**.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

	cel Submit

- 7. Select the clock type from the **Clock Type** field.
- 8. In the **Time** fields, enter the time.
- 9. Select the time difference between your location and UTC from the **Time Zone** drop-down list. For example, the time zone for Eastern time in the USA and Canada is UTC-05:00.
- 10. In the **Auto Daylight** field, click **On** to set the machine to change automatically to Daylight Saving Time. It will reset itself forward one hour in the spring, and back one hour in the fall (available only for some countries).
- 11. Click Submit.

• Set up a Scan to Network Profile

▲ Home > Scan > Scan Using the Scan Button on Your Machine > Scan to Network (Windows) > Upload Scanned Data to a CIFS Server

# **Upload Scanned Data to a CIFS Server**

1. Load your document.

Ø

- 2. Press [Scan] > [to Network].
  - If you registered your user ID, the [to My Folder] option appears when you log on to the machine using Active Directory Authentication or LDAP Authentication.
  - To send scanned data to your designated folder on the CIFS server, press [to My Folder].
  - To enable this feature in Web Based Management, click the Scan tab, and then click the Scan to FTP / SFTP / Network / SharePoint menu in the left navigation bar. In the Send to My Folder field, select On. Click Submit.
- 3. When the server profiles you set up using Web Based Management appear, select the profile you want. If the profile is not complete (for example, if the logon account name and password are missing, or if the quality or file type is not specified), you will be prompted to enter any missing information.

If the LCD prompts you to enter a PIN for the computer, enter the four-digit PIN on the LCD, and then press [OK].

4. Press [Start].

The machine starts scanning. If using the machine's scanner glass, follow the touchscreen instructions to complete the scanning job.

- 1. Start your web browser.
- Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click Scan > Scan to FTP / SFTP / Network / SharePoint.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

5. Select the SharePoint option, and then click Submit.

- 6. Click the Scan to FTP / SFTP / Network / SharePoint Profile menu.
- 7. Select the profile you want to set up or change.

# NOTE

Ø

Using the following characters:  $?, /, \setminus, ", :, <, >, | or * may cause a sending error.$ 

Option	Description	
Profile Name	Type a name for this server profile (up to 15 alphanumeric characters). The machine will display this name on the LCD.	
SharePoint Site Address	Copy and paste the full destination address shown in the address bar of your browser (for example: http://SharePointSiteAddress/Shared %20Documents/Forms/AllItems.aspx) or the IP address (for example: http://192.168.0.1/Shared%20Documents/Forms/AllItems.aspx).	
SSL/TLS	If you enter the address starting from "https://" in the <b>SharePoint Site</b> <b>Address</b> field, you can verify the server certificate by checking the <b>Verify Server Certificate</b> check.	
File Name	Select a file name prefix from the preset names provided, or from user- defined names. The file name used for the scanned document will be the file name prefix you select, followed by the last six digits of the flatbed/ADF scanner counter and the file extension (for example: "Estimate_098765.pdf").	
Quality	Select a quality setting. If you choose the <b>User Select</b> option, the machine will prompt users to select a setting each time they use the scan profile.	

Option	Description	
File Type	Select the file type you want to use for the scanned document. If you choose the <b>User Select</b> option, the machine will prompt users to select a setting each time they use the scan profile.	
Document Size	Select your document size from the list. This is necessary to make sure the scanned file is the correct size.	
	If you choose the <b>User Select</b> option, the machine will prompt users to select a setting each time they use the scan profile.	
File Size	Select your file size from the list.	
	If you choose the <b>User Select</b> option, the machine will prompt users to select a setting each time they use the scan profile.	
Auto Deskew	Select the <b>Auto</b> option to set the machine to correct document skewing automatically as the pages are scanned.	
Skip Blank Page	Select the <b>On</b> option to remove blank pages of the document from the scanning results.	
Skip Blank Page Sensitivity	Select the sensitivity level for detecting blank pages in the scanned data. The higher the sensitivity, the easier it is for the machine to detect blank pages.	
2-sided Scan	Select the <b>Long Edge</b> or <b>Short Edge</b> option to scan both sides of the document, depending on the layout of your original.	
Remove Background Color	Change the amount of background color that is removed.	
Margin Settings (available only for certain models)	Adjust your document's margins.	
Document Separation	Split a scanned image.	
	When multiple documents have been scanned, you can split and save the documents separately by using this function.	
B&W TIFF Compression	Select the TIFF compression option for a black and white document.	
Brightness	Select the brightness level.	
Contrast	Select the contrast level.	
Use PIN for Authentication	To PIN-protect this profile, select <b>On</b> and type a four-digit PIN in the <b>PIN Code</b> field.	
Auth. Method	To set your authentication method, select <b>Auto</b> , <b>NTLMv2</b> , <b>Kerberos</b> , or <b>Basic</b> . If you choose <b>Auto</b> , the authentication method will be detected automatically.	
Username	Type the user name (up to 96 characters) of a user that has permission to write data to the folder specified in the <b>SharePoint Site Address</b> field. If the user name is part of a domain, enter the user name in one of the following styles: • user@domain • domain\user	
Password	Type the password (up to 32 characters) associated with the user name you entered in the <b>Username</b> field. Type the password again in the <b>Retype password</b> field.	
Kerberos Server Address	To set the Kerberos Server Address manually, type the Kerberos Server Address (for example: kerberos.example.com; up to 64 characters).	

8. Click Submit.

Scan to SharePoint

▲ Home > Scan > Scan from Your Computer (Windows) > Scan Using Nuance<sup>™</sup> PaperPort<sup>™</sup> 14SE or Other Windows Applications

# Scan Using Nuance<sup>™</sup> PaperPort<sup>™</sup> 14SE or Other Windows Applications

You can use the Nuance<sup>™</sup> PaperPort<sup>™</sup> 14SE application for scanning.

- To download the Nuance<sup>™</sup> PaperPort<sup>™</sup> 14SE application, click **F** (Brother Utilities), select **Do More** in the left navigation bar, and then click **PaperPort**.
- Nuance<sup>™</sup> PaperPort<sup>™</sup> 14SE supports Windows 10 and Windows 11.
- For detailed instructions on using each application, click the application's **Help** menu, and then click **Getting Started Guide** in the **Help** ribbon.

The instructions for scanning in these steps are for PaperPort<sup>™</sup> 14SE. For other Windows applications, the steps will be similar. PaperPort<sup>™</sup> 14SE supports both TWAIN and WIA drivers; the TWAIN driver (recommended) is used in these steps.

- 1. Load your document.
- 2. Start PaperPort<sup>™</sup> 14SE.

Do one of the following:

Windows 11

Click > All apps > Nuance PaperPort 14 > PaperPort.

Windows 10

Click 🕂 > Nuance PaperPort 14 > PaperPort.

3. Click the **Desktop** menu, and then click **Scan Settings** in the **Desktop** ribbon.

The Scan or Get Photo panel appears on the left side of the screen.

- 4. Click Select.
- 5. From the available Scanners list, select your model with **TWAIN: TW** in the name.
- 6. Click OK.
- 7. Select the Display scanner dialog box checkbox in the Scan or Get Photo panel.
- 8. Click Scan.

The Scanner Setup dialog box appears.

TW-Brother		? ×
Photo	Photo	
Web	Resolution	300 x 300 dpi 🗸 🗸
	Color Setting	24bit Colour
Text	Document Size	A4 210 x 297 mm (8.3 x 11.7 in)

- 9. Adjust the settings in the Scanner Setup dialog box, if needed.
- 10. Click the **Document Size** drop-down list, and then select your document size.

To scan both sides of the document:

Automatic 2-sided scan is available only when using the ADF.

You cannot use PreScan to preview the scanned image.

- 11. Click PreScan to preview your image and crop unwanted portions before scanning.
- 12. Click Start.

The machine starts scanning.

## **Related Information**

- Scan from Your Computer (Windows)
  - TWAIN Driver Settings (Windows)

▲ Home > Scan > Scan from Your Computer (Windows) > Scan Using Nuance<sup>™</sup> PaperPort<sup>™</sup> 14SE or Other Windows Applications > TWAIN Driver Settings (Windows)

**TWAIN Driver Settings (Windows)** 

- Note that the item names and assignable values will vary depending on the machine.
  - The Contrast option is available only when selecting the Gray (Error Diffusion), True Gray, or 24bit Color options from the Color Setting drop-down list.

#### 1. Scan

Select the Photo, Web, or Text option depending on the type of document you want to scan.

Scan (Image Type)		Resolution	Color Setting
Photo	Use for scanning photo images.	300 x 300 dpi	24bit Color
Web	Use for attaching scanned images to web pages.	100 x 100 dpi	24bit Color
Text	Use for scanning text documents.	200 x 200 dpi	Black & White

## 2. Resolution

Select a scanning resolution from the **Resolution** drop-down list. Higher resolutions take more memory and transfer time, but produce a finer higher quality scanned image.

## 3. Color Setting

Select from a range of scan color depths.

## Black & White

Use for text or line art images.

• Gray (Error Diffusion)

Use for photographic images or graphics. (Error Diffusion is a method for creating simulated gray images without using true gray dots. Black dots are arranged in a specific pattern to give a gray appearance.)

True Gray

Use for photographic images or graphics. This mode is more accurate because it uses up to 256 shades of gray.

24bit Color

Use to create an image with the most accurate color reproduction. This mode uses up to 16.8 million colors to scan the image, but it requires the most memory and has the longest transfer time.

## 4. Document Size

Select the exact size of your document from a selection of preset scan sizes.

If you select **Custom**, the **Custom Document Size** dialog box appears and you can specify the document size.

## 5. Brightness

Set the brightness level by dragging the slider to the right or left to lighten or darken the image. If the scanned image is too light, set a lower brightness level and scan the document again. If the image is too dark, set a higher brightness level and scan the document again. You can also type a value in the field to set the brightness level.

## 6. Contrast

Increase or decrease the contrast level by moving the slider to the right or left. An increase emphasizes dark and light areas of the image, while a decrease reveals more details in gray areas. You can also type a value in the field to set the contrast level.

## 7. 2-sided Scanning

Scan both sides of the document. When using the Automatic 2-sided Scan feature, you must select the **Long-edge binding** or **Short-edge binding** option from the **2-sided Scanning** drop-down list, so that when you turn the pages, they are facing the way you want.

## 8. Advanced Settings

Configure advanced settings by clicking the Advanced Settings button in the Scan Settings dialog box.

## Document Correction

- Auto Deskew

Set the machine to correct document skewing automatically as the pages are scanned.

## - Detect End of Page (ADF)

Detects the end of page and automatically adjusts the size of a page when the length of the document scanned from the ADF is shorter than the selected document size.

- Margin Settings (available only for certain models)

Adjust the margins in your document.

- Rotate Image

Rotate the scanned image.

- Fill With Color

Fill in the edges on four sides of the scanned image using the selected color and range.

- Skip Blank Page

Remove the document's blank pages from the scanning results.

- Image Quality
  - Background Processing
    - Remove Bleed-through / Pattern

Prevent bleed-through.

Remove Background Color

Remove the base color of documents to make the scanned data more legible.

- Color Drop

Select a color to remove from the scanned image.

- Edge Emphasis

Make the characters of the original sharper.

- Reduce Noise

Improve the quality of your scanned images with this selection. The **Reduce Noise** option is available when selecting the **24bit Color** option and the **300 x 300 dpi**, **400 x 400 dpi**, or **600 x 600 dpi** scan resolution.

## B&W Image Quality

- Character Correction

## Blurred Character Correction

Correct the broken or incomplete characters of the original to make them easier to read.

## Boldface Formatting

Emphasize the characters of the original by making them bold.

## - B&W Inversion

Invert black and white in the black and white image.

## Feed Control

- Layout

Select the layout.

- Continuous Scan

Select this option to scan multiple pages. After a page is scanned, select whether to continue scanning or finish.

## Related Information

Set up a file name for scanned data using Web Based Management.

- 1. Start your web browser.
- Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

Ø

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click Scan > Scan File Name.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Select the File Name Style from the drop-down list.
- 6. If you selected the option to include the date in **File Name Style** field, select the date format from the dropdown list.
- 7. In the Time field, select On to include the time information in the file name.
- 8. In the Counter field, select Continuous or Reset after each job.

If you select Reset after each job, duplication of file names may occur.

9. If you want to create a user-defined file name prefix, type a file name in the user-defined fields of each scan function.

Do not use the following characters: ? / \ \*

10. Click Submit.

Send a Fax

Home > Fax > Send a Fax > Send the Same Fax to More than One Recipient (Broadcasting)

## Send the Same Fax to More than One Recipient (Broadcasting)

Use the Broadcasting feature to send the same fax to multiple fax numbers at the same time.

- The same broadcast can include Groups, Address Book numbers, and up to 50 manually dialed numbers.
- Address Book numbers must be stored in the machine's memory before they can be used in a broadcast.
- Group numbers must also be stored in the machine's memory before they can be used in a broadcast. Group numbers include many stored Address Book numbers for easier dialing.

If you do not use any of the Address Book numbers for Groups, you can broadcast faxes to as many as 350 different numbers.

- 1. Load your document.
- 2. Press [Fax].

Ø

If the Fax Preview option is set to [On], press [Fax] > [Sending Faxes].

- 3. Press [Options] > [Broadcasting].
- 4. Press [Add Number].

You can add numbers to the broadcast in the following ways:

• Press [Add Number] and enter a number using the LCD.

```
Press [OK].
```

If you want to broadcast using an email address, press **N**, enter the email address, and press

(On certain models, you must download Internet Fax to use the Internet Fax feature and the Scan to Email server feature.)

- Press [Add from Address book]. Swipe up or down or press ▲ or ▼ to display the number you want to add to the broadcast. Select the checkboxes of the broadcast. After you select all the numbers you want, press [OK].
- Press [Search in Address book]. Press the name and press [OK]. Press the name or the first letter of the name, and then press the number you want to add.
- 5. When finished, press [OK].

```
6. Press [Fax Start].
```

- The machine's available memory will vary depending on the types of jobs in the memory and the
  numbers used for broadcasting. If you broadcast to the maximum number available, you will not be able
  to use dual access and delayed fax.
  - If the [Out of Memory] message appears, press or [Quit] to stop the job. If more than one page has been scanned, press [Send Now] to send the portion that is in the machine's memory.

- Shrink Page Size of an Oversized Incoming Fax
- Set the 2-sided Printing for Received Faxes
- Set the Fax Receive Stamp
- Receive a Fax at the End of a Telephone Conversation

Home > Fax > Receive a Fax > Receive Mode Settings > Receive Modes Overview

## **Receive Modes Overview**

Some receive modes answer automatically (Fax Only Mode and Fax/Tel Mode). You may want to change the Ring Delay before using these modes.

### Fax Only Mode

([Fax Only] in the machine's menu)

Fax Only Mode automatically answers every call as a fax.

### Fax/Tel Mode

([Fax/Tel] in the machine's menu)

Fax/Tel Mode helps you manage incoming calls, by recognizing whether they are fax or voice calls and handling them in the following ways:

- Faxes will be received automatically.
- Voice calls will start the F/T ring to tell you to pick up the call. The F/T ring is a fast pseudo/double-ring made by your machine.

### Manual Mode

([Manual] in the machine's menu)

Manual Mode turns off all automatic answering operations unless you are using the Distinctive Ring Receive feature.

To receive a fax in Manual Mode, lift the handset of the external telephone connected to the machine or press the button in the table.

Applicable Models	Alternate way to lift the handset
MFC-EX915DW	Hook

When you hear fax tones (short repeating beeps), press the buttons in the table to receive a fax. Use the Easy Receive feature to receive faxes when you have lifted a handset on the same line as the machine.

Applicable Models	To receive a fax
MFC-EX915DW	Fax Start > Receive

### **External TAD Mode**

([External TAD] in the machine's menu)

External TAD Mode lets an external answering device manage your incoming calls.

Incoming calls will be handled in the following ways:

- Faxes will be received automatically.
- Voice callers can record a message on the external TAD.

### Related Information

Receive Mode Settings

Home > Fax > Receive a Fax > Receive Mode Settings > Choose the Correct Receive Mode

## **Choose the Correct Receive Mode**

The correct Receive Mode for you is determined by the external devices and telephone subscriber services (Voice Mail, Distinctive Ring and so on) you will be using on the same line as your machine.

### Will you be using a Distinctive Ring number for receiving faxes?

Brother uses the term "Distinctive Ring" but different telephone companies may have other names for this service, such as Custom Ringing, Personalized Ring, Teen Ring, Ident-A-Ring, Ident-A-Call, Data Ident-A-Call, Smart Ring and SimpleBiz Fax & Alternate Number Ringing.

### Will you be using Voice Mail on the same telephone line as your Brother machine?

If you have Voice Mail on the same telephone line as your Brother machine, there is a strong possibility that Voice Mail and the Brother machine will conflict with each other when receiving incoming calls.

### Will you be using a Telephone Answering Device on the same telephone line as your Brother machine?

Your external telephone answering device (TAD) will answer every call automatically. Voice messages are stored on the external TAD and fax messages are printed. Select [External TAD] as your receive mode.

### Will you be using your Brother machine on a dedicated fax line?

Your machine automatically answers every call as a fax. Select [Fax Only] as your receive mode.

### Will you be using your Brother machine on the same line as your telephone?

### Do you want to receive voice calls and faxes automatically?

The Fax/Tel Mode is used when sharing the Brother machine and your telephone on the same line. Select [Fax/Tel] as your receive mode.

**Important Note:** You cannot receive voice messages on either Voice Mail or an answering machine if you selected the Fax/Tel Mode.

### Do you expect to receive very few faxes?

Choose [Manual] as your receive mode. You control the telephone line and must answer every call yourself.

1. Press 🍟 [Settings] > [All Settings] > [Fax] > [Setup Receive] > [Receive Mode].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

If you cannot change the [Receive Mode] option, make sure the Distinctive Ring feature is set to [Off].

2. Press [Fax Only], [Fax/Tel], [External TAD], or [Manual].

3. Press

▲ Home > Fax > Receive a Fax > Receive Mode Settings > Set the Number of Rings Before the Machine Answers (Ring Delay)

## Set the Number of Rings Before the Machine Answers (Ring Delay)

When somebody calls your machine, you will hear the normal telephone ring sound. The number of rings is set in the Ring Delay option.

- The Ring Delay setting sets the number of times the machine rings before it answers in the Fax Only and Fax/Tel Modes.
- If you have external or extension telephones on the same line as the machine, keep the Ring Delay setting of 4.

1. Press 🍟 [Settings] > [All Settings] > [Fax] > [Setup Receive] > [Ring Delay].

```
If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.
```

2. Press the number of rings you want.

If you select [0], the machine will answer immediately and the line will not ring at all (available only for some countries).

3. Press

Ø

### Related Information

Receive Mode Settings

### **Related Topics:**

• Telephone and Fax Problems

▲ Home > Fax > Receive a Fax > Receive Mode Settings > Set the F/T Ring Time (Pseudo/Double-ring)

## Set the F/T Ring Time (Pseudo/Double-ring)

When you set the Receive Mode to Fax/Tel Mode, if the call is a fax, your machine will automatically receive it. However, if it is a voice call, the machine will sound the F/T ring (pseudo/double-ring) for the time you set in the F/T Ring Time option. When you hear the F/T ring, it means that a voice caller is on the line.

The F/T Ring Time feature works when you set Fax/Tel Mode as the Receive Mode.

Because the F/T ring is made by the machine, extension and external telephones will not ring; however, you can still answer the call on any telephone.

1. Press 🍟 [Settings] > [All Settings] > [Fax] > [Setup Receive] > [F/T Ring Time].

// If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

2. Press how long you want the machine to ring to alert you that you have a voice call.

## 3. Press

Even if the caller hangs up during the pseudo/double-ringing, the machine will continue to ring for the set time.

Receive Mode Settings

▲ Home > Fax > Receive a Fax > Memory Receive Options

## **Memory Receive Options**

Use the Memory Receive options to direct incoming faxes while you are away from the machine. You can use only one Memory Receive option at a time.

Memory Receive can be set to:

- PC-Fax Receive
- Fax Forwarding
- Fax Storage
- Forward to Cloud (The machine forwards your received faxes to online services.)
- Forward to Network (The machine forwards your received faxes to a network destination.)
- Off
  - Use PC-Fax Receive to Transfer Received Faxes to Your Computer (Windows only)
  - · Forward Incoming Faxes to Another Machine
  - · Store Incoming Faxes in the Machine's Memory
  - Change Memory Receive Options
  - Turn Off Memory Receive
  - · Print a Fax Stored in the Machine's Memory
  - Forward Incoming Faxes to a Network Destination

▲ Home > Fax > Receive a Fax > Memory Receive Options > Use PC-Fax Receive to Transfer Received Faxes to Your Computer (Windows only)

# Use PC-Fax Receive to Transfer Received Faxes to Your Computer (Windows only)

Turn on the PC-Fax Receive feature to automatically store incoming faxes to your machine's memory, and then send them to your computer. Use your computer to view and store these faxes.

To transfer the received faxes to your computer you must have the PC-FAX Receiving software running on your computer.

Even if you have turned off your computer (at night or on the weekend, for example), your machine will receive and store your faxes in its memory.

When you start your computer and the PC-FAX Receiving software runs, your machine transfers your faxes to your computer automatically.

If you selected [Backup Print: On], the machine will also print the fax.

1. Press 🍟 [Settings] > [All Settings] > [Fax] > [Setup Receive] > [PC Fax Receive].

<sup>"</sup> If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

- 2. Press [On].
- 3. Press [OK], and then follow the instructions on the LCD.

PC-Fax Receive is not available for macOS.

- If you get an error message and the machine cannot print the faxes in the memory, you can use this setting to transfer your faxes to your computer.
- 4. Press [<USB>] or the name of the computer you want to receive faxes if you are on a network, and then press [OK].
- 5. Press [Backup Print: On] or [Backup Print: Off].

## Forward Incoming Faxes to a Network Destination

Set up a profile to forward incoming faxes directly to a folder on an FTP, SFTP, CIFS, or SharePoint server.

- · We recommend using the latest version of the following web browsers:
  - Microsoft Edge, Firefox, and Google Chrome<sup>™</sup> for Windows
  - Safari, Firefox, and Google Chrome<sup>™</sup> for Mac
  - Google Chrome<sup>™</sup> for Android<sup>™</sup>
  - Safari and Google Chrome<sup>™</sup> for iOS
- Ensure that JavaScript and Cookies are always enabled, regardless of which browser you use.
- 1. Start your web browser.
- Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click Administrator > Network Profile.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Select the FTP, SFTP, Network, or SharePoint option, and then click Submit.
- 6. Set up the profile for your server, using one of the following tables:

Using the following characters: ?, /, \, ", :, <, >, | or \* may cause a sending error.

### FTP

Ø

Option	Description	
Profile Name	Type a name for this server profile (up to 15 alphanumeric characters). The machine will display this name on the LCD.	
Host Address	Type the Host Address (for example: ftp.example.com; up to 64 characters) or the IP address (for example: 192.23.56.189).	
Port Number	Change the <b>Port Number</b> setting used to access the FTP server. The default setting is port 21. In most cases, this setting does not need to be changed.	
Username	Type a user name (up to 32 characters) of a user that has permission to write data to the FTP server.	
Password	Type the password (up to 32 characters) associated with the user name you entered in the <b>Username</b> field. Type the password again in the <b>Retype password</b> field.	
SSL/TLS	Set the <b>SSL/TLS</b> option to forward securely using SSL/TLS communication. Change the <b>CA Certificate</b> setting, if needed.	
Store Directory	Type the path (up to 255 characters) to the folder on the FTP server where you want to forward incoming faxes. Do not type a slash mark at the beginning of the path (correct example: brother/abc).	

Option	Description
Passive Mode	Set the <b>Passive Mode</b> option to off or on depending on your FTP server and network firewall configuration. The default setting is on. In most cases, this setting does not need to be changed.

### SFTP

Option	Description	
Profile Name	Type a name for this server profile (up to 15 alphanumeric characters). The machine will display this name on the LCD.	
Host Address	Type the Host Address (for example: ftp.example.com; up to 64 characters) or the IP address (for example: 192.23.56.189).	
Username	Type a user name (up to 32 characters) of a user that has permission to write data to the SFTP server.	
Auth. Method	Select Password or Public Key.	
Password	When you select <b>Password</b> for the <b>Auth. Method</b> option, type the password (up to 32 characters) associated with the user name you typed in the <b>Username</b> field. Type the password again in the <b>Retype password</b> field.	
Client Key Pair	When you select <b>Public Key</b> for the <b>Auth. Method</b> option, select the authentication type.	
Server Public Key	Select the authentication type.	
Store Directory	Type the path (up to 255 characters) to the folder on the SFTP server where you want to forward incoming faxes. Do not type a slash mark at the beginning of the path (correct example: brother/abc).	
Port Number	Change the <b>Port Number</b> setting used to access the SFTP server. The default setting is port 22. In most cases, this setting does not need to be changed.	

### Network

Option	Description	
Profile Name	Type a name for this server profile (up to 15 alphanumeric characters). The machine will display this name on the LCD.	
Network Folder Path	Type the path to the folder on the CIFS server where you want to forward incoming faxes.	
Auth. Method	To set your authentication method, select <b>Auto</b> , <b>Kerberos</b> , or <b>NTLMv2</b> .	
Username	Type a user name (up to 96 characters) that has permission to write data to the folder specified in the <b>Network Folder Path</b> field. If the user name is part of a domain, type the user name in one of the following styles:	
	user@domain	
	domain\user	
Password	Type the password (up to 32 characters) associated with the user name you entered in the <b>Username</b> field. Type the password again in the <b>Retype password</b> field.	
Kerberos Server Address	When you select <b>Kerberos</b> for the <b>Auth. Method</b> option, you must type the Kerberos Server Address (for example: kerberos.example.com; up to 64 characters).	

You must configure the SNTP (network time server) or you must set the date, time and time zone correctly on the control panel. The time must match the time used by the Kerberos Server and CIFS Server.

Option	Description
Profile Name	Type a name for this server profile (up to 15 alphanumeric characters). The machine will display this name on the LCD.
SharePoint Site Address	Copy and paste the full destination address shown in the address bar of your browser (for example: http://SharePointSiteAddress/Shared %20Documents/Forms/AllItems.aspx) or the IP address (for example: http://192.168.0.1/Shared%20Documents/Forms/AllItems.aspx).
SSL/TLS	If the address in the <b>SharePoint Site Address</b> field starts with "https://", you can verify the server certificate by selecting the <b>Verify Server Certificate</b> checkbox.
Auth. Method	To set your authentication method, select <b>Auto</b> , <b>NTLMv2</b> , <b>Kerberos</b> , or <b>Basic</b> . If you choose <b>Auto</b> , the authentication method will be detected automatically.
Username	<ul> <li>Type the user name (up to 96 characters) of a user that has permission to write data to the folder specified in the SharePoint Site Address field. If the user name is part of a domain, enter the user name in one of the following styles:</li> <li>user@domain</li> </ul>
	• domain\user
Password	Type the password (up to 32 characters) associated with the user name you entered in the <b>Username</b> field. Type the password again in the <b>Retype password</b> field.
Kerberos Server Address	When you select <b>Kerberos</b> for the <b>Auth. Method</b> option, you must type the Kerberos Server Address (for example: kerberos.example.com; up to 64 characters).

7. Click Submit.

- 8. To set the Fax Forward feature, go to the navigation menu, and then click Fax > Remote Fax Options.
- 9. Select Forward to Network from the Fwd/Store/Cloud/Network drop-down list.
- 10. Select the file type you want to use.
- 11. To print a backup copy of incoming faxes, select **On** for **Backup print**.
- 12. Select the profile you want to use from the Network Profile drop-down list.
- 13. Type a three-digit Remote Access Code in the Remote Access Code field, if needed.

• You can use the numbers 0 through 9, \*, or # for the Remote Access Code.

The Remote Access Code must be different from the remote codes for the Fax features.

14. Click Submit.

## **Remote Retrieval Commands**

Use the Remote Commands in this table to access fax commands and options when you are away from your machine. When you call the machine and enter your remote access code (three digits followed by \*), the system will sound two short beeps and you must enter a Remote Command (column 1), followed by one of the options (column 2) for that command.

Remote Command	Option	Description
95	Change the Fax Forwarding, or Fax Storage settings	
	1 OFF	You can select <i>Off</i> after you retrieve or erase all your messages.
	2 Fax Forwarding	One long beep means the change is accepted. If
	4 Fax Forwarding number	you hear three short beeps, you cannot make a change because one of the settings may not be
	6 Fax Storage	configured correctly (for example, a Fax Forwarding number has not been registered). You can register your Fax Forwarding number by entering 4. After you register the number, Fax Forwarding will work.
96	Retrieve a fax	
	2 Retrieve all faxes	Enter the fax number of a remote fax machine to receive stored fax messages.
	3 Erase faxes from memory	If you hear one long beep, fax messages have been erased from memory.
97	Check the receiving status	
	1 Fax	Check whether your machine has received any faxes. If yes, you will hear one long beep. If not, you will hear three short beeps.
98	Change the Receive Mode	
	1 External TAD	One long beep means the change has been
	2 Fax/Tel	accepted.
	3 Fax Only	
90	Exit	Press <b>9 0</b> to stop remote retrieval. Wait for the long beep, then hang up.

### **Related Information**

▲ Home > Fax > Receive a Fax > Remote Fax Retrieval > Forward Faxes Remotely

## **Forward Faxes Remotely**

Call your machine from any touch-tone telephone or fax machine to forward incoming faxes to another machine.

You must turn on Fax Storage to use this feature.

1. Dial your fax number.

Ø

- 2. When your machine answers, enter your Remote Access Code (three digits followed by \*). If you hear one long beep, you have messages.
- 3. When you hear two short beeps, press 9 6 2.
- 4. Wait for the long beep, and then use the dial pad to enter the number of the remote fax machine where you want your fax messages sent, followed by # # (up to 20 digits).

You cannot use \* and # as dial numbers. However, press # if you want to create a pause.

5. Hang up after you hear your machine beep. Your machine will call the other fax machine, which will then print your fax messages.

▲ Home > Fax > Receive a Fax > Remote Fax Retrieval > Change the Fax Forwarding Number

## Change the Fax Forwarding Number

You can change your fax forwarding number from another touch-tone telephone or fax machine.

- 1. Dial your fax number.
- 2. When your machine answers, enter your Remote Access Code (three digits followed by \*). If you hear one long beep, you have messages.
- 3. When you hear two short beeps, press 9 5 4.
- 4. Wait for the long beep, enter the new number (up to 20 digits) of the remote fax machine you want your fax messages forwarded to using the dial pad, then enter # #.

You will hear one long beep.

You cannot use \* and # as dial numbers. However, press # if you want to create a pause.

- 5. When you hear two short beeps, press 9 0 to stop Remote Access when you have finished.
- 6. Hang up after you hear your machine beep.

▲ Home > Fax > Voice Operations and Fax Numbers

▲ Home > Fax > Voice Operations and Fax Numbers > Voice Operations

## **Voice Operations**

- Send Tone Signals (For Canada)
- Pick up a Voice Call in Fax/Tel Receive Mode
- Special Line Considerations

▲ Home > Fax > Voice Operations and Fax Numbers > Voice Operations > Send Tone Signals (For Canada)

## Send Tone Signals (For Canada)

If you have a Pulse dialing service, but must send Tone signals (for example, for telephone banking), follow these steps. If you have a Touch Tone service, you will not need this feature to send tone signals.

3. Press # on the machine's LCD.

Any digits dialed after this will send tone signals.

When you are finished with the call, the machine will return to the Pulse dialing service.

Voice Operations

▲ Home > Fax > Voice Operations and Fax Numbers > Voice Operations > Pick up a Voice Call in Fax/Tel Receive Mode

## Pick up a Voice Call in Fax/Tel Receive Mode

When the machine is in Fax/Tel mode, it will use the F/T Ring (pseudo/double-ring) to alert you to pick up a voice call.

If you are at the machine, lift the external telephone's handset, and then press the button in the following table to answer:

Applicable Models	To pick up a voice call
MFC-EX915DW	Pickup

If you are at an extension telephone, lift the handset during the F/T Ring and then press #51 between the pseudo/double rings. If no one is on the line, or if someone wants to send you a fax, send the call back to the machine by pressing \*51.

Voice Operations

▲ Home > Fax > Voice Operations and Fax Numbers > Voice Operations > Special Line Considerations

## **Special Line Considerations**

- Rollover Telephone Lines
- Two-Line Telephone System
- Convert Telephone Wall Outlets
- Install Your Machine, an External Two-Line TAD and Two-Line Telephone

Home > Fax > Voice Operations and Fax Numbers > Voice Operations > Special Line Considerations > Rollover Telephone Lines

## **Rollover Telephone Lines**

A rollover telephone system is a group of two or more separate telephone lines that pass incoming calls to each other if they are busy.

This feature is available only in the USA and Canada.

The calls are usually passed down or 'rolled over' to the next available telephone line in a preset order.

Your machine can work in a rollover system only if it is the last number in the sequence, so the call cannot roll away. Do not place the machine on any of the other numbers; when the other lines are busy and a second fax call is received, the fax call would be transferred to a line that does not have a fax machine. **Your machine will work best on a dedicated line.** 

## Related Information

• Special Line Considerations

▲ Home > Fax > Voice Operations and Fax Numbers > Voice Operations > Special Line Considerations > Two-Line Telephone System

## **Two-Line Telephone System**

A two-line telephone system uses two separate telephone numbers on the same wall outlet.

This feature is available only in the USA and Canada.

The two telephone numbers can be on separate jacks (RJ11) or combined into one jack (RJ14). Your machine must be plugged into an RJ11 jack. RJ11 and RJ14 jacks may be equal in size and appearance and both may contain four wires (black, red, green, yellow). To test the type of jack, plug in a two-line telephone and see if it can access both lines. If it can access both lines, you must separate the line for your machine.

## Related Information

Special Line Considerations

▲ Home > Fax > Voice Operations and Fax Numbers > Voice Operations > Special Line Considerations > Convert Telephone Wall Outlets

## **Convert Telephone Wall Outlets**

This feature is available only in the USA and Canada.

There are three ways to convert to an RJ11 jack. The first two ways may require assistance from the telephone company. You can change the wall outlets from one RJ14 jack to two RJ11 jacks. Or, you can have an RJ11 wall outlet installed and slave or jump one of the telephone numbers to it.

The third way is the easiest: Buy a triplex adapter. You can plug a triplex adapter into an RJ14 outlet. It separates the wires into two separate RJ11 jacks (Line 1, Line 2) and a third RJ14 jack (Lines 1 and 2). If your machine is on Line 1, plug the machine into L1 of the triplex adapter. If your machine is on Line 2, plug it into L2 of the triplex adapter.

### **Triplex adapter**

• Special Line Considerations

▲ Home > Fax > Voice Operations and Fax Numbers > Voice Operations > Special Line Considerations > Install Your Machine, an External Two-Line TAD and Two-Line Telephone

# Install Your Machine, an External Two-Line TAD and Two-Line Telephone

When you are installing an external two-line telephone answering device (TAD) and a two-line telephone, your machine must be isolated on one line at both the wall jack and at the TAD.

- This feature is available only in the USA and Canada.
- The most common connection is to place the machine on Line 2, which is explained in the following steps. The back of the two-line TAD must have two telephone jacks: one labeled L1 or L1/L2, and the other labeled L2. You will need at least three telephone line cords, the one that came with your machine and two for your external two-line TAD. You will need a fourth line cord if you add a two-line telephone.
- 1. Place the two-line TAD and the two-line telephone next to your machine.
- 2. Plug one end of the telephone line cord for your machine into the L2 jack of the triplex adapter. Plug the other end into the LINE jack of the machine.
- 3. Plug one end of the first telephone line cord for your TAD into the L1 jack of the triplex adapter. Plug the other end into the L1 or L1/L2 jack of the two-line TAD.
- 4. Plug one end of the second telephone line cord for your TAD into the L2 jack of the two-line TAD. Plug the other end into the EXT. jack of the machine.

- a. Triplex Adapter
- b. Two Line Telephone
- c. External Two Line TAD
- d. Machine

You can keep two-line telephones on other wall outlets as always. There are ways to add a two-line telephone to the machine's wall outlet. You can plug the telephone line cord from the two-line telephone into the L1+L2 jack of the triplex adapter. Or, you can plug the two-line telephone into the TEL jack of the two-line TAD.

**Related Information** 

Set up Broadcasting Groups

Home > Fax > Voice Operations and Fax Numbers > Dial Access Codes and Credit Card Numbers

# **Dial Access Codes and Credit Card Numbers**

Sometimes you may want to choose from several long-distance carriers when you send a fax. Rates may vary depending on the time and destination. To take advantage of low rates, you can store the access codes of long-distance carriers and credit card numbers as Address Book numbers.

You can store these long dialing sequences by dividing them and setting them up as separate Address Book numbers in any combination. You can even include manual dialing using the dial pad.

For example: You might have stored '555' and '7000' in your machine as shown in the following table.

Applicable Models	'555' stored in	'7000' stored in
MFC-EX915DW	Address Book: Brother 1	Address Book: Brother 2

You can use them both to dial '555-7000' by using the following procedure.

- 1. Press [Fax] > [Address Book].
- 2. Swipe up or down or press ▲ or ▼ to display the number of Brother 1.
- 3. Press the number.
- 4. Press [Apply].
- 5. Press [Address Book].
- 6. Press [OK].
- 7. Swipe up or down or press ▲ or ▼ to display the number of Brother 2.
- 8. Press the number.
- 9. Press [Apply].
- 10. Press [Fax Start].

The machine will dial '555-7000'.

To temporarily change a number, you can substitute part of the number by pressing it using the LCD. For example, to change the number to '555-7001', you could enter the number (Brother 1: 555) using the Address Book, press [Apply], and then enter 7001 using the LCD.

If you must wait for another dial tone or signal at any point in the dialing sequence, create a pause in the number by pressing [Pause].

# **Telephone Services and External Devices**

- Voice Mail
- Distinctive Ring
- External TAD (Telephone Answering Device)
- External and Extension Telephones
- Multi-line Connections (PBX)

Home > Fax > Telephone Services and External Devices > Voice Mail

### Voice Mail

This feature is available only in the USA and Canada.

If you have Voice Mail on the same telephone line as your Brother machine, Voice Mail and the Brother machine will conflict with each other when receiving incoming calls.

For example, if your Voice Mail is set to answer after four rings and your Brother machine is set to answer after two rings, then your Brother machine will answer first. This will prevent callers from being able to leave a message in your Voice Mail.

Similarly, if your Brother machine is set to answer after four rings and your Voice Mail is set to answer after two rings, then your Voice Mail will answer first. This will prevent your Brother machine from being able to receive an incoming fax, since Voice Mail cannot transfer the incoming fax back to the Brother machine.

To avoid conflicts between your Brother machine and your Voice Mail service, do one of the following:

• Get the Distinctive Ring service from your telephone company. Distinctive Ring is a feature of your Brother machine that allows a person with one line to receive fax and voice calls through two different telephone numbers on that one line.

Brother uses the term 'Distinctive Ring,' but telephone companies market the service under a variety of names, such as Custom Ringing, Personalized Ring, Smart Ring, Ident-A-Ring, Ident-A-Call, Data Ident-A-Call, Teen Ring, and SimpleBiz Fax & Alternate Number Ringing. This service establishes a second telephone number on the same line as your existing telephone number, and each number has its own ring pattern. Typically, the original number rings with the standard ring pattern and is used for receiving voice calls, and the second number rings with a different ring pattern and is used for receiving faxes.

• Set your Brother machine's Receive Mode to "Manual". Manual Mode requires you answer every incoming call if you want to be able to receive a fax. If the incoming call is a telephone call, then complete the call as you normally would. If you hear fax sending tones you must transfer the call to the Brother machine.

Unanswered fax and voice calls will go to your Voice Mail.

Telephone and Fax Problems

Home > Fax > Telephone Services and External Devices > Distinctive Ring

# **Distinctive Ring**

This feature is available only in the USA and Canada.

Distinctive Ring is a function of your Brother machine that allows a person with one line to receive fax and voice calls through two different phone numbers on that one line. Brother uses the term "Distinctive Ring," but telephone companies market the service under a variety of names, such as Custom Ringing, Personalized Ring, Smart Ring, Ident-A-Ring, Ident-A-Call, Data Ident-A-Call, Teen Ring, and SimpleBiz Fax & Alternate Number Ringing. This service establishes a second telephone number on the same line as your existing telephone number, and each number has its own ring pattern. Typically, the original number rings with the standard ring pattern and is used for receiving voice calls, and the second number rings with a different ring pattern and is used for receiving faxes.

- You must pay for your telephone company's Distinctive Ring service before you program the machine to work with it.
  - · Contact your telephone company for availability and rates.

#### What does your telephone company's 'Distinctive Ring' do?

Your telephone company's Distinctive Ring service allows you to have more than one number on the same telephone line. **If you need more than one telephone number, it is cheaper than paying for an extra line.** Each telephone number has its own distinctive ring pattern, so you will know which telephone number is ringing. This is one way to have a separate telephone number for your machine.

Contact your telephone company for availability and rates.

### What does Brother's 'Distinctive Ring' do?

The Brother machine has a Distinctive Ring feature that allows you to use your machine to take full advantage of the telephone company's Distinctive Ring service. The new telephone number on your line can only receive faxes.

You must pay for your telephone company's Distinctive Ring service before you program the machine to work with it.

### Do you have Voice Mail?

Ø

If you have Voice Mail on the telephone line where you will install your new machine, there is a strong possibility that Voice Mail and the machine will conflict with each other while receiving incoming calls. However, the Distinctive Ring feature allows you to use more than one number on your line, so both Voice Mail and the machine can work together without any problems. If each one has a separate telephone number, neither will interfere with the other's operations.

If you decide to get the Distinctive Ring service from the telephone company, you must register the new Distinctive Ring pattern they give you. This is so your machine can recognize its incoming calls.

You can change or cancel the Distinctive Ring pattern at any time. You can switch it off temporarily, and turn it back on later. When you get a new fax number, make sure you reset this feature.

#### Before you choose the ring pattern to register

You can register only one Distinctive Ring pattern with the machine. Some ring patterns cannot be registered. The ring patterns below are supported by your Brother machine. Register the one your telephone company gives you.

Ring Pattern	Rings	
1	short-short or long-long	_nn

Ring Pattern	Rings	
2	short-long-short	
3	short-short-long	
4	very long	

- Ring Pattern #1 is often called Short-Short and is the most commonly used.
  - If the ring pattern you received is not on this chart, contact your telephone company and ask for one that is shown.
- The machine answers only calls to its registered number.
- The first two rings are silent on the machine. This is because the fax must <<li>listen>> to the ring pattern (to compare it to the pattern that was 'registered'). (Other telephones on the same line ring.)
- If you program the machine correctly, it recognizes the registered ring pattern of the 'fax number' within two ring patterns and then answer with a fax tone. When the 'voice number' is called, the machine does not answer.

▲ Home > Fax > Telephone Services and External Devices > Distinctive Ring > Register the Distinctive Ring Pattern

# **Register the Distinctive Ring Pattern**

This feature is available only in the USA and Canada.

After you set the Distinctive Ring feature to [On], your Distinctive Ring number will receive faxes automatically. The receive mode is automatically set to [Manual] and you cannot change it to another receive mode while Distinctive Ring is set to [On]. This ensures the machine will only answer the Distinctive Ring number and not interfere when your main telephone number is called.

When Distinctive Ring is on, the LCD displays [D/R] as the Receive Mode.

1. Press 🍟 [Settings] > [All Settings] > [Fax] > [Miscellaneous] > [Distinctive].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

- 2. Do one of the following:
  - If you have not registered the Distinctive Ring pattern, press [Distinctive], and then press [On].
  - If you have already registered the Distinctive Ring pattern, and want to change the pattern, proceed to Ring Pattern setting.
- 3. Press [Ring Pattern].
- 4. Press the stored ring pattern you want, and then press [OK].

You will hear each pattern as you press the four buttons. Make sure you select the pattern that the telephone company gave you.

5. Press

Distinctive Ring is now set to [On].

If you do not want to receive faxes on your Distinctive Ring number, you can turn off Distinctive Ring. The machine will stay in [Manual] receive mode so you must set the Receive Mode again.

# **Turn Off Distinctive Ring**

This feature is available only in the USA and Canada.

Press 1 [Settings] > [All Settings] > [Fax] > [Miscellaneous] > [Distinctive] > [Distinctive].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

- 2. Press [Off].
- 3. Press

If you turn off Distinctive Ring, the machine will stay in Manual Mode. You must set the Receive Mode again.

Related Information

Distinctive Ring

Home > Fax > Telephone Services and External Devices > External TAD (Telephone Answering Device)

# External TAD (Telephone Answering Device)

Connect an external Telephone Answering Device (TAD) to the same line as your machine. When the TAD answers a call, your machine will "listen" for the CNG (fax calling) tones sent by a sending fax machine. If it hears them it will take over the call and receive the fax. If it does not hear them, it will let your TAD take a voice message and the LCD will show [Telephone].

The external TAD must answer within four rings (we recommend setting it to two rings). This is because your machine cannot hear the CNG tones until the external TAD has picked up the call. The sending machine will send CNG tones for only eight to ten seconds longer. We do not recommend using the toll saver feature on your external TAD if it needs more than four rings to activate it.

Unless you are using Distinctive Ring, the TAD must be connected to the EXT. jack of the machine.

• If you subscribe to your telephone company's Distinctive Ring service:

You may connect an external TAD to a separate wall jack only if you subscribe to your telephone company's Distinctive Ring service, have registered the distinctive ring pattern on your machine, and use that number as a fax number. The recommended setting is at least four rings on the external TAD when you have the telephone company's Distinctive Ring service. You cannot use the Toll Saver setting.

#### • If You Do Not Subscribe to the Distinctive Ring Service:

You must plug your TAD into the EXT. jack of your machine. If your TAD is plugged into a wall jack, both your machine and the TAD will try to control the telephone line. (See the illustration.)

- 1 TAD
- 2 Protective Cap

### IMPORTANT

DO NOT connect a TAD elsewhere on the same telephone line.

If you have problems receiving faxes, reduce the Ring Delay setting on your external TAD.

### **Related Information**

- Telephone Services and External Devices
  - Connect an External TAD
  - Record an Outgoing Message (OGM) on the External TAD

▲ Home > Fax > Telephone Services and External Devices > External TAD (Telephone Answering Device) > Connect an External TAD

# **Connect an External TAD**

The external TAD must be plugged into the back of the machine, into the jack labeled EXT. Your machine cannot work correctly if you plug the TAD into a wall jack (unless you are using Distinctive Ring).

- 1. Plug the telephone line cord from the telephone wall jack into the back of the machine, in the jack labeled LINE.
- 2. Plug the telephone line cord from your external TAD into the back of the machine, in the jack labeled EXT. (Make sure this cord is connected to the TAD at the TAD's telephone line jack, and not its handset jack.)
- 3. Set your external TAD to the minimum number of rings allowed. For more information, contact your telephone provider. (The machine's Ring Delay setting does not apply.)
- 4. Record an outgoing message on your external TAD.
- 5. Set the TAD to answer calls.
- 6. Set the Receive Mode on your machine to [External TAD].

### Related Information

• External TAD (Telephone Answering Device)

▲ Home > Fax > Telephone Services and External Devices > External TAD (Telephone Answering Device) > Record an Outgoing Message (OGM) on the External TAD

# Record an Outgoing Message (OGM) on the External TAD

- 1. Record five seconds of silence at the beginning of your message. This allows your machine time to listen for fax tones.
- 2. Limit your speaking to 20 seconds.
- 3. End your 20-second message by giving your Fax Receive Code for people sending manual faxes. For example: "After the beep, leave a message or press \*51 and Start to send a fax."

# NOTE

We recommend beginning your OGM with an initial five second silence because the machine cannot hear fax tones over a loud voice. You may try leaving out this pause, but if your machine has trouble receiving faxes, then you should re-record the OGM to include it.

  - Change the Remote Codes

▲ Home > Fax > Telephone Services and External Devices > External and Extension Telephones > Use the Remote Codes > Change the Remote Codes

### **Change the Remote Codes**

The preset Fax Receive Code is **\*51**. The preset Telephone Answer Code is **#51**. If you are always disconnected when accessing your External TAD remotely, try changing the three-digit remote codes, for example to *###* and 999.

```
1. Press 🍟 [Settings] > [All Settings] > [Fax] > [Setup Receive] > [Remote Codes].
```

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

- 2. Do one of the following:
  - To change the Fax Receive Code, press [Fax Receive Code]. Enter the new code, and then press [OK].
  - To change the Telephone Answer Code, press [Tel Answer]. Enter the new code, and then press [OK].
  - If you do not want to change the Codes, go to the next step.
  - To turn off (or turn on) the Remote Codes, press [Remote Codes], and then press [Off] (or [On]).
- 3. Press

### Related Information

Use the Remote Codes

▲ Home > Fax > Telephone Services and External Devices > Multi-line Connections (PBX)

# Multi-line Connections (PBX)

We suggest you ask the company that installed your PBX to connect your machine. If you have a multi-line system we suggest you ask the installer to connect the unit to the last line on the system. This prevents the machine from being activated each time the system receives telephone calls. If all incoming calls are answered by a switchboard operator, we recommend setting the Receive Mode to [Manual].

We cannot guarantee that your machine will operate correctly under all circumstances when connected to a PBX. Any difficulties with sending or receiving faxes should be reported first to the company that handles your PBX.

Fax Reports

Home > Fax > Fax Reports > Print a Fax Journal

### **Print a Fax Journal**

You can set the machine to print a Fax Journal at specific intervals (every 50 faxes, 6, 12 or 24 hours, 2 or 7 days).

Press 
 [Settings] > [All Settings] > [Fax] > [Report Setting] > [Journal Period] >
 [Journal Period].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

- 2. Swipe up or down or press ▲ or V to select the interval you want, and then press it.
  - Every 6, 12, 24 hours, 2 or 7 days

The machine will print the report at the selected time and then erase all reception and transmission log data from its memory. If the machine's memory becomes full with 200 log data before the time you selected has passed, the machine will print the Journal early and then erase all jobs from the memory. If you want an extra report before it is due to print, you can print it without erasing the log data from the memory.

Every 50 Faxes

The machine will print the Journal when the machine has stored 50 reception and transmission log data.

- 3. If you selected every 6, 12, 24 hours, 2 or 7 days, do one of the following to enter the time to start printing:
  - If you selected [12h Clock] as the format in the [Clock Type] setting, enter the time (in 12-hour format) using the LCD. Press AM PM to select [AM] or [PM].

Press [OK].

• If you set [24h Clock] in the [Clock Type] setting, press [Time], and then enter the time (in 24hour format) using the LCD.

Press [OK].

(For example: enter 19:45 for 7:45 PM.)

- 4. If you selected [Every 7 Days], press [Day].
- 5. Swipe up or down or press ▲ or ▼ to display the [Every Monday], [Every Tuesday], [Every Wednesday], [Every Thursday], [Every Friday], [Every Saturday] or [Every Sunday] option, and then press the first day of the 7-day countdown.
- 6. Press

## **Related Information**

Configure your PC-Fax Address Book (Windows)

▲ Home > Fax > PC-FAX > PC-FAX for Windows > Send a Fax Using PC-FAX (Windows)

## Send a Fax Using PC-FAX (Windows)

PC-FAX supports only black and white faxes. A black and white fax will be sent even if the original data is in color and the receiving fax machine supports color faxes.

- 1. Create a file in any application on your computer.
- 2. Select the print command in your application.
- 3. Select Brother PC-FAX as your printer, and then complete your print operation.

The Brother PC-FAX dialog box appears.

🖷 Brother PC-FAX					$\times$
		Add Cov	er Page	₽ ?	11
Address Book					
Dial Restriction	<u> </u>				
	+				
Add Send Address		0/50			
		0/50		All Clear	
	1	2	3		
Redial	4	5	6	Cancel	
Pause	7	8	9	Start	
	*	0	#		

- 4. Type a fax number using one of the following methods:
  - Click the numbers on the dial pad to type the number, and then click Add Send Address.

If you select the **Dial Restriction** checkbox, a confirmation dialog box will appear for you to re-type the fax number using the keyboard. This feature helps to prevent transmissions to the wrong destination.

Click the Address Book button, and then select a member or group from the Address Book.

If you make a mistake, click All Clear to delete all entries.

- 5. To include a cover page, select the **Add Cover Page** checkbox. You can also click it to create or edit a cover page.
- 6. Click **Start** to send the fax.
  - To cancel the fax, click **Cancel**.
  - To redial a number, click Redial to show the last five fax numbers, select a number, and then click Start.

PC-FAX for Windows

▲ Home > Fax > PC-FAX > PC-FAX for Windows > Receive Faxes on Your Computer (Windows)

## **Receive Faxes on Your Computer (Windows)**

Use the Brother PC-FAX software to receive faxes on your computer, view them, and print only the faxes you want.

• Receive Faxes Using PC-FAX Receive (Windows)

▲ Home > Fax > PC-FAX > PC-FAX for Windows > Receive Faxes on Your Computer (Windows) > Receive Faxes Using PC-FAX Receive (Windows)

## **Receive Faxes Using PC-FAX Receive (Windows)**

The Brother PC-FAX Receive software lets you view and store faxes on your computer. It is automatically installed when you install your machine's software and drivers and works on locally or network-connected machines.

PC-FAX Receive supports only black and white faxes.

When you turn off your computer, your machine will continue to receive and store faxes in your machine's memory. The machine's LCD will display the number of stored faxes received. When you start this application, the software will transfer all received faxes to your computer at once. You can enable the Backup Print option if you want the machine to print a copy of the fax before the fax is sent to your computer, or before the computer is switched off. You can configure the Backup Print settings from your machine.

## **Supported Basic Network Features**

The machine supports various features depending on the operating system. Use this table to see which network features and connections are supported by each operating system.

Operating Systems	Windows	Windows Server	macOS
Printing	Yes	Yes	Yes
Scanning	Yes		Yes
PC Fax Send (available for certain models)	Yes		Yes
PC Fax Receive (available for certain models)	Yes		
Web Based Management <sup>1</sup>	Yes	Yes	Yes
Status Monitor	Yes		
Driver Deployment Wizard	Yes	Yes	

<sup>1</sup> The default password to manage your machine's settings is located on the back of the machine and marked "**Pwd**". We recommend immediately changing the default password to protect your machine from unauthorized access.

- When connecting your machine to an outside network such as the Internet, make sure your network environment is protected by a separate firewall or other means in order to prevent information leaks due to inadequate settings or unauthorized access by malicious third parties.
- When your machine is connected to the global network, a warning appears. When you see this warning, we strongly recommend confirming your network settings, and then re-connecting to a secure network.
- Enabling your machine's global network communication filtering feature blocks access from the global network. The global network communication filtering feature may prevent the machine from receiving certain print or scan jobs from a computer or mobile device that uses a global IP address.

- Configure Your Machine for an Enterprise Wireless Network

▲ Home > Network > Wireless Network Settings > Use the Wireless Network > Before Configuring Your Machine for a Wireless Network

## Before Configuring Your Machine for a Wireless Network

Before attempting to configure a wireless network, confirm the following:

- If you are using an enterprise wireless network, you must know the User ID and Password.
- To achieve optimum results with normal everyday document printing, place your machine as close to the wireless LAN access point/router as possible with minimal obstructions. Large objects and walls between the two devices and interference from other electronic devices can affect the data transfer speed of your documents.

Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are printing large files, such as multi-page documents with mixed text and large graphics, you may want to consider selecting wired Ethernet for faster data transfer (supported models only), or USB for the fastest throughput speed.

- Although your machine can be used in a wired and wireless network (supported models only), only one connection method can be used at a time. However, a wireless network connection and Wi-Fi Direct connection, or a wired network connection (supported models only) and Wi-Fi Direct connection can be used at the same time.
- If there is a signal in the vicinity, wireless LAN allows you to freely make a LAN connection. However, if security settings are not correctly configured, the signal may be intercepted by malicious third-parties, possibly resulting in:
  - Theft of personal or confidential information
  - Improper transmission of information to parties impersonating the specified individuals
  - Dissemination of transcribed communication contents that were intercepted

Make sure you know your wireless router/access point's Network Name (SSID) and Network Key (Password). If you cannot find this information, consult the manufacturer of your wireless router/access point, your system administrator, or Internet provider. Brother cannot provide this information.

#### Related Information

· Use the Wireless Network

▲ Home > Network > Wireless Network Settings > Use the Wireless Network > Configure Your Machine for a Wireless Network Using the Setup Wizard from Your Computer

# Configure Your Machine for a Wireless Network Using the Setup Wizard from Your Computer

- 1. Download the installer from your model's **Downloads** page at support.brother.com/downloads.
- 2. Start the installer, and then follow the on-screen instructions.
- 3. Select Wireless Network Connection (Wi-Fi), and then click Next.
- 4. Follow the on-screen instructions.

You have completed the wireless network setup.

Use the Wireless Network

▲ Home > Network > Wireless Network Settings > Use the Wireless Network > Configure Your Machine for a Wireless Network Using the Machine's Control Panel Setup Wizard

## Configure Your Machine for a Wireless Network Using the Machine's Control Panel Setup Wizard

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and record the current wireless network settings of the computer to which you are connecting.

**Network Name (SSID)** 

**Network Key (Password)** 

For example:

**Network Name (SSID)** 

HELLO

#### Network Key (Password)

12345

- Your access point/router may support the use of multiple WEP keys, but your Brother machine supports the use of only the first WEP key.
- If you need assistance during setup and want to contact Brother Customer Service, make sure you
  have your SSID (Network Name) and Network Key (Password) ready. We cannot assist you in locating
  this information.
- If you do not know this information (SSID and Network Key), you cannot continue with the wireless setup.

#### How can I find this information?

- a. Check the documentation provided with your wireless access point/router.
- b. The initial SSID could be the manufacturer's name or the model name.
- c. If you do not know the security information, consult the router manufacturer, your system administrator, or your Internet provider.
- 2. Press i [Settings] > [All Settings] > [Network] > [WLAN(Wi-Fi)] > [Find Wi-Fi Network].

**If your machine displays the** [All Settings] **menu on the Home screen, skip the** [Settings] **menu**.

3. When [Enable WLAN?] appears, press [Yes].

This will start the wireless setup wizard. To cancel, press [No].

4. The machine will search for your network and display a list of available SSIDs.

If a list of SSIDs is displayed, swipe up or down or press ▲ or ▼ to display the SSID to which you want to connect, and then press the SSID.

- 5. Press [OK].
- 6. Do one of the following:
  - If you are using an authentication and encryption method that requires a Network Key, enter the Network Key you wrote down in the first step.

When you have entered all the characters, press [OK].

- If your authentication method is Open System and your encryption mode is None, go to the next step.
- 7. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the machine's LCD displays [Connected]. Press [OK], and then press

You have completed the wireless network setup. To install the drivers or the application necessary for operating your machine, go to your model's **Downloads** page at <u>support.brother.com/downloads</u>.

# Configure Your Machine for a Wireless Network Using the PIN Method of Wi-Fi Protected Setup<sup>™</sup> (WPS)

If your wireless LAN access point/router supports WPS, you can use the Personal Identification Number (PIN) Method to configure your wireless network settings.

The PIN Method is one of the connection methods developed by the Wi-Fi Alliance<sup>®</sup>. By submitting a PIN created by an Enrollee (your machine) to the Registrar (a device that manages the wireless LAN), you can set up the wireless network and security settings. For more information on how to access WPS mode, see the instructions provided with your wireless access point/router.

#### Туре А

Connection when the wireless LAN access point/router (1) doubles as the Registrar:

#### Type B

Connection when another device (2), such as a computer, is used as the Registrar:

1. Press 🍟 [Settings] > [All Settings] > [Network] > [WLAN(Wi-Fi)] > [WPS/PIN Code].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

2. When [Enable WLAN?] appears, press [Yes].

This will start the wireless setup wizard. To cancel, press [No].

- 3. The LCD displays an eight-digit PIN and the machine starts searching for a wireless LAN access point/router.
- 4. Using a computer connected to the network, in your browser's address bar, type the IP address of the device you are using as the Registrar (for example: http://192.168.1.2).
- 5. Go to the WPS settings page and type the PIN, and then follow the on-screen instructions.

The Registrar is usually the wireless LAN access point/router.

The settings page may differ depending on the brand of wireless LAN access point/router. For more information, see the instructions supplied with your wireless LAN access point/router.

If you are using a Windows 10 or Windows 11 computer as a Registrar, complete the following steps:

- 6. Do one of the following:
  - Windows 11

> All apps > Windows Tools > Control Panel. In the Hardware and Sound group, click Add Click a device.

Windows 10

Click

Windows System > Control Panel. In the Hardware and Sound group, click Add a device.

- To use a Windows 10 or Windows 11 computer as a Registrar, you must register it to your network in advance. For more information, see the instructions supplied with your wireless LAN access point/ router.
  - If you use Windows 10 or Windows 11 as a Registrar, you can install the printer driver after the wireless configuration by following the on-screen instructions. To install the driver and software necessary to use your machine, go to your model's Downloads page at support.brother.com/downloads.
- 7. Select your machine and click Next.
- Type the PIN displayed on the machine's LCD, and then click **Next**. 8.
- 9. Click Close.

If your wireless device is connected successfully, the machine's LCD displays [Connected]. Press [OK], and then press

You have completed the wireless network setup. To install the drivers or the application necessary for operating your machine, go to your model's **Downloads** page at <u>support.brother.com/downloads</u>.

▲ Home > Network > Wireless Network Settings > Use the Wireless Network > Configure Your Machine for a Wireless Network When the SSID Is Not Broadcast

## Configure Your Machine for a Wireless Network When the SSID Is Not Broadcast

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and write down the current wireless network settings.

#### **Network Name (SSID)**

Authentication Method	Encryption Mode	Network Key
Open System	NONE	-
	WEP	
Shared Key	WEP	
WPA/WPA2-PSK	AES	
	ТКІР	
WPA3-SAE	AES	

For example:

Network Name (SSID)			
HELLO			
Authentication Method	Encryption Mode	Network Key	

Authentication Method	Encryption Mode	Network Key
WPA2-PSK	AES	12345678

If your router uses WEP encryption, enter the key used as the first WEP key. Your Brother machine supports the use of the first WEP key only.

2. Press i [Settings] > [All Settings] > [Network] > [WLAN(Wi-Fi)] > [Find Wi-Fi Network].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

3. When [Enable WLAN?] appears, press [Yes].

This will start the wireless setup wizard. To cancel, press [No].

- 4. The machine will search for your network and display a list of available SSIDs. Swipe up or down or press ▲ or ▼ to display [<New SSID>]. Press [<New SSID>], and then press [OK].
- 5. Enter the SSID name, and then press [OK].
- 6. Select the Authentication Method.
- 7. Do one of the following:
  - If you selected the [Open System] option, press the Encryption type [None] or [WEP].
     If you selected the [WEP] option for Encryption type, select and enter the WEP key, and then press [OK].
  - If you selected the [Shared Key] option, select and enter the WEP key, and then press [OK].
  - If you selected the [WPA/WPA2-PSK/WPA3-SAE] option, press the Encryption type [TKIP+AES] or [AES].

Enter the WPA<sup>™</sup> key, and then press [OK].

If you selected the [WPA3-SAE] option, press the Encryption type [AES]. • Enter the WPA<sup>™</sup> key, and then press [OK].

Ø Your Brother machine supports the use of the first WEP key only.

8. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the machine's LCD displays [Connected]. Press [OK], and

You have completed the wireless network setup. To install the drivers or the application necessary for operating your machine, go to your model's **Downloads** page at support.brother.com/downloads.

▲ Home > Network > Wireless Network Settings > Use the Wireless Network > Configure Your Machine for an Enterprise Wireless Network

## **Configure Your Machine for an Enterprise Wireless Network**

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and record the current wireless network settings.

Network Name (SSID)

Authentication Method	Encryption Mode	User ID	Password
EAP-FAST/NONE	AES		
	ТКІР		
EAP-FAST/MS-CHAPv2	AES		
	ТКІР		
EAP-FAST/GTC	AES		
	ТКІР		
PEAP/MS-CHAPv2	AES		
	ТКІР		
PEAP/GTC	AES		
	ТКІР		
EAP-TTLS/CHAP	AES		
	ТКІР		
EAP-TTLS/MS-CHAP	AES		
	ТКІР		
EAP-TTLS/MS-CHAPv2	AES		
	ТКІР		
EAP-TTLS/PAP	AES		
	ТКІР		
EAP-TLS	AES		-
	ТКІР		-

For example:

Network Name (SSID)	
HELLO	

Authentication Method	Encryption Mode	User ID	Password
EAP-FAST/MS-CHAPv2	AES	Brother	12345678

- If you configure your machine using EAP-TLS authentication, you must install the client certificate issued by a CA before you start configuration. Contact your network administrator about the client certificate. If you have installed more than one certificate, we recommend writing down the certificate name you want to use.
- If you verify your machine using the common name of the server certificate, we recommend writing down the common name before you start configuration. Contact your network administrator about the common name of the server certificate.
- 2. Press i [Settings] > [All Settings] > [Network] > [WLAN(Wi-Fi)] > [Find Wi-Fi Network].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

3. When [Enable WLAN?] appears, press [Yes].

This will start the wireless setup wizard. To cancel, press [No].

- 4. The machine will search for your network and display a list of available SSIDs. Swipe up or down or press ▲ or ▼ to display [<New SSID>]. Press [<New SSID>], and then press [OK].
- 5. Enter the SSID name, and then press [OK].
- 6. Select the Authentication Method.
- 7. Do one of the following:
  - If you selected the [EAP-FAST], [PEAP] or [EAP-TTLS] option, select the Inner Authentication method [NONE], [CHAP], [MS-CHAP], [MS-CHAPv2], [GTC] or [PAP].

Depending on your Authentication method, the Inner Authentication method selections may differ.

Select the encryption type [TKIP+AES] or [AES].

Select the verification method [No Verification], [CA] or [CA + Server ID].

- If you selected the [CA + Server ID] option, enter the server ID, user ID, and password (if required), and then press [OK] for each option.
- For other selections, enter the user ID and Password, and then press [OK] for each option.

If you have not imported a CA certificate into your machine, the machine displays [No Verification].

- If you selected the [EAP-TLS] option, select the encryption type [TKIP+AES] or [AES].
   The machine will display a list of available Client Certificates, and then select the certificate.
   Select the verification method [No Verification], [CA] or [CA + Server ID].
  - Select the vernication method [No vertification], [cA] of [cA + Selver ib].
  - If you selected the [CA + Server ID] option, enter the server ID and user ID, and then press [OK] for each option.
  - For other selections, enter the user ID, and then press [OK].
- 8. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the machine's LCD displays [Connected]. Press [OK], and then press

You have completed the wireless network setup. To install the drivers or the application necessary for operating your machine, go to your model's **Downloads** page at <u>support.brother.com/downloads</u>.

# Wireless LAN Report Error Codes

If the Wireless LAN Report shows that the connection failed, check the error code on the printed report and see the corresponding instructions in the table:

Error Code	Problem and Recommended Solutions		
TS-01	The WLAN (Wi-Fi) is not enabled.		
	Check the following points and try to set up your wireless connection again:		
	Enable the WLAN setting on your machine.		
	If a network cable is connected to your machine, disconnect it.		
TS-02	The wireless router/access point cannot be detected.		
	Check the following points and try to set up your wireless connection again:		
	Make sure the wireless router/access point is on.		
	<ul> <li>Temporarily place your machine closer to the wireless router/access point when you are configuring the wireless settings.</li> </ul>		
	<ul> <li>If your wireless router/access point is using MAC address filtering, confirm that the MAC address of the machine is allowed in the filter. You can find the MAC address by printing the Network Configuration Report.</li> </ul>		
	<ul> <li>If you manually entered the Network Name (SSID) and security information (authentication method/encryption method), the information may be incorrect. Check the Network Name and security information again and re-enter the correct information.</li> </ul>		
	• Restart your wireless router/access point. If you cannot find the Network Name (SSID) and security information, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider.		
TS-03	The wireless enterprise network and security settings you entered may be incorrect.		
	Check the following points and try to set up your wireless connection again:		
	Verify the following information:		
	- Network Name (SSID) you selected to configure your machine.		
	<ul> <li>Security information you selected to configure your machine (such as the authentication method, encryption method, or User ID).</li> </ul>		
	If you still cannot find the Network Name (SSID) and security information, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider.		
TS-04	Your machine does not support the authentication and encryption methods used by the selected wireless router/access point.		
	For infrastructure mode (Most common)		
	Change the authentication and encryption methods of the wireless router/access point. Your machine supports the following authentication and encryption methods:		
	WPA-Personal:		
	TKIP / AES		
	WPA2-Personal:		
	TKIP / AES		
	WPA3-Personal:		
	AES		
	• OPEN:		
	WEP / NONE (without encryption)		
	Shared key:		
	WEP		
	If your issue is not resolved, the Network Name (SSID) or security settings you entered may be incorrect. Check that all wireless network settings are correct for your network.		

Error Code	Problem and Recommended Solutions
TS-05	The Network Name (SSID) and Network Key (Password) are incorrect.
	Check the following points and try to set up your wireless connection again:
	Confirm the Network Name (SSID) and Network Key (Password).
	If your Network Key contains upper-case and lower-case letters, make sure you type them correctly.
	• If you cannot find the Network Name (SSID) and security information, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider.
	<ul> <li>If your wireless router/access point uses WEP encryption with multiple WEP keys, write down and use only the first WEP key.</li> </ul>
TS-06	The wireless security information (authentication method/encryption method/Network Key (Password)) is incorrect.
	Check the following points and try to set up your wireless connection again:
	Confirm the Network Key. If your Network Key contains upper-case and lower-case letters, make sure you type them correctly.
	<ul> <li>Confirm whether the authentication method entered and the authentication method or encryption method supported by the wireless router/access point are the same.</li> </ul>
	• If the Network key, authentication method, and encryption method have been confirmed, restart your wireless router/access point and the machine.
	<ul> <li>If your wireless router/access point's Stealth Mode is on, you may need to disable it to connect to the wireless network.</li> </ul>
	If you cannot find the Network Name (SSID) and security information, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider.
TS-07	The machine cannot detect a wireless router/access point that has WPS (Wi-Fi Protected Setup) enabled.
	Check the following points and try again:
	<ul> <li>To check if your wireless router/access point supports WPS, look for the WPS symbol displayed on the router/access point. For more information, see the documentation provided with your wireless router/access point.</li> </ul>
	• To set up your wireless connection using WPS, you must configure both your machine and the wireless router/access point. For more information, see the user's guide.
	<ul> <li>If you do not know how to set up your wireless router/access point using WPS, see the documentation provided with your wireless router/access point, or contact the router manufacturer, your system administrator, or Internet service provider.</li> </ul>
TS-08	Two or more wireless routers or access points that have WPS enabled are detected.
	Check the following points and try again:
	<ul> <li>Make sure that only one wireless router/access point within range has WPS enabled, and then try to connect again.</li> </ul>
	Try to connect again after a few minutes to avoid interference from other access points/ routers.

How to confirm wireless security information (SSID/authentication method/encryption method/Network Key) of your WLAN access point/router:

- The default security settings may be provided on a label attached to the WLAN access point/router. Or the manufacturer's name or model number of the WLAN access point/router may be used as the default security settings.
- 2. See the documentation provided with your WLAN access point/router for information on how to find the security settings.
- If the WLAN access point/router is set to not broadcast the SSID, the SSID will not automatically be detected. You will have to manually enter the SSID name.
- The Network Key may also be described as the Password, Security Key, or Encryption Key.

If you do not know the SSID and wireless security settings of your WLAN access point/router or how to change the configuration, see the documentation provided with your WLAN access point/router, ask the manufacturer of your access point/router or ask your Internet provider or network administrator.

# ▲ Home > Network > Network Features > Configure the Proxy Server Settings Using Web Based Management

# **Configure the Proxy Server Settings Using Web Based Management**

If your network uses a proxy server, the following proxy server information must be configured using Web Based Management:

- Proxy server address
- Port number
- User Name
- Password

We recommend using the latest version of the following web browsers:

- Microsoft Edge, Firefox, and Google Chrome<sup>™</sup> for Windows
- Safari, Firefox, and Google Chrome<sup>™</sup> for Mac
- Google Chrome<sup>™</sup> for Android<sup>™</sup>
- Safari and Google Chrome<sup>™</sup> for iOS
- Ensure that JavaScript and Cookies are always enabled, regardless of which browser you use.
- 1. Start your web browser.
- Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click Network > Network > Protocol.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Make sure the Proxy checkbox is selected, and then click Submit.
- 6. In the Proxy field, click Advanced Settings.
- 7. Enter the proxy server information.
- 8. Click Submit.

# Fax Using the Internet (I-Fax)

With Internet Fax (I-Fax), you can send and receive fax documents using the Internet. Documents are transmitted in email messages as attached TIFF-F files. Your computer can send and receive documents as long as it has an application that can create and view TIFF-F files. You can use any TIFF-F viewer application. Documents sent via the machine will be converted into a TIFF-F format automatically. To send and receive messages to and from your machine, your computer's email application must support Multipurpose Internet Mail Extensions (MIME).

- 1. Sender
- 2. Internet
- 3. Receiver
- 4. Email server

I-Fax supports sending and receiving documents in Letter or A4 format and in black and white only.

# Important Information about Internet Fax (I-Fax)

I-Fax communication on a LAN is very similar to communication via email; however, it is different from fax communication using standard phone lines. Make sure you read the following information about using I-Fax:

- Factors such as the receiver's location, structure of the LAN and how busy the circuit (such as the Internet) is may cause the system to take longer than usual to send an error mail.
- When sending confidential documents, we recommend using standard phone lines instead of the Internet (due to its low level of security).
- If the receiver's mail system is not MIME-compatible, you cannot use I-Fax to send documents. If possible, check this in advance, and note that some servers will not send an error reply.
- If a document is too large to send via I-Fax, it may not reach the receiver.
- You cannot change the font or size of the text in any Internet mail you receive.

▲ Home > Network > Network Features > Fax Using the Internet (I-Fax) > Configure the Brother Machine for Email or Internet Fax (I-Fax) > Initial Setup for Email or Internet Fax (I-Fax) > How Your Brother Machine Receives an Internet Fax (I-Fax)

# How Your Brother Machine Receives an Internet Fax (I-Fax)

When your Brother machine receives an incoming I-Fax, it will print the I-Fax automatically. To receive an I-Fax, we recommend using the control panel or Web Based Management to configure the following optional items:
Auto Polling
Polling Frequency     Print Mail Header
Delete/Read Receive Error Mail
Send Delivery Notification (Receive)
E-mail Receive
Auto Polling
Ooff
On
Polling Frequency       10 Mins
Print Mail Header
None
Delete/Read Receive Error Mail
Ooff
• On
Send Delivery Notification (Receive)
Off 🗸
POP3/IMAP4/SMTP Client>>
Cancel Submit

There are two ways you can receive email messages:

- POP3/IMAP4 receiving at regular intervals
- POP3/IMAP4 receiving, manually initiated

When using POP3/IMAP4 receiving, the machine polls your email server to receive data. Polling can occur at set intervals (for example, you can configure the machine to poll the email server every ten minutes) or you can manually poll the server.

- If your machine starts to receive email data, the LCD displays [Receiving]. The email will be printed automatically.
- If your machine is out of paper when receiving data, the received data will be held in the machine's memory. This data will be printed automatically after paper is reloaded in the paper tray.
- When the machine's Temporary Fax Backup Function is turned on, received data will be stored for a certain period of time.
- If the received mail is not in a plain text format, or an attached file is not in the TIFF-F format, the error message "ATTACHED FILE FORMAT NOT SUPPORTED." will be printed.
- If the received mail is too large, the error message "E-MAIL FILE TOO LARGE." will be printed.
- If Delete/Read Receive Error Mail is On (default), then the error mail will be deleted from the email server automatically.

### **Related Topics:**

• How Your Brother Machine Receives an Internet Fax (I-Fax)

Home > Network > Network Features > Fax Using the Internet (I-Fax) > Send an Internet Fax (I-Fax)

# Send an Internet Fax (I-Fax)

Sending an I-Fax is like sending a normal fax. Make sure that your recipient's information is saved in your email address book, and load the document you want to I-Fax into your Brother machine.

 If the computer to which you want to send a document is not running Windows Server 2012/2012 R2/2016/2019/2022, Windows 10 or Windows 11, ask the computer's owner to install software that can view TIFF files.

- To send multiple pages, use the ADF.
- 1. Load your document.
- 2. Do one of the following:
  - If the Fax Preview option is set to [Off], press [Fax].
  - If the Fax Preview option is set to [On], press [Fax], and then press [Sending Faxes].
- 3. To change the fax-sending settings, press [Options].
- 4. Swipe up or down or press ▲ or ▼ to scroll through the fax settings. When the setting you want appears, press it and select your preference. When you have finished changing settings, press [OK]. (If the [OK] button is displayed.)
- 5. Do one of the following:
  - Press X [V], enter the email address using the touchscreen, and then press [OK].
  - Press [Address Book], select the email address of your recipient, and then press [Apply].
- 6. Press [Fax Start].

The machine starts scanning. After the document is scanned, it is transmitted to the recipient via your SMTP server. You can cancel the send operation by pressing X during scanning.

### 7. Press

▲ Home > Network > Network Features > Fax Using the Internet (I-Fax) > I-Fax Options > Forward Received Email and Fax Messages

### Forward Received Email and Fax Messages

Use Brother's I-Fax feature to forward email or standard fax messages to another computer, to a fax machine, or to another I-Fax machine. Enable the Forwarding feature using your machine's control panel.

To enable email forwarding using your machine's control panel:

```
    Press i [Settings] > [All Settings] > [Fax] > [Setup Receive] > [Memory Receive] > [Fax Forward].
```

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

- 2. Do one of the following:
  - Press [Manual] to enter the recipient's fax number (up to 20 digits) or email address using the LCD.
     Press [OK].
  - **Press** [Address Book].

Swipe up or down or press ▲ or ▼ to scroll until you find the fax number or email address where you want your faxes to be forwarded.

Press the fax number or email address you want.

3. If you select the email address, select the file type you want.

Press [Backup Print: On] to print received faxes at your machine so you will have a copy.

4. Press

- How Your Brother Machine Receives an Internet Fax (I-Fax)

▲ Home > Network > Network Features > Fax Using the Internet (I-Fax) > I-Fax Options > Relay Broadcast

# **Relay Broadcast**

A Relay Broadcast is when your Brother machine receives a message over the Internet and then relays it to another fax machine using conventional telephone lines. If you must fax a document over a long distance or abroad, use the Relay Broadcast Function to save the communication fee.

- 1. The Internet
- 2. Telephone line
- 3. Email server

Use the Brother machine's control panel or Web Based Management to configure the following items:

- Relay Broadcast Function
  - Set the Relay Broadcast Function to On.
- Relay Domain

Configure your machine's domain name on the machine that will broadcast the document to the conventional fax machine. If you wish to use your machine as a relay broadcast device, you must specify the trusted domain name (the portion of the name after the "@" sign) at the machine. Use care in selecting a trusted domain: any user on a trusted domain will be able to send a relay broadcast. You can register up to ten domain names.

Relay Broadcast Report

Specify whether or not you want a report to print after the machine completes the relay broadcast.

# **Relay Function**

Relay Broadcast Function

● Off ○ On

#### Relay Domain

#### Relay Broadcast Report Off On

Cancel

### **Related Information**

Submit

- I-Fax Options
  - Relay Broadcast from Your Brother Machine
  - Relay Broadcast from Your Computer

▲ Home > Network > Network Features > Fax Using the Internet (I-Fax) > I-Fax Options > Relay Broadcast > Relay Broadcast from Your Brother Machine

# **Relay Broadcast from Your Brother Machine**

Use the Relay Broadcast Function to send an email from your machine to a conventional fax machine.

Confirm the **POP3/IMAP4/SMTP Client** and **SMTP Server** checkboxes are selected in Web Based Management. If the **POP3/IMAP4/SMTP Client** and **SMTP Server** checkboxes are not selected, select the **POP3/IMAP4/SMTP Client** and **SMTP Server** checkboxes. Click **Submit**, and then restart your machine.

1. The Internet

In this example, your machine's email address is FAX@brother.com and you want to send a document from your machine to a standard fax machine in England with the email address UKFAX@brother.co.uk, and you want your machine to send the document using a conventional telephone line.

- 1. Load your document.
- 2. Do one of the following:
  - If the Fax Preview option is set to [Off], press [Fax].
  - If the Fax Preview option is set to [On], press [Fax], and then press [Sending Faxes].
- 3. Press [Options].
- 4. Swipe up or down or press ▲ or ▼ to display the [Broadcasting] option.
- 5. Press [Broadcasting].
- 6. Press [Add Number].
- 7. You can add email addresses to the broadcast in the following ways:
  - Press [Add Number] and press 🔪 🖂 , enter the email address and press [OK].
  - Press [Add from Address book]. Press the checkbox of the email address you want to add to the broadcast. After you have selected all the email addresses you want, press [OK].
  - Press [Search in Address book]. Enter the name or the first letter of the name and press [OK]. The search results will be displayed. Press the name and then press the email address you want to add to the broadcast.

The following is an example of how to enter the email address and phone number:

After you have entered all of the fax numbers, press [OK].

▲ Home > Network > Network Features > Fax Using the Internet (I-Fax) > I-Fax Options > Relay Broadcast > Relay Broadcast from Your Computer

# **Relay Broadcast from Your Computer**

Use the Relay Broadcast Function to send an email from your computer to a conventional fax machine.

If you are sending an email to a conventional fax machine, the method of entering the fax machine's fax number will vary, depending on the mail application you are using.

1. In your email application, create a new email message and type the email address of the relay machine and fax number of the first fax machine in the "TO" box.

The following is an example of how to enter the email address and fax number:

For Microsoft Outlook, the address information must be entered into the address book as follows: Name: fax#123456789

Email address: UKFAX@brother.co.uk

- 2. Type the email address of the relay machine and fax number of the second fax machine in the "TO" box.
- 3. Send the email.

Relay Broadcast

▲ Home > Network > Network Features > Fax Using the Internet (I-Fax) > I-Fax Options > Internet Fax (I-Fax) Verification Mail

# Internet Fax (I-Fax) Verification Mail

- Verification Mail for sending allows you to request notification from the receiving station where your I-Fax or email was received and processed.
- Verification Mail for receiving allows you to transmit a default report back to the sending station after successfully receiving and processing an I-Fax or email.

To use this feature, set the [Notification] options in the [Setup Mail RX] and [Setup Mail TX] options of your machine's control panel menu.

### Related Information

- I-Fax Options
  - Enable Send Notifications for TX Verification Mail
  - Enable Receive Notification for TX Verification Mail
  - I-Fax Error Mail

▲ Home > Network > Network Features > Fax Using the Internet (I-Fax) > I-Fax Options > Internet Fax (I-Fax) Verification Mail > Enable Send Notifications for TX Verification Mail

# **Enable Send Notifications for TX Verification Mail**

1. Press i [Settings] > [All Settings] > [Network] > [E-mail/IFAX] > [Setup Mail TX] >
[Notification].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

2. Select [On] or [Off] to enable or disable the Send Notification feature.

When Send Notification is On, the fax includes an additional field, named Message Disposition Notification (MDN), that contains message delivery information. By default, Send Notification is set to Off.

 $^{\prime}$  Your fax recipient's machine must support the MDN field in order to send a notification report.

3. Press

Ø

• Internet Fax (I-Fax) Verification Mail

▲ Home > Network > Network Features > Fax Using the Internet (I-Fax) > I-Fax Options > Internet Fax (I-Fax) Verification Mail > Enable Receive Notification for TX Verification Mail

### **Enable Receive Notification for TX Verification Mail**

1. Press i [Settings] > [All Settings] > [Network] > [E-mail/IFAX] > [Setup Mail RX] >
[Notification].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

2. Press one of the three possible settings:

Option	Description		
Receive Notification On	When Receive Notification is set to $\circ n$ , a template is sent back to the sender to indicate successful receipt and processing of the message.		
	These templates depend on the operation requested by the sender.		
	Example:		
	SUCCESS : Received From <mail address=""></mail>		
Receive Notification MDN	When Receive Notification is set to MDN, a report to indicate successful receipt and processing is sent back to the sender if the originating station sent a request confirmation to the MDN (Message Disposition Notification) field.		
Receive Notification Off	When Receive Notification is set to Off, all forms of receipt notification are disabled and no message is sent back to the sender regardless of the request.		

- Switch [Notification] in [Setup Mail TX] to [On].
- Switch [Header] in [Setup Mail RX] to [All] or [Subject+From+To].
- To receive TX Verification Mail, the Receiver must configure these settings: Switch [Notification] in [Setup Mail RX] to [On].

# 3. Press

### **Related Information**

• Internet Fax (I-Fax) Verification Mail

▲ Home > Network > Network Features > Fax Using the Internet (I-Fax) > I-Fax Options > Internet Fax (I-Fax) Verification Mail > I-Fax Error Mail

# **I-Fax Error Mail**

If there is a delivery error while sending an I-Fax, the mail server will send an error message back to the Brother machine and the error message will be printed.

If there is an error while receiving an I-Fax, an error message will be printed, for example, "The message being sent to the machine was not in a TIFF format."

To receive the error mail and have these printed on your machine, in [Setup Mail RX], switch the [Header] option to [All] or to [Subject+From+To].

### Related Information

• Internet Fax (I-Fax) Verification Mail

Home > Network > Network Features > Use the Send Fax to Server Feature

### Use the Send Fax to Server Feature

The Fax to Server feature allows the machine to scan a document and send it over the network to a separate fax server. The document will then be sent from the server as fax data to the destination fax number over standard phone lines. When the Fax to Server feature is set to On, all automatic fax transmissions from the machine will be sent to the fax server for fax transmission.

You can send a fax directly from the machine using the manual fax feature when the Send to Server feature is on.

  - · Before Sending a Fax to the Fax Server
  - Enable Fax to Server
  - · Operate Fax to Server

▲ Home > Network > Network Features > Use the Send Fax to Server Feature > Before Sending a Fax to the Fax Server

# Before Sending a Fax to the Fax Server

To send a document to the fax server, the correct syntax for that server must be used. The destination fax number must be sent with a prefix and a suffix that match the parameters used by the fax server. In most cases, the syntax for the prefix is "fax=" and the syntax for the suffix would be the domain name of the fax server email gateway. The suffix must also include the "@" symbol at the beginning of the suffix. The prefix and the suffix information must be stored in the machine before you can use the Fax to Server function. Destination fax numbers can be saved in the address book or entered using the dial pad (up to 40-digit numbers). For example: if you wanted to send a document to a destination fax number of 123-555-0001, use the following syntax:

Prefix Suffix fax=123-555-0001@faxserver.companyname.com Destination fax number V Your fax server application must support an email gateway.

▲ Home > Network > Network Features > Configure and Operate LDAP Search > Change LDAP Configuration Using Web Based Management

# **Change LDAP Configuration Using Web Based Management**

Use Web Based Management to configure your LDAP settings in a web browser.

- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

Ø

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click **Network > Network > Protocol**.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

#### 5. Select the LDAP checkbox, and then click Submit.

- 6. Restart your Brother machine to activate the configuration.
- 7. On your computer, in Web Based Management, go to the navigation menu, and then click **Address Book** > **LDAP**.
  - LDAP Search
  - LDAP Server Address
  - SSL/TLS
  - Port (The default port number is 389.)
  - Authentication
  - Username

This selection will be available depending on the authentication method used.

Password

This selection will be available depending on the authentication method used.

- If the LDAP server supports Kerberos authentication, we recommend selecting Kerberos for the Authentication settings. It provides strong authentication between the LDAP server and your machine.
- You must configure the SNTP protocol (network time server), or you must set the date, time and time zone correctly on the control panel for Kerberos authentication.

Kerberos Server Address

This selection will be available depending on the authentication method used.

- Search Root
- Attribute of Card ID (Search Key)
- Attribute of Name
- Timeout for LDAP
- Attribute of Name (Search Key)
- Attribute of E-mail
- Attribute of Fax Number
- Optional Attribute
- 8. When finished, click **Submit**. Make sure the **Status** field reads **OK**.

## **Related Topics:**

Synchronize Time with the SNTP Server Using Web Based Management

▲ Home > Network > Network Features > Configure and Operate LDAP Search > Perform an LDAP Search Using Your Machine's Control Panel

# Perform an LDAP Search Using Your Machine's Control Panel

When you have configured LDAP settings, you can use the LDAP search feature to find fax numbers or email addresses to use for:

- Sending a Fax
- Sending an Internet Fax (I-Fax)
- Scanning to Email Server

• The LDAP feature supports LDAPv3.

- The LDAP feature does not support SSL/TLS.
- You may need to use Kerberos Authentication or Simple Authentication to connect to your LDAP server, depending on the security policy set by your network administrator.
- You must configure the SNTP protocol (network time server), or you must set the date, time and time zone correctly on the control panel for Kerberos authentication.
- 1. Press Q to search.
- 2. Enter the initial characters for your search using the LCD.
- 3. Press [OK].

The LDAP search result will be shown on the LCD; the <u>icon appears before the fax number (local) or</u> the email (local) address book search results.

If there is no match on the server or in the local address book, the LCD displays [Results cannot be found.] for about 60 seconds.

- 4. Swipe up or down or press ▲ or ▼ to display the name you want.
- 5. Press the name.
  - To view the details of the name, press [Detail].
- 6. If the result includes more than one fax number or email address, the machine will prompt you to select just one. Press [Apply]. Do one of the following:
  - If you are sending a fax or an I-Fax, press [Fax Start].
  - If you are scanning to the Email Server, load your document, press [Next], and then press [Start].

· Synchronize Time with the SNTP Server Using Web Based Management

Home > Network > Network Features > Synchronize Time with the SNTP Server Using Web Based Management

## Synchronize Time with the SNTP Server Using Web Based Management

The Simple Network Time Protocol (SNTP) is used to synchronize the time used by the machine for authentication with the SNTP time server. (This is not the time displayed on the machine's LCD.) You can automatically or manually synchronize the machine's time with the Coordinated Universal Time (UTC) provided by the SNTP time server.

- · Configure Date and Time Using Web Based Management
- Configure the SNTP Protocol Using Web Based Management
- Change LDAP Configuration Using Web Based Management
- Perform an LDAP Search Using Your Machine's Control Panel

▲ Home > Network > Network Features > Synchronize Time with the SNTP Server Using Web Based Management > Configure Date and Time Using Web Based Management

# **Configure Date and Time Using Web Based Management**

Configure the date and time to synchronize the time used by the machine with the SNTP time server.

This feature is not available in some countries.

- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click **Administrator > Date&Time**.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

5. Verify the Time Zone settings.

Select the time difference between your location and UTC from the **Time Zone** drop-down list. For example, the time zone for Eastern Time in the USA and Canada is UTC-05:00.

- 6. Select the Synchronize with SNTP server checkbox.
- 7. Click Submit.

Ø

You can also configure date and time manually.

Home > Network > Network Features > Forward Incoming Faxes to a Network Destination

## Forward Incoming Faxes to a Network Destination

Set up a profile to forward incoming faxes directly to a folder on an FTP, SFTP, CIFS, or SharePoint server.

- We recommend using the latest version of the following web browsers:
  - Microsoft Edge, Firefox, and Google Chrome<sup>™</sup> for Windows
  - Safari, Firefox, and Google Chrome<sup>™</sup> for Mac
  - Google Chrome<sup>™</sup> for Android<sup>™</sup>
  - Safari and Google Chrome<sup>™</sup> for iOS
- Ensure that JavaScript and Cookies are always enabled, regardless of which browser you use.
- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

Ø

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click Administrator > Network Profile.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Select the FTP, SFTP, Network, or SharePoint option, and then click Submit.
- 6. Set up the profile for your server, using one of the following tables:

Using the following characters: ?, /, \, ", :, <, >, | or \* may cause a sending error.

Option	Description
Profile Name	Type a name for this server profile (up to 15 alphanumeric characters). The machine will display this name on the LCD.
Host Address	Type the Host Address (for example: ftp.example.com; up to 64 characters) or the IP address (for example: 192.23.56.189).
Port Number	Change the <b>Port Number</b> setting used to access the FTP server. The default setting is port 21. In most cases, this setting does not need to be changed.
Username	Type a user name (up to 32 characters) of a user that has permission to write data to the FTP server.
Password	Type the password (up to 32 characters) associated with the user name you entered in the <b>Username</b> field. Type the password again in the <b>Retype password</b> field.
SSL/TLS	Set the <b>SSL/TLS</b> option to forward securely using SSL/TLS communication. Change the <b>CA Certificate</b> setting, if needed.
Store Directory	Type the path (up to 255 characters) to the folder on the FTP server where you want to forward incoming faxes. Do not type a slash mark at the beginning of the path (correct example: brother/abc).

Option	Description
Passive Mode	Set the <b>Passive Mode</b> option to off or on depending on your FTP server and network firewall configuration. The default setting is on. In most cases, this setting does not need to be changed.

## SFTP

Option	Description
Profile Name	Type a name for this server profile (up to 15 alphanumeric characters). The machine will display this name on the LCD.
Host Address	Type the Host Address (for example: ftp.example.com; up to 64 characters) or the IP address (for example: 192.23.56.189).
Username	Type a user name (up to 32 characters) of a user that has permission to write data to the SFTP server.
Auth. Method	Select Password or Public Key.
Password	When you select <b>Password</b> for the <b>Auth. Method</b> option, type the password (up to 32 characters) associated with the user name you typed in the <b>Username</b> field. Type the password again in the <b>Retype password</b> field.
Client Key Pair	When you select <b>Public Key</b> for the <b>Auth. Method</b> option, select the authentication type.
Server Public Key	Select the authentication type.
Store Directory	Type the path (up to 255 characters) to the folder on the SFTP server where you want to forward incoming faxes. Do not type a slash mark at the beginning of the path (correct example: brother/abc).
Port Number	Change the <b>Port Number</b> setting used to access the SFTP server. The default setting is port 22. In most cases, this setting does not need to be changed.

## Network

Option	Description
Profile Name	Type a name for this server profile (up to 15 alphanumeric characters). The machine will display this name on the LCD.
Network Folder Path	Type the path to the folder on the CIFS server where you want to forward incoming faxes.
Auth. Method	To set your authentication method, select <b>Auto</b> , <b>Kerberos</b> , or <b>NTLMv2</b> .
Username	Type a user name (up to 96 characters) that has permission to write data to the folder specified in the <b>Network Folder Path</b> field. If the user name is part of a domain, type the user name in one of the following styles:
	user@domain
	domain\user
Password	Type the password (up to 32 characters) associated with the user name you entered in the <b>Username</b> field. Type the password again in the <b>Retype password</b> field.
Kerberos Server Address	When you select <b>Kerberos</b> for the <b>Auth. Method</b> option, you must type the Kerberos Server Address (for example: kerberos.example.com; up to 64 characters).

You must configure the SNTP (network time server) or you must set the date, time and time zone correctly on the control panel. The time must match the time used by the Kerberos Server and CIFS Server.

Option	Description
Profile Name	Type a name for this server profile (up to 15 alphanumeric characters). The machine will display this name on the LCD.
SharePoint Site Address	Copy and paste the full destination address shown in the address bar of your browser (for example: http://SharePointSiteAddress/Shared %20Documents/Forms/AllItems.aspx) or the IP address (for example: http://192.168.0.1/Shared%20Documents/Forms/AllItems.aspx).
SSL/TLS	If the address in the <b>SharePoint Site Address</b> field starts with "https://", you can verify the server certificate by selecting the <b>Verify Server Certificate</b> checkbox.
Auth. Method	To set your authentication method, select <b>Auto</b> , <b>NTLMv2</b> , <b>Kerberos</b> , or <b>Basic</b> . If you choose <b>Auto</b> , the authentication method will be detected automatically.
Username	Type the user name (up to 96 characters) of a user that has permission to write data to the folder specified in the <b>SharePoint Site Address</b> field. If the user name is part of a domain, enter the user name in one of the following styles: • user@domain
	• domain\user
Password	Type the password (up to 32 characters) associated with the user name you entered in the <b>Username</b> field. Type the password again in the <b>Retype password</b> field.
Kerberos Server Address	When you select <b>Kerberos</b> for the <b>Auth. Method</b> option, you must type the Kerberos Server Address (for example: kerberos.example.com; up to 64 characters).

7. Click Submit.

- 8. To set the Fax Forward feature, go to the navigation menu, and then click Fax > Remote Fax Options.
- 9. Select Forward to Network from the Fwd/Store/Cloud/Network drop-down list.
- 10. Select the file type you want to use.
- 11. To print a backup copy of incoming faxes, select On for Backup print.
- 12. Select the profile you want to use from the Network Profile drop-down list.
- 13. Type a three-digit Remote Access Code in the Remote Access Code field, if needed.

• You can use the numbers 0 through 9, \*, or # for the Remote Access Code.

The Remote Access Code must be different from the remote codes for the Fax features.

14. Click Submit.

Ø

- Memory Receive Options
- Network Features

Home > Network > Network Features > Reset the Network Settings to the Factory Settings

## **Reset the Network Settings to the Factory Settings**

You can use your machine's control panel to reset the machine's network settings to its default factory settings. This resets all information, such as the password and IP address.

You can also reset the print server to its factory settings using Web Based Management.

1. Press 🍟 [Settings] > [All Settings] > [Network] > [Network Reset].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

2. [Machine will reboot after resetting. Press [OK] for 2 seconds to confirm.] appears. Press [OK] for two seconds to confirm.

The machine will restart.

# **Before Using Network Security Features**

Your machine employs some of the latest network security and encryption protocols available today. These network features can be integrated into your overall network security plan to help protect your data and prevent unauthorized access to the machine.

We recommend disabling the Telnet, FTP server, and TFTP protocols. Accessing the machine using these protocols is not secure.

# **Configure Certificates for Device Security**

You must configure a certificate to manage your networked machine securely using SSL/TLS. You must use Web Based Management to configure a certificate.

- Supported Security Certificate Features
- How to Create and Install a Certificate
- Create a Self-signed Certificate
- Create a Certificate Signing Request (CSR) and Install a Certificate from a Certificate Authority (CA)
- Import and Export the Certificate and Private Key
- Import and Export a CA Certificate
- Manage Multiple Certificates

Home > Security > Configure Certificates for Device Security > Supported Security Certificate Features

## **Supported Security Certificate Features**

Your machine supports the use of multiple security certificates, which allows secure management, authentication, and communication with the machine. The following security certificate features can be used with the machine:

- SSL/TLS communication
- SSL communication for SMTP/POP3/IMAP4 (only available for certain models)
- IEEE 802.1x authentication
- IPsec

Your machine supports the following:

Pre-installed certificate

Your machine has a pre-installed self-signed certificate. This certificate enables you to use SSL/TLS communication without creating or installing a different certificate.

The pre-installed self-signed certificate protects your communication up to a certain level. We recommend using a certificate that is issued by a trusted organization for better security.

· Self-signed certificate

This print server issues its own certificate. Using this certificate, you can easily use the SSL/TLS communication without creating or installing a different certificate from a CA.

• Certificate from a Certificate Authority (CA)

There are two methods for installing a certificate from a CA. If you already have a certificate from a CA or if you want to use a certificate from an external trusted CA:

- When using a Certificate Signing Request (CSR) from this print server.
- When importing a certificate and a private key.
- · Certificate Authority (CA) Certificate

To use a CA certificate that identifies the CA and owns its private key, you must import that CA certificate from the CA before configuring the security features of the Network.

- If you are going to use SSL/TLS communication, we recommend contacting your system administrator first.
- When you reset the print server back to its default factory settings, the certificate and the private key
  that are installed will be deleted. If you want to keep the same certificate and the private key after
  resetting the print server, export them before resetting, and then reinstall them.

· Configure Certificates for Device Security

▲ Home > Security > Configure Certificates for Device Security > How to Create and Install a Certificate

## How to Create and Install a Certificate

There are two options when choosing a security certificate: use a self-signed certificate or use a certificate from a Certificate Authority (CA).

## **Option 1**

## Self-Signed Certificate

- 1. Create a self-signed certificate using Web Based Management.
- 2. Install the self-signed certificate on your computer.

## Option 2

## Certificate from a CA

- 1. Create a Certificate Signing Request (CSR) using Web Based Management.
- 2. Install the certificate issued by the CA on your Brother machine using Web Based Management.
- 3. Install the certificate on your computer.

## Related Information

Configure Certificates for Device Security

▲ Home > Security > Configure Certificates for Device Security > Create a Self-signed Certificate

# Create a Self-signed Certificate

- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example: https://SharedPrinter

• If you enable a NetBIOS name, you can also use the node name.

For example: https://brn123456abcdef

- The NetBIOS name can be found in the Network Configuration Report.
- 3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click Network > Security > Certificate.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Click Create Self-Signed Certificate.
- 6. Enter a Common Name and a Valid Date.
  - The length of the Common Name is less than 64 bytes. Enter an identifier, such as an IP address, node name, or domain name to use when accessing this machine through SSL/TLS communication. The node name is displayed by default.
  - A warning will appear if you use the IPPS or HTTPS protocol and enter a different name in the URL than the **Common Name** that was used for the self-signed certificate.
- 7. Select your setting from the Public Key Algorithm drop-down list. The default setting is RSA(2048bit).
- 8. Select your setting from the **Digest Algorithm** drop-down list. The default setting is **SHA256**.
- 9. Click Submit.

Ø

Configure Certificates for Device Security

▲ Home > Security > Configure Certificates for Device Security > Create a Certificate Signing Request (CSR) and Install a Certificate from a Certificate Authority (CA)

# Create a Certificate Signing Request (CSR) and Install a Certificate from a Certificate Authority (CA)

If you already have a certificate from an external trusted Certificate Authority (CA), you can store the certificate and private key on the machine and manage them by importing and exporting. If you do not have a certificate from an external trusted CA, create a Certificate Signing Request (CSR), send it to a CA for authentication, and install the returned certificate on your machine.

- Create a Certificate Signing Request (CSR)
- Install a Certificate on Your Machine

▲ Home > Security > Configure Certificates for Device Security > Create a Certificate Signing Request (CSR) and Install a Certificate from a Certificate Authority (CA) > Create a Certificate Signing Request (CSR)

# Create a Certificate Signing Request (CSR)

A Certificate Signing Request (CSR) is a request sent to a Certificate Authority (CA) to authenticate the credentials contained within the certificate.

We recommend installing a Root Certificate from the CA on your computer before creating the CSR.

- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

 If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example: https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example: https://brn123456abcdef

- The NetBIOS name can be found in the Network Configuration Report.
- 3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click **Network > Security > Certificate**.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Click Create CSR.
- 6. Type a Common Name (required) and add other information about your Organization (optional).
  - Your company details are required so that a CA can confirm your identity and verify it to the outside world.
  - The length of the **Common Name** must be less than 64 bytes. Enter an identifier, such as an IP address, node name, or domain name to use when accessing this machine through SSL/TLS communication. The node name is displayed by default. The **Common Name** is required.
  - A warning will appear if you type a different name in the URL than the Common Name that was used for the certificate.
  - The length of the **Organization**, the **Organization Unit**, the **City/Locality**, and the **State/Province** must be less than 64 bytes.
  - The Country/Region should be a two-character ISO 3166 country code.
  - If you are configuring an X.509v3 certificate extension, select the **Configure extended partition** checkbox, and then select **Auto (Register IPv4)** or **Manual**.
- 7. Select your setting from the Public Key Algorithm drop-down list. The default setting is RSA(2048bit).
- 8. Select your setting from the **Digest Algorithm** drop-down list. The default setting is **SHA256**.
- 9. Click Submit.

The CSR appears on your screen. Save the CSR as a file or copy and paste it into an online CSR form offered by a Certificate Authority.

10. Click Save.

- Follow your CA's policy regarding the method to send a CSR to your CA.
  - If you are using the Enterprise root CA of Windows Server 2012/2012 R2/2016/2019/2022, we
    recommend using the Web Server for the certificate template to securely create the Client Certificate. If
    you are creating a Client Certificate for an IEEE 802.1x environment with EAP-TLS authentication, we
    recommend using User for the certificate template.

## **Related Information**

• Create a Certificate Signing Request (CSR) and Install a Certificate from a Certificate Authority (CA)

▲ Home > Security > Configure Certificates for Device Security > Create a Certificate Signing Request (CSR) and Install a Certificate from a Certificate Authority (CA) > Install a Certificate on Your Machine

## Install a Certificate on Your Machine

When you receive a certificate from a Certificate Authority (CA), follow the steps below to install it on the print server:

Only a certificate issued with your machine's Certificate Signing Request (CSR) can be installed on your machine. When you want to create another CSR, make sure that the certificate is installed before creating the new CSR. Create another CSR only after installing the certificate on the machine, otherwise the CSR created before installing the new CSR will be invalid.

- 1. Start your web browser.
- Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

• If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example: https://SharedPrinter

• If you enable a NetBIOS name, you can also use the node name.

For example: https://brn123456abcdef

- The NetBIOS name can be found in the Network Configuration Report.
- 3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click **Network > Security > Certificate**.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

#### 5. Click Install Certificate.

Ø

6. Browse to the file that contains the certificate issued by the CA, and then click Submit.

The certificate has been created and saved in your machine's memory successfully.

To use SSL/TLS communication, the Root Certificate from the CA must be installed on your computer. Contact your network administrator.

• Create a Certificate Signing Request (CSR) and Install a Certificate from a Certificate Authority (CA)

▲ Home > Security > Configure Certificates for Device Security > Import and Export the Certificate and Private Key

# Import and Export the Certificate and Private Key

Store the certificate and private key on your machine and manage them by importing and exporting them.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click Network > Security > CA Certificate.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Select the certificate you want to export and click Export.
- 6. Click Submit.

Ø

7. Click ▼ next to Save, and then specify the location where you want to save the file.

## Related Information

• Import and Export a CA Certificate

▲ Home > Security > Configure Certificates for Device Security > Manage Multiple Certificates

# Manage Multiple Certificates

The multiple certificate feature allows you to use Web Based Management to manage each certificate installed on your machine. In Web Based Management, navigate to the **Certificate** or **CA Certificate** screen to view certificate content, delete, or export your certificates.

	Maximum Number of Certificates Stored on Brother Machine
Self-signed Certificate or Certificate Issued by a CA	6
CA Certificate	9

We recommend storing fewer certificates than allowed, reserving an empty spot in case of certificate expiration. When a certificate expires, import a new certificate into the reserved spot, and then delete the expired certificate. This ensures that you avoid configuration failure.

- When you use HTTPS/IPPS, IEEE 802.1x, or Signed PDF, you must select which certificate you are using.
- When you use SSL for SMTP/POP3/IMAP4 communications (only available for certain models), you do not have to choose the certificate. The necessary certificate will be chosen automatically.

▲ Home > Security > Use SSL/TLS > Introduction to SSL/TLS

# Introduction to SSL/TLS

Secure Socket Layer (SSL) or Transport Layer Security (TLS) is an effective method of protecting data sent over a local or wide area network (LAN or WAN). It works by encrypting data, such as a print job, sent over a network, so anyone trying to capture it will not be able to read it.

SSL/TLS can be configured on both wired and wireless networks and will work with other forms of security such as WPA keys and firewalls.

- Use SSL/TLS
  - Brief History of SSL/TLS
  - Benefits of Using SSL/TLS

▲ Home > Security > Use SSL/TLS > Introduction to SSL/TLS > Brief History of SSL/TLS

# **Brief History of SSL/TLS**

SSL/TLS was originally created to secure web traffic information, particularly data sent between web browsers and servers. SSL is now used with additional applications, such as Telnet, printer, and FTP software, in order to become a universal solution for online security. Its original design intentions are still being used today by many online retailers and banks to secure sensitive data, such as credit card numbers, customer records, etc.

SSL/TLS uses extremely high levels of encryption and is trusted by banks all over the world.

## Related Information

• Introduction to SSL/TLS

▲ Home > Security > Use SSL/TLS > Introduction to SSL/TLS > Benefits of Using SSL/TLS

# Benefits of Using SSL/TLS

The primary benefit of using SSL/TLS is to guarantee secure printing over an IP network by restricting unauthorized users from reading data sent to the machine. SSL's most important benefit is that it can be used to print confidential data securely. For example, a Human Resource (HR) Department in a large company may be printing wage slips on a regular basis. Without encryption, the data contained on these wages slips can be read by other network users. However, with SSL/TLS, anyone trying to capture the data will see a page of code and not the actual wage slip.

Manage Your Network Machine Securely Using SSL/TLS

▲ Home > Security > Use SSL/TLS > Manage Your Network Machine Securely Using SSL/TLS > Install the Self-signed Certificate for Windows Users as Administrator

# Install the Self-signed Certificate for Windows Users as Administrator

- The following steps are for Microsoft Edge. If you use another web browser, refer to your web browser's
  documentation or online help for instructions on how to install certificates.
- Make sure you have created your self-signed certificate using Web Based Management.
- 1. Right-click the **Microsoft Edge** icon, and then click **Run as administrator**.

If the User Account Control screen appears, click Yes.

 Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

- If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
  - For example: https://SharedPrinter
  - If you enable a NetBIOS name, you can also use the node name.
     For example: https://brn123456abcdef
  - The NetBIOS name can be found in the Network Configuration Report.
- 3. If your connection is not private, click the **Advanced** button, and then continue to the web page.
- 4. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

5. Go to the navigation menu, and then click Network > Security > Certificate.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 6. Click Export.
- 7. To encrypt the output file, type a password in the **Enter password** field. If the **Enter password** field is blank, your output file will not be encrypted.
- 8. Type the password again in the Retype password field, and then click Submit.
- 9. Click the downloaded file to open it.
- 10. When the Certificate Import Wizard appears, click Next.
- 11. Click Next.
- 12. If required, type a password, and then click Next.
- 13. Select Place all certificates in the following store, and then click Browse....
- 14. Select the Trusted Root Certification Authorities, and then click OK.
- 15. Click Next.
- 16. Click Finish.
- 17. Click Yes, if the fingerprint (thumbprint) is correct.
- 18. Click OK.

Manage Your Network Machine Securely Using SSL/TLS

▲ Home > Security > Use SSL/TLS > Print Documents Securely Using SSL/TLS

### Print Documents Securely Using SSL/TLS

- Print Documents Using IPPS
- Configure a Certificate for SSL/TLS and Available Protocols
- Configure Certificates for Device Security

▲ Home > Security > Use SSL/TLS > Print Documents Securely Using SSL/TLS > Print Documents Using IPPS

# **Print Documents Using IPPS**

To print documents securely with IPP protocol, use the IPPS protocol.

- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

Ø

https://192.168.1.2

 If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example: https://SharedPrinter

• If you enable a NetBIOS name, you can also use the node name.

For example: https://brn123456abcdef

- The NetBIOS name can be found in the Network Configuration Report.
- 3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

#### 4. Go to the navigation menu, and then click **Network > Network > Protocol**.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

5. Make sure the IPP checkbox is selected.

If the IPP checkbox is not selected, select the IPP checkbox, and then click Submit.

Restart your machine to activate the configuration.

After the machine restarts, return to the machine's web page, type the password, go to the navigation menu, and then click **Network > Network > Protocol**.

- 6. Click HTTP Server Settings.
- 7. Select the HTTPS checkbox in the IPP area, and then click Submit.
- 8. Restart your machine to activate the configuration.

Communication using IPPS cannot prevent unauthorized access to the print server.

Manage Your Network Machine Securely Using SNMPv3

▲ Home > Security > Use SNMPv3 > Manage Your Network Machine Securely Using SNMPv3

# Manage Your Network Machine Securely Using SNMPv3

The Simple Network Management Protocol version 3 (SNMPv3) provides user authentication and data encryption to manage network devices securely.

- 1. Start your web browser.
- 2. Type "https://Common Name" in your browser's address bar (where "Common Name" is the Common Name that you assigned to the certificate; this could be your IP address, node name, or domain name).
- 3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click **Network > Network > Protocol**.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Make sure the **SNMP** setting is enabled, and then click **Advanced Settings**.
- 6. Configure the SNMP settings.

Ø

Option	Description	
SNMP v1/v2c read-write access	The print server uses version 1 and version 2c of the SNMP protocol. You can use all of your machine's applications in this mode. However, it is not secure since it will not authenticate the user and data will not be encrypted.	
SNMPv3 read- write access and v1/v2c read-	The print server uses the read-write access of version 3 and the read-only access of version 1 and version 2c of the SNMP protocol.	
<b>access</b> mode, some of your machine's applications that a server do not work correctly since they authorize the read	When you use the <b>SNMPv3 read-write access and v1/v2c read-only</b> <b>access</b> mode, some of your machine's applications that access the print server do not work correctly since they authorize the read-only access of version 1 and version 2c. If you want to use all applications, we recommend using the <b>SNMP v1/v2c read-write access</b> mode.	
SNMPv3 read- write access	The print server uses version 3 of the SNMP protocol. If you want to manage the print server securely, use this mode.	
	When you use the <b>SNMPv3 read-write access</b> mode, note the following:	
	Except for BRAdmin Professional, all applications that use SNMPv1/v2c will be restricted. To allow the use of SNMPv1/v2c applications, use the <b>SNMPv3</b> read-write access and v1/v2c read-only access or <b>SNMP v1/v2c read-write access</b> mode.	

#### 7. Click Submit.

If your machine displays the protocol setting options, select the options you want.

8. Restart your machine to activate the configuration.

Use SNMPv3

Home > Security > Use IPsec > Introduction to IPsec

# Introduction to IPsec

IPsec (Internet Protocol Security) is a security protocol that uses an optional Internet Protocol function to prevent data manipulation and ensure the confidentiality of data transmitted as IP packets. IPsec encrypts data carried over a network, such as print data sent from computers to a printer. Because the data is encrypted at the network layer, applications that employ a higher-level protocol use IPsec even if the user is not aware of its use.

IPsec supports the following functions:

IPsec transmissions

According to the IPsec setting conditions, a network-connected computer sends data to and receives data from a specified device using IPsec. When devices start communicating using IPsec, keys are exchanged using Internet Key Exchange (IKE) first, and then the encrypted data is transmitted using the keys.

In addition, IPsec has two operation modes: the Transport mode and Tunnel mode. The Transport mode is used mainly for communication between devices and the Tunnel mode is used in environments such as a Virtual Private Network (VPN).

<sup>\*</sup> For IPsec transmissions, the following conditions are necessary:

- A computer that can communicate using IPsec is connected to the network.
- Your machine is configured for IPsec communication.
- The computer connected to your machine is configured for IPsec connections.
- IPsec settings

The settings that are necessary for connections using IPsec. These settings can be configured using Web Based Management.

To configure the IPsec settings, you must use the browser on a computer that is connected to the network.

#### **Related Information**

• Use IPsec

▲ Home > Security > Use IPsec > Configure IPsec Using Web Based Management

### **Configure IPsec Using Web Based Management**

The IPsec connection conditions comprise two **Template** types: **Address** and **IPsec**. You can configure up to 10 connection conditions.

- 1. Start your web browser.
- Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click **Network > Security > IPsec**.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

5. Configure the settings.

Option	Description
Status	Enable or disable IPsec.
Negotiation Mode	Select <b>Negotiation Mode</b> for IKE Phase 1. IKE is a protocol that is used to exchange encryption keys in order to carry out encrypted communication using IPsec.
	In the <b>Main</b> mode, the processing speed is slow, but the security is high. In the <b>Aggressive</b> mode, the processing speed is faster than in the <b>Main</b> mode, but the security is lower.
All Non-IPsec Traffic	Select the action to be taken for non-IPsec packets.
	When using Web Services, you must select <b>Allow</b> for <b>All Non-IPsec</b> <b>Traffic</b> . If you select <b>Drop</b> , Web Services cannot be used.
Broadcast/Multicast Bypass	Select Enabled or Disabled.
Protocol Bypass	Select the checkboxes for the option or options you want.
Rules	Select the <b>Enabled</b> checkbox to activate the template. When you select multiple checkboxes, the lower numbered checkboxes have priority if the settings for the selected checkboxes conflict.
	Click the corresponding drop-down list to select the <b>Address</b> <b>Template</b> that is used for the IPsec connection conditions. To add an <b>Address Template</b> , click <b>Add Template</b> .
	Click the corresponding drop-down list to select the <b>IPsec Template</b> that is used for the IPsec connection conditions. To add an <b>IPsec Template</b> , click <b>Add Template</b> .

#### 6. Click Submit.

If the machine must be restarted to activate the new settings, the restart confirmation screen will appear.

If there is a blank item in the template you enabled in the **Rules** table, an error message appears. Confirm your choices and click **Submit** again.

### Related Information

### Configure an IPsec Address Template Using Web Based Management

- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

Ø

Ø

https://192.168.1.2

3. If required, type the password in the **Login** field, and then click **Login**.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click **Network > Security > IPsec Address Template**.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Click the **Delete** button to delete an **Address Template**. When an **Address Template** is in use, it cannot be deleted.
- 6. Click the Address Template that you want to create. The IPsec Address Template appears.
- 7. Configure the settings.

Option	Description
Template Name	Type a name for the template (up to 16 characters).
Local IP Address	IP Address
	Specify the IP address. Select ALL IPv4 Address, ALL IPv6 Address, ALL Link Local IPv6, or Custom from the drop-down list.
	If you select <b>Custom</b> from the drop-down list, type the IP address (IPv4 or IPv6) in the text box.
	IP Address Range
	Type the starting and ending IP addresses for the IP address range in the text boxes. If the starting and ending IP addresses are not standardized to IPv4 or IPv6, or the ending IP address is smaller than the starting address, an error will occur.
	IP Address / Prefix
	Specify the IP address using CIDR notation.
	For example: 192.168.1.1/24
	Because the prefix is specified in the form of a 24-bit subnet mask (255.255.255.0) for 192.168.1.1, the addresses 192.168.1.### are valid.
Remote IP Address	• Any
	If you select Any, all IP addresses are enabled.
	IP Address
	Type the specified IP address (IPv4 or IPv6) in the text box.
	IP Address Range
	Type the first and last IP addresses for the IP address range. If the first and last IP addresses are not standardized to IPv4 or IPv6, or the last IP address is smaller than the first address, an error will occur.
	IP Address / Prefix
	Specify the IP address using CIDR notation.
	For example: 192.168.1.1/24

Option	Description
	Because the prefix is specified in the form of a 24-bit subnet mask (255.255.255.0) for 192.168.1.1, the addresses 192.168.1.### are valid.

### 8. Click Submit.

Ø

When you change the settings for the template currently in use, restart your machine to activate the configuration.

• Use IPsec

Home > Security > Use IPsec > Configure an IPsec Template Using Web Based Management

### **Configure an IPsec Template Using Web Based Management**

- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

Ø

Ø

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click **Network > Security > IPsec Template**.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Click the **Delete** button to delete an **IPsec Template**. When an **IPsec Template** is in use, it cannot be deleted.
- 6. Click the **IPsec Template** that you want to create. The **IPsec Template** screen appears. The configuration fields differ based on the **Use Prefixed Template** and **Internet Key Exchange (IKE)** settings you select.
- 7. In the Template Name field, type a name for the template (up to 16 characters).
- 8. If you selected **Custom** in the **Use Prefixed Template** drop-down list, select the **Internet Key Exchange** (**IKE**) options, and then change the settings if needed.
- 9. Click Submit.

# IKEv1 Settings for an IPsec Template

Option	Description
Template Name	Type a name for the template (up to 16 characters).
Use Prefixed Template	Select <b>Custom</b> , <b>IKEv1 High Security</b> or <b>IKEv1 Medium Security</b> . The setting items are different depending on the selected template.
Internet Key Exchange (IKE)	IKE is a communication protocol that is used to exchange encryption keys in order to carry out encrypted communication using IPsec. To carry out encrypted communication for that time only, the encryption algorithm that is necessary for IPsec is determined and the encryption keys are shared. For IKE, the encryption keys are exchanged using the Diffie-Hellman key exchange method, and encrypted communication that is limited to IKE is carried out.
	If you selected <b>Custom</b> in <b>Use Prefixed Template</b> , select <b>IKEv1</b> .
Authentication Type	• Diffie-Hellman Group This key exchange method allows secret keys to be securely exchanged over an unprotected network. The Diffie-Hellman key exchange method uses a discrete logarithm problem, not the secret key, to send and receive open information that was generated using a random number and the secret key.
	Select Group1, Group2, Group5, or Group14.
	Encryption
	Select DES, 3DES, AES-CBC 128, or AES-CBC 256.
	• Hash
	Select MD5, SHA1, SHA256, SHA384 or SHA512.
	SA Lifetime
	Specify the IKE SA lifetime.
	Type the time (seconds) and number of kilobytes (KByte).
Encapsulating Security	Protocol     Select ESP, AH, or AH+ESP.
	<ul> <li>ESP is a protocol for carrying out encrypted communication using IPsec. ESP encrypts the payload (communicated contents) and adds additional information. The IP packet comprises the header and the encrypted payload, which follows the header. In addition to the encrypted data, the IP packet also includes information regarding the encryption method and encryption key, the authentication data, and so on.</li> </ul>
	- AH is part of the IPsec protocol that authenticates the sender and prevents manipulation (ensures the completeness) of the data. In the IP packet, the data is inserted immediately after the header. In addition, the packets include hash values, which are calculated using an equation from the communicated contents, secret key, and so on, in order to prevent the falsification of the sender and manipulation of the data. Unlike ESP, the communicated contents are not encrypted, and the data is sent and received as plain text.
	Encryption (Not available for the AH option.)
	Select DES, 3DES, AES-CBC 128, or AES-CBC 256.
	• Hash
	Select None, MD5, SHA1, SHA256, SHA384, or SHA512.
	None can be selected only when ESP is selected in Protocol.

Option	Description
	SA Lifetime
	Specify the IKE SA lifetime.
	Type the time (seconds) and number of kilobytes (KByte).
	Encapsulation Mode
	Select Transport or Tunnel.
	Remote Router IP-Address
	Type the IP address (IPv4 or IPv6) of the remote router. Enter this information only when the <b>Tunnel</b> mode is selected.
	SA (Security Association) is an encrypted communication method using IPsec or IPv6 that exchanges and shares information, such as the encryption method and encryption key, in order to establish a secure communication channel before communication begins. SA may also refer to a virtual encrypted communication channel that has been established. The SA used for IPsec establishes the encryption method, exchanges the keys, and carries out mutual authentication according to the IKE (Internet Key Exchange) standard procedure. In addition, the SA is updated periodically.
Perfect Forward Secrecy (PFS)	PFS does not derive keys from previous keys that were used to encrypt messages. In addition, if a key that is used to encrypt a message was derived from a parent key, that parent key is not used to derive other keys. Therefore, even if a key is compromised, the damage will be limited only to the messages that were encrypted using that key.
	Select Enabled or Disabled.
Authentication Method	Select the authentication method. Select <b>Pre-Shared Key</b> or <b>Certificates</b> .
Pre-Shared Key	When encrypting communication, the encryption key is exchanged and shared beforehand using another channel.
	If you selected <b>Pre-Shared Key</b> for the <b>Authentication Method</b> , type the <b>Pre-Shared Key</b> (up to 32 characters).
	Local/ID Type/ID
	Select the sender's ID type, and then type the ID.
	Select IPv4 Address, IPv6 Address, FQDN, E-mail Address, or Certificate for the type.
	If you select <b>Certificate</b> , type the common name of the certificate in the <b>ID</b> field.
	Remote/ID Type/ID
	Select the recipient's ID type, and then type the ID.
	Select IPv4 Address, IPv6 Address, FQDN, E-mail Address, or Certificate for the type.
	If you select <b>Certificate</b> , type the common name of the certificate in the <b>ID</b> field.
Certificate	If you selected <b>Certificates</b> for <b>Authentication Method</b> , select the certificate.
	You can select only the certificates that were created using the <b>Certificate</b> page of Web Based Management's Security configuration screen.

# Related Information

Configure an IPsec Template Using Web Based Management

▲ Home > Security > Use IPsec > Configure an IPsec Template Using Web Based Management > Manual Settings for an IPsec Template

# Manual Settings for an IPsec Template

Option	Description
Template Name	Type a name for the template (up to 16 characters).
Use Prefixed Template	Select Custom.
Internet Key Exchange (IKE)	IKE is a communication protocol that is used to exchange encryption keys in order to carry out encrypted communication using IPsec. To carry out encrypted communication for that time only, the encryption algorithm that is necessary for IPsec is determined and the encryption keys are shared. For IKE, the encryption keys are exchanged using the Diffie-Hellman key exchange method, and encrypted communication that is limited to IKE is carried out. Select <b>Manual</b> .
Authentication Key (ESP, AH)	Type the <b>In/Out</b> values.
	These settings are necessary when <b>Custom</b> is selected for <b>Use</b> <b>Prefixed Template</b> , <b>Manual</b> is selected for <b>Internet Key Exchange</b> (IKE), and a setting other than <b>None</b> is selected for <b>Hash</b> for <b>Encapsulating Security</b> section.
	The number of characters you can set differs depending on the setting you chose for <b>Hash</b> in the <b>Encapsulating Security</b> section.
	If the length of the specified authentication key is different than the selected hash algorithm, an error will occur.
	• <b>MD5</b> : 128 bits (16 bytes)
	• <b>SHA1</b> : 160 bits (20 bytes)
	• <b>SHA256</b> : 256 bits (32 bytes)
	• SHA384: 384 bits (48 bytes)
	• SHA512: 512 bits (64 bytes)
	When you specify the key in ASCII Code, enclose the characters in double quotation marks (").
Code key (ESP)	Type the <b>In/Out</b> values.
	These settings are necessary when <b>Custom</b> is selected in <b>Use</b> <b>Prefixed Template</b> , <b>Manual</b> is selected in <b>Internet Key Exchange</b> (IKE), and ESP is selected in <b>Protocol</b> in <b>Encapsulating Security</b> .
	The number of characters you can set differs depending on the setting you chose for <b>Encryption</b> in the <b>Encapsulating Security</b> section.
	If the length of the specified code key is different than the selected encryption algorithm, an error will occur.
	• <b>DES</b> : 64 bits (8 bytes)
	• <b>3DES</b> : 192 bits (24 bytes)
	• AES-CBC 128: 128 bits (16 bytes)
	• AES-CBC 256: 256 bits (32 bytes)
	When you specify the key in ASCII Code, enclose the characters in double quotation marks (").
SPI	These parameters are used to identify security information. Generally, a host has multiple Security Associations (SAs) for several types of IPsec communication. Therefore, it is necessary to identify the applicable SA when an IPsec packet is received. The SPI parameter, which identifies the SA, is included in the Authentication Header (AH) and Encapsulating Security Payload (ESP) header.

Option	Description
	These settings are necessary when <b>Custom</b> is selected for <b>Use</b> <b>Prefixed Template</b> , and <b>Manual</b> is selected for <b>Internet Key</b> <b>Exchange (IKE)</b> .
	Enter the In/Out values. (3-10 characters)
Encapsulating Security	Protocol     Select ESP or AH.     ESP is a protocol for carrying out encrypted communication     using IPsec. ESP encrypts the payload (communicated     communicated
	contents) and adds additional information. The IP packet comprises the header and the encrypted payload, which follows the header. In addition to the encrypted data, the IP packet also includes information regarding the encryption method and encryption key, the authentication data, and so on.
	- AH is part of the IPsec protocol that authenticates the sender and prevents manipulation of the data (ensures the completeness of the data). In the IP packet, the data is inserted immediately after the header. In addition, the packets include hash values, which are calculated using an equation from the communicated contents, secret key, and so on, in order to prevent the falsification of the sender and manipulation of the data. Unlike ESP, the communicated contents are not encrypted, and the data is sent and received as plain text.
	Encryption (Not available for the AH option.)
	Select DES, 3DES, AES-CBC 128, or AES-CBC 256.
	• Hash
	Select None, MD5, SHA1, SHA256, SHA384, or SHA512.
	<b>None</b> can be selected only when <b>ESP</b> is selected in <b>Protocol</b> .
	SA Lifetime
	Specify the IKE SA lifetime.
	Type the time (seconds) and number of kilobytes (KByte).
	Encapsulation Mode
	Select Transport or Tunnel.  • Remote Router IP-Address
	Type the IP address (IPv4 or IPv6) of the remote router. Enter this information only when the <b>Tunnel</b> mode is selected.
	SA (Security Association) is an encrypted communication method using IPsec or IPv6 that exchanges and shares information, such as the encryption method and encryption key, in order to establish a secure communication channel before communication begins. SA may also refer to a virtual encrypted communication channel that has been established. The SA used for IPsec establishes the encryption method, exchanges the keys, and carries out mutual authentication according to the IKE (Internet Key Exchange) standard procedure. In addition, the SA is updated periodically.

▲ Home > Security > Use IEEE 802.1x Authentication for a Wired or a Wireless Network

### **Use IEEE 802.1x Authentication for a Wired or a Wireless Network**

- What Is IEEE 802.1x Authentication?
- Configure IEEE 802.1x Authentication for a Wired or Wireless Network Using Web Based Management (Web Browser)
- IEEE 802.1x Authentication Methods

▲ Home > Security > Use IEEE 802.1x Authentication for a Wired or a Wireless Network > What Is IEEE 802.1x Authentication?

# What Is IEEE 802.1x Authentication?

IEEE 802.1x is an IEEE standard that limits access from unauthorized network devices. Your Brother machine sends an authentication request to a RADIUS server (Authentication server) through your access point or hub. After your request has been verified by the RADIUS server, your machine can access the network.

### Related Information

• Use IEEE 802.1x Authentication for a Wired or a Wireless Network

▲ Home > Security > Use IEEE 802.1x Authentication for a Wired or a Wireless Network > Configure IEEE 802.1x Authentication for a Wired or Wireless Network Using Web Based Management (Web Browser)

# Configure IEEE 802.1x Authentication for a Wired or Wireless Network Using Web Based Management (Web Browser)

- If you configure your machine using EAP-TLS authentication, you must install the client certificate issued by a CA before you start configuration. Contact your network administrator about the client certificate. If you have installed more than one certificate, we recommend writing down the certificate name you want to use.
- Before you verify the server certificate, you must import the CA certificate issued by the CA that signed the server certificate. Contact your network administrator or your Internet Service Provider (ISP) to confirm whether a CA certificate import is necessary.

You can also configure IEEE 802.1x authentication using the Wireless Setup Wizard from the control panel (Wireless network).

- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

• If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example: https://SharedPrinter

- If you enable a NetBIOS name, you can also use the node name.
   For example: https://brn123456abcdef
- The NetBIOS name can be found in the Network Configuration Report.
- 3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click Network.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Do one of the following:
  - For the wired network
    - Click Wired > Wired 802.1x Authentication.
  - For the wireless network

Click Wireless > Wireless (Enterprise).

- 6. Configure the IEEE 802.1x authentication settings.
  - To enable IEEE 802.1x authentication for wired networks, select **Enabled** for **Wired 802.1x status** on the **Wired 802.1x Authentication** page.
    - If you are using **EAP-TLS** authentication, you must select the client certificate installed (shown with certificate name) for verification from the **Client Certificate** drop-down list.
    - If you select **EAP-FAST**, **PEAP**, **EAP-TTLS**, or **EAP-TLS** authentication, select the verification method from the **Server Certificate Verification** drop-down list. Verify the server certificate using the CA certificate, imported to the machine in advance, issued by the CA that signed the server certificate.

Select one of the following verification methods from the Server Certificate Verification drop-down list:

Option	Description
No Verification	The server certificate can always be trusted. The verification is not performed.
CA Cert.	The verification method to check the CA reliability of the server certificate, using the CA certificate issued by the CA that signed the server certificate.
CA Cert. + ServerID	The verification method to check the common name 1 value of the server certificate, in addition to the CA reliability of the server certificate.

#### 7. When finished with configuration, click Submit.

For wired networks: After configuring, connect your machine to the IEEE 802.1x supported network. After a few minutes, print the Network Configuration Report to check the **<Wired IEEE 802.1x**> status.

Description
The wired IEEE 802.1x function is enabled and the authentication was successful.
The wired IEEE 802.1x function is enabled; however, the authentication failed.
The wired IEEE 802.1x function is not available.

### IEEE 802.1x Authentication Methods

#### EAP-FAST

Extensible Authentication Protocol-Flexible Authentication via Secured Tunneling (EAP-FAST) has been developed by Cisco Systems, Inc., which uses a user ID and password for authentication, and symmetric key algorithms to achieve a tunneled authentication process.

Your Brother machine supports the following inner authentication methods:

- EAP-FAST/NONE
- EAP-FAST/MS-CHAPv2
- EAP-FAST/GTC

#### EAP-MD5 (Wired network)

Extensible Authentication Protocol-Message Digest Algorithm 5 (EAP-MD5) uses a user ID and password for challenge-response authentication.

#### PEAP

Protected Extensible Authentication Protocol (PEAP) is a version of EAP method developed by Cisco Systems, Inc., Microsoft Corporation and RSA Security. PEAP creates an encrypted Secure Sockets Layer (SSL)/Transport Layer Security (TLS) tunnel between a client and an authentication server, for sending a user ID and password. PEAP provides mutual authentication between the server and the client.

Your Brother machine supports the following inner authentications:

- PEAP/MS-CHAPv2
- PEAP/GTC

#### EAP-TTLS

Extensible Authentication Protocol-Tunneled Transport Layer Security (EAP-TTLS) has been developed by Funk Software and Certicom. EAP-TTLS creates a similar encrypted SSL tunnel to PEAP, between a client and an authentication server, for sending a user ID and password. EAP-TTLS provides mutual authentication between the server and the client.

Your Brother machine supports the following inner authentications:

- EAP-TTLS/CHAP
- EAP-TTLS/MS-CHAP
- EAP-TTLS/MS-CHAPv2
- EAP-TTLS/PAP

#### EAP-TLS

Extensible Authentication Protocol-Transport Layer Security (EAP-TLS) requires digital certificate authentication both at a client and an authentication server.

- Configure Active Directory Authentication Using Web Based Management
- Log On to Change the Machine Settings Using the Machine's Control Panel (Active Directory Authentication)

▲ Home > Security > Use Active Directory Authentication > Introduction to Active Directory Authentication

## Introduction to Active Directory Authentication

Active Directory Authentication restricts the use of your machine. If Active Directory Authentication is enabled, the machine's control panel will be locked. You cannot change the machine's settings until you enter a User ID and password.

Active Directory Authentication offers the following features:

- · Stores incoming print data
- Stores incoming fax data
- (MFC-EX915DW) Obtains the email address from the Active Directory server based on your User ID, when sending scanned data to an email server.

To use this feature, select the **On** option for the **Get Mail Address** setting and **LDAP + kerberos** authentication method. Your email address will be set as the sender when the machine sends scanned data to an email server, or as the recipient if you want to send the scanned data to your email address.

When Active Directory Authentication is enabled, your machine stores all incoming fax data. After you log on, the machine prints the stored fax data.

You can change the Active Directory Authentication settings using Web Based Management.

### Related Information

Use Active Directory Authentication

▲ Home > Security > Use Active Directory Authentication > Configure Active Directory Authentication Using Web Based Management

# **Configure Active Directory Authentication Using Web Based Management**

Active Directory authentication supports Kerberos authentication and NTLMv2 authentication. You must configure the SNTP protocol (network time server) and DNS server configuration for authentication.

- 1. Start your web browser.
- Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

Ø

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click **Administrator** > **User Restriction Function** or **Restriction Management**.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Select Active Directory Authentication.
- 6. Click Submit.
- 7. Click Active Directory Authentication.
- 8. Configure the following settings:

Option	Description
Storage Fax RX Data	Select this option to store incoming fax data. You can print all incoming fax data after you log on to the machine.
Remember User ID	Select this option to save your User ID.
Active Directory Server Address	Type the IP address or the server name (for example: ad.example.com) of the Active Directory Server.
Active Directory Domain Name	Type the Active Directory domain name.
Protocol & Authentication Method	Select the protocol and authentication method.
SSL/TLS	Select the SSL/TLS option.
LDAP Server Port	Type the port number to connect the Active Directory server via LDAP (available only for <b>LDAP + kerberos</b> or <b>LDAP + NTLMv2</b> authentication method).
LDAP Search Root	Type the LDAP search root (available only for <b>LDAP + kerberos</b> or <b>LDAP + NTLMv2</b> authentication method).
Get Mail Address	Select this option to obtain logged on user's email address from the Active Directory server (available only for <b>LDAP + kerberos</b> or <b>LDAP + NTLMv2</b> authentication method).

Option	Description
Get User's Home Directory	Select this option to obtain your home directory as the Scan to Network destination (available only for LDAP + kerberos or LDAP + NTLMv2 authentication method).

9. Click Submit.

- Register an External Integrated Circuit (IC) Card Reader

▲ Home > Security > Use Secure Function Lock 3.0 > Before Using Secure Function Lock 3.0

## **Before Using Secure Function Lock 3.0**

Use Secure Function Lock to configure passwords, set specific user page limits, and grant access to some or all of the functions listed here.

You can configure and change the following Secure Function Lock 3.0 settings using Web Based Management:

• Print

Print includes print jobs sent via AirPrint, Brother iPrint&Scan, and Brother Mobile Connect.

If you register user login names in advance, the users do not need to enter their passwords when they use the print function.

- Copy
- Scan

Scan includes scan jobs sent via Brother iPrint&Scan and Brother Mobile Connect.

- Send (supported models only)
- Receive (supported models only)
- USB Direct Print (supported models only)
- Scan to USB (supported models only)
- Web Connect (supported models only)
- Apps (supported models only)
- Page Limits
- Page Counters
- Card ID (NFC ID) (supported models only)

If you register user Card IDs in advance, registered users can activate the machine by touching their registered cards to the machine's NFC symbol.

#### Touchscreen LCD models:

When Secure Function Lock is enabled, the machine automatically enters Public Mode and some of the machine's functions become restricted to authorized users only. To access the restricted machine functions,

press  $\mathcal{M}$ , select your user name, and enter your password.

- 1. Start your web browser.
- Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click Administrator > User Restriction Function or Restriction Management.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Select Secure Function Lock.
- 6. Click Submit.

Ø

- 7. Click the Restricted Functions menu.
- 8. In the User List / Restricted Functions field, type a group name or user name.
- 9. In the **Print** and the other columns, select a checkbox to allow, or clear a checkbox to restrict, the function listed.
- 10. To configure the maximum page count, select the **On** checkbox in the **Page Limits** column, and then type the maximum number in the **Max. Pages** field.
- 11. Click Submit.
- 12. Click the User List menu.
- 13. In the User List field, type the user name.
- 14. In the **Password** field, type a password.

 $^\prime$  The number of characters you can set differs depending on your model.

15. (MFC-EX915DW) In the E-mail Address field, type the user's email address (available for certain models).

- 16. To register the user's Card ID, type the card number in the **Card ID (NFC ID)** field (available for certain models).
- 17. Select User List / Restricted Functions from the drop-down list for each user.
- 18. Select Home Screen from the drop-down list for each user.
- 19. Click Submit.

You can also change the user list lockout settings in the Secure Function Lock menu.

# Related Information

• Use Secure Function Lock 3.0

▲ Home > Security > Use Secure Function Lock 3.0 > Scan Using Secure Function Lock 3.0

### Scan Using Secure Function Lock 3.0

### Setting Scan restrictions (for administrators)

Secure Function Lock 3.0 allows an administrator to restrict which users are allowed to scan. When the Scan feature is set to Off for the public user setting, only users who have the **Scan** checkbox selected will be able to scan.

### Using the Scan feature (for restricted users)

• To scan using the machine's control panel:

Restricted users must enter their passwords on the machine's control panel to access Scan mode.

• To scan from a computer:

Restricted users must enter their passwords on the machine's control panel before scanning from their computers. If the password is not entered on the machine's control panel, an error message will appear on the user's computer.

Use Secure Function Lock 3.0

▲ Home > Security > Use Secure Function Lock 3.0 > Configure Public Mode for Secure Function Lock 3.0

# **Configure Public Mode for Secure Function Lock 3.0**

Use the Secure Function Lock screen to set up Public Mode, which limits the functions available to public users. Public users will not need to enter a password to access the features made available through Public Mode settings.

Public Mode includes print jobs sent via Brother iPrint&Scan and Brother Mobile Connect.

- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

Ŵ

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click **Administrator** > **User Restriction Function** or **Restriction Management**.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Select Secure Function Lock.
- 6. Click Submit.

Ø

- 7. Click the **Restricted Functions** menu.
- 8. In the **Public Mode** row, select a checkbox to allow, or clear a checkbox to restrict, the function listed.
- 9. Click Submit.

Use Secure Function Lock 3.0

▲ Home > Security > Send or Receive an Email Securely

## Send or Receive an Email Securely

- Configure Email Sending or Receiving Using Web Based Management
- Send an Email with User Authentication
- Send or Receive an Email Securely Using SSL/TLS

▲ Home > Security > Send or Receive an Email Securely > Configure Email Sending or Receiving Using Web Based Management

# **Configure Email Sending or Receiving Using Web Based Management**

We recommend using Web Based Management to configure secured email sending with user authentication, or email sending and receiving using SSL/TLS.

- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

Ø

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click Network > Network > Protocol.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. In the **POP3/IMAP4/SMTP Client** field, click **Advanced Settings** and make sure the status of **POP3/IMAP4/ SMTP Client** is **Enabled**.
- 6. Configure the POP3/IMAP4/SMTP Client settings.
  - Confirm that the email settings are correct after configuration by sending a test email.
  - If you do not know the POP3/IMAP4/SMTP server settings, contact your network administrator or Internet Service Provider (ISP).
- 7. When finished, click Submit.

The Test Send/Receive E-mail Configuration dialog box appears.

8. Follow the instructions in the dialog box to test the current settings.

### Related Information

· Send or Receive an Email Securely

▲ Home > Security > Send or Receive an Email Securely > Send an Email with User Authentication

# Send an Email with User Authentication

Your machine supports the SMTP-AUTH method to send email via an email server that requires user authentication. This method prevents unauthorized users from accessing the email server.

You can use the SMTP-AUTH method for email notification, email reports and I-Fax.

We recommend using Web Based Management to configure the SMTP authentication.

### **Email Server Settings**

Ø

Ø

You must configure your machine's SMTP authentication method to match the method used by your email server. For details about your email server settings, contact your network administrator or Internet Service Provider (ISP).

To enable SMTP server authentication: in the Web Based Management **POP3/IMAP4/SMTP Client** screen, under **Server Authentication Method**, you must select **SMTP-AUTH**.

· Send or Receive an Email Securely

▲ Home > Security > Send or Receive an Email Securely > Send or Receive an Email Securely Using SSL/TLS

# Send or Receive an Email Securely Using SSL/TLS

Your machine supports SSL/TLS communication methods. To use an email server that is using SSL/TLS communication, you must configure the following settings.

We recommend using Web Based Management to configure SSL/TLS.

## Verify Server Certificate

Under SSL/TLS, if you choose SSL or TLS, the Verify Server Certificate checkbox will be selected automatically.

- Before you verify the server certificate, you must import the CA certificate issued by the CA that signed the server certificate. Contact your network administrator or your Internet Service Provider (ISP) to confirm if importing a CA certificate is necessary.
  - If you do not need to verify the server certificate, clear the Verify Server Certificate checkbox.

## Port Number

If you select **SSL**, or **TLS**, the **Port** value will be changed to match the protocol. To change the port number manually, type the port number after you select **SSL/TLS** settings.

You must configure your machine's communication method to match the method used by your email server. For details about your email server settings, contact your network administrator or your ISP.

In most cases, the secured webmail services require the following settings:

SMTP	Port	25
	Server Authentication Method	SMTP-AUTH
	SSL/TLS	TLS
POP3	Port	995
	SSL/TLS	SSL
IMAP4	Port	993
	SSL/TLS	SSL

# Store Print Log to Network Overview

The Store Print Log to Network feature allows you to save the print log file from your machine to a network server using the Common Internet File System (CIFS) protocol. You can record the ID, type of print job, job name, user name, date, time and the number of printed pages for every print job. CIFS is a protocol that runs over TCP/IP, allowing computers on a network to share files over an intranet or the Internet.

The following print functions are recorded in the print log:

- Print jobs from your computer
- USB Direct Print (supported models only)
- Copy

Ø

- · Received Fax (supported models only)
- Web Connect Print (supported models only)
  - The Store Print Log to Network feature supports Kerberos authentication and NTLMv2 authentication. You must configure the SNTP protocol (network time server), or you must set the date, time and time zone correctly on the control panel for authentication.
    - · You can set the file type to TXT or CSV when storing a file to the server.

▲ Home > Security > Store Print Log to Network > Configure the Store Print Log to Network Settings Using Web Based Management

# Configure the Store Print Log to Network Settings Using Web Based Management

- 1. Start your web browser.
- Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

Ø

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click Administrator > Store Print Log to Network.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

#### 5. In the Print Log field, click On.

6. Configure the following settings:

Option	Description	
Network Folder Path	Type the destination folder where your print log will be stored on the CIFS server (for example: \\ComputerName\SharedFolder).	
File Name	Type the file name you want to use for the print log (up to 32 characters).	
File Type	Select the <b>TXT</b> or <b>CSV</b> option for the print log file type.	
Time Source for Log	Select the time source for the print log.	
Auth. Method	Select the authentication method required for access to the CIFS server: <b>Auto</b> , <b>Kerberos</b> , or <b>NTLMv2</b> . Kerberos is an authentication protocol which allows devices or individuals to securely prove their identity to network servers using a single sign-on. NTLMv2 is the authentication method used by Windows to log into servers.	
	• Auto: If you select Auto, NTLMv2 will be used to the authentication method.	
	Kerberos: Select the Kerberos option to use Kerberos authentication only.	
	<ul> <li>NTLMv2: Select the NTLMv2 option to use NTLMv2 authentication only.</li> </ul>	
	<ul> <li>For the Kerberos and NTLMv2 authentication, you must also configure the Date&amp;Time settings or the SNTP protocol (network time server) and DNS server.</li> <li>You can also configure the Date &amp; Time settings from the machine's control panel.</li> </ul>	
Username	Type the user name for the authentication (up to 96 characters).	
	If the user name is part of a domain, enter the user name in one of the following styles: user@domain or domain\user.	
Password	Type the password for the authentication (up to 32 characters).	

Option	Description
Kerberos Server Address (if needed)	Type the Key Distribution Center (KDC) host address (for example: kerberos.example.com; up to 64 characters) or the IP address (for example: 192.168.56.189).
Error Detection Setting	Choose what action should be taken when the print log cannot be stored to the server due to a network error.

7. In the Connection Status field, confirm the last log status.

You can also confirm the error status on the LCD of your machine.

8. Click **Submit** to display the **Test Print Log to Network** page.

To test your settings, click  $\ensuremath{\text{Yes}}$  and then go to the next step.

To skip the test, click No. Your settings will be submitted automatically.

9. The machine will test your settings.

Ø

10. If your settings are accepted, **Test OK** appears on the screen.

If Test Error appears, check all settings, and then click Submit to display the Test page again.

## Use the Store Print Log to Network's Error Detection Setting

Use Error Detection Settings to determine the action that is taken when the print log cannot be stored to the server due to a network error.

- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

Ø

https://192.168.1.2

3. If required, type the password in the Login field, and then click Login.

<sup>\*</sup> The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click Administrator > Store Print Log to Network.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

5. In the Error Detection Setting section, select the Cancel Print or Ignore Log & Print option.

Option	Description
Cancel Print	If you select the <b>Cancel Print</b> option, the print jobs are canceled when the print log cannot be stored to the server.

Even if you select the Cancel Print option, your machine will print a received fax. (For MFC models)

IgnoreIf you select the Ignore Log & Print option, the machine prints the documentation even if the<br/>print log cannot be stored to the server.PrintWhen the Store Print Log function has recovered, the print log is recorded as follows:

Id, Type, Job Name, User Name, Date, Time, Print Pages 1, Print(xxxxxx), "Document01.doc", "user01", 03/03/20xx, 14:01:32, 52 2, Print(xxxxxx), "Document02.doc", "user01", 03/03/20xx, 14:45:30, ? 3, <ERROR>, ?, ?, ?, ?, ? 4, Print(xxxxxx), "Report01.xls", "user02", 03/03/20xx, 19:30:40, 4

- a. If the print log cannot be stored at the end of printing, the number of printed pages will not be recorded.
- b. If the print log cannot be stored at the beginning and the end of printing, the print log of the job will not be recorded. When the function has recovered, the error is reflected in the print log.

#### 6. Click **Submit** to display the **Test Print Log to Network** page.

To test your settings, click Yes and then go to the next step.

To skip the test, click No. Your settings will be submitted automatically.

- 7. The machine will test your settings.
- 8. If your settings are accepted, **Test OK** appears on the screen.

If Test Error appears, check all settings, and then click Submit to display the Test page again.

• Store Print Log to Network

▲ Home > Security > Store Print Log to Network > Use Store Print Log to Network with Secure Function Lock 3.0

## Use Store Print Log to Network with Secure Function Lock 3.0

When Secure Function Lock 3.0 is active, the names of the registered users for copy, Fax RX (for MFC models), Web Connect Print and USB Direct Print (if available) are recorded in the Store Print Log to Network report. When the Active Directory Authentication is enabled, the user name is recorded in the Store Print Log to Network report:

```
Id, Type, Job Name, User Name, Date, Time, Print Pages
1, Copy, -, -, 04/04/20xx, 09:05:12, 3
2, Fax, -, -, 04/04/20xx, 09:45:30, 5
3, Copy, -, "BOB", 04/04/20xx, 10:20:30, 4
4, Fax, -, "BOB", 04/04/20xx, 10:35:12, 3
5, USB Direct, -, "JOHN", 04/04/20xx, 11:15:43, 6
```

# **Brother Web Connect Overview**

Certain websites provide services that allow users to upload and view images and files on the websites. Your Brother machine can scan images and upload them to these services, and also download and print images that are already uploaded to these services.

1. Printing

Ŵ

- 2. Scanning
- 3. Photos, images, documents, and other files
- 4. Web Service

To use Brother Web Connect, your Brother machine must be connected to a network that has access to the Internet, through either a wired or wireless connection.

For network setups that use a proxy server, the machine must also be configured to use a proxy server. If you are unsure of your network configuration, check with your network administrator.

A proxy server is a computer that serves as an intermediary between computers without a direct Internet connection, and the Internet.

### Create an Account for Each Online Service Before Using Brother Web Connect

To use Brother Web Connect to access an online service, you must have an account with that online service. If you do not already have an account, use a computer to access the service's website and create an account. After creating an account, log on and use the account once with a computer before using the Brother Web Connect feature. Otherwise, you may not be able to access the service using Brother Web Connect.

If you already have an account, there is no need to create an additional account.

When you have created an account with the online service you want to use, apply for Brother Web Connect access.

### Related Information

▲ Home > Mobile/Web Connect > Brother Web Connect > Set Up Brother Web Connect > Apply for Brother Web Connect Access

### Apply for Brother Web Connect Access

To use Brother Web Connect to access online services, you must first apply for Brother Web Connect access using a computer that has the Brother Software installed.

1. Access the Brother Web Connect application website:

Option	Description
Windows	Launch (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click <b>Do More</b> in the left navigation bar, and then click <b>Brother Web Connect</b> .
	You can also access the website directly: Type <u>bwc.brother.com</u> into your web browser's address bar.
Мас	Type <u>bwc.brother.com</u> into your web browser's address bar.

The Brother Web Connect page launches.

- 2. Select the service you want to use.
- 3. Follow the on-screen instructions and apply for access.

When using SharePoint Online, follow the on-screen instructions to register a document library.

When finished, your temporary ID appears.

#### Get connected with Brother Web Connect

#### Finished the registration.

Please enter the following temporary ID on the LCD screen of your machine.

Temporary ID (11 digits)

#### XXX XXXX XXXX

NOTE : The temporary ID will expire in 24 hours.

- 4. Make a note of your temporary ID as you will need it to register accounts to the machine. The temporary ID is valid for 24 hours.
- 5. Close the web browser.

Now that you have a Brother Web Connect access ID, you must register this ID on your machine, and then use your machine to access the web service you want to use.

#### **Related Information**

### **Related Topics:**

▲ Home > Mobile/Web Connect > Brother Web Connect > Set Up Brother Web Connect > Register an Account on Your Brother Machine for Brother Web Connect

### **Register an Account on Your Brother Machine for Brother Web Connect**

You must enter your Brother Web Connect account information and configure your machine so that it can use Brother Web Connect to access the service you want.

- · You must apply for Brother Web Connect access to register an account on your machine.
- · Before you register an account, confirm that the correct date and time are set on the machine.
- 1. Swipe to display the [Web] option.
- 2. Press [Web].
  - If the information regarding the Internet connection appears on the machine's LCD, read the information and press [OK]. If you want to display this information again, press [Yes].
  - Occasionally, updates or announcements about Brother Web Connect's features will appear on the LCD. Read the information, and then press [OK].
- 3. If the information regarding license agreement appears, make your selection and follow the on-screen instructions.
- 4. Select the service with which you want to register.
- 5. Press the service name.
- 6. If information regarding Brother Web Connect appears, press [OK].
- 7. Press [Register/Delete Account].
- 8. Press [Register Account].

The machine will prompt you to enter the temporary ID you received when you applied for Brother Web Connect access.

- 9. Press [OK].
- 10. Enter the temporary ID using the LCD.
- 11. Press [OK].

An error message will appear on the LCD if the information you entered does not match the temporary ID you received when you applied for access, or if the temporary ID has expired. Enter the temporary ID correctly, or apply for access again to receive a new temporary ID.

The machine will prompt you to enter the account name that you want displayed on the LCD.

- 12. Press [OK].
- 13. Enter the name using the LCD.
- 14. Press [OK].
- 15. Do one of the following:
  - To set a PIN for the account, press [Yes]. (A PIN prevents unauthorized access to the account.) Enter a
    four-digit number, and then press [OK].
  - If you do not want to set a PIN, press [No].
- 16. When the account information you entered appears, confirm that it is correct.
- 17. Press [Yes] to register your information as entered.
- 18. Press [OK].

19. Press .

Registration is complete and your machine can now access the service.

### **AirPrint Overview**

AirPrint is a printing solution for Apple operating systems that allows you to wirelessly print photos, email, web pages, and documents from your iPad, iPhone, iPod touch, and Mac computer without the need to install a driver.

AirPrint also lets you send faxes directly from your Mac computer without printing them and lets you scan documents to your Mac computer.

For more information, visit Apple's website.

Use of the Works with Apple badge means that an accessory has been designed to work specifically with the technology identified in the badge and has been certified by the developer to meet Apple performance standards.

### Before Using AirPrint (macOS)

Before printing using macOS, add your machine to the printer list on your Mac computer.

- 1. Select **System Preferences** from the Apple menu.
- 2. Click Printers & Scanners.
- Click the + icon below the Printers pane on the left. The Add Printer screen appears.
- 4. Do one of the following:
  - macOS v12

Select your machine, and then select your model's name from the Use pop-up menu.

• macOS v11

Select your machine, and then select AirPrint from the Use pop-up menu.

5. Click Add Printer.

▲ Home > Mobile/Web Connect > AirPrint > Print Using AirPrint

### **Print Using AirPrint**

- Print from iPad, iPhone, or iPod touch
- Print Using AirPrint (macOS)

▲ Home > Mobile/Web Connect > AirPrint > Print Using AirPrint > Print from iPad, iPhone, or iPod touch

### Print from iPad, iPhone, or iPod touch

The procedure used to print may vary by application. Safari is used in the example below.

- 1. Make sure your machine is turned on.
- 2. Load the paper in the paper tray and change the paper tray settings on your machine.
- 3. Use Safari to open the page that you want to print.

- 5. Tap Print.
- 6. Make sure your machine is selected.
- 7. If a different machine (or no machine) is selected, tap Printer.

A list of available machines appears.

- 8. Tap your machine's name in the list.
- 9. Select the options you want, such as the number of pages to print and 2-sided printing (if supported by your machine).
- 10. Tap Print.

Before Using AirPrint (macOS)

Home > Mobile/Web Connect > AirPrint > Scan Using AirPrint (macOS)

### Scan Using AirPrint (macOS)

Before scanning, make sure your machine is in the scanner list on your Mac computer.

- 1. Load your document.
- 2. Select System Preferences from the Apple menu.
- 3. Click Printers & Scanners.
- 4. Select your machine from the scanner list.
- 5. Click the **Scan** tab, and then click the **Open Scanner...** button.

The Scanner screen appears.

- 6. If you place the document in the ADF, select **Use Document Feeder** checkbox, and then select the size of your document from the scan size setting pop-up menu.
- 7. Select the destination folder or destination application from the destination setting pop-up menu.
- 8. Click Show Details to change the scanning settings if needed.

You can crop the image manually by dragging the mouse pointer over the portion you want to scan when scanning from the scanner glass.

9. Click Scan.

### Troubleshooting

Use this section to resolve typical problems you may encounter when using your machine. You can correct most problems yourself.

#### **IMPORTANT**

For technical help, you must call the country where you bought the machine. Calls must be made from within that country.

If you need additional help, visit support.brother.com.

First, check the following:

- The machine's power cord is connected correctly and the machine's power is on. See the Quick Setup Guide.
- All of the protective materials have been removed. See the Quick Setup Guide.
- Paper is loaded correctly in the paper tray.
- The interface cables are securely connected to the machine and the computer, or the wireless connection is set up on both the machine and your computer.
- Error and maintenance messages

If you did not solve the problem with the checks, identify the problem and then see Related Information.

### **Error and Maintenance Messages**

As with any sophisticated office product, errors may occur and supply items may have to be replaced. If this happens, your machine identifies the error or required routine maintenance and shows the appropriate message. The most common error and maintenance messages are shown in the table.

Follow the instructions in the Action column to solve the error and remove the message.

You can correct most errors and perform routine maintenance by yourself. If you need more tips: Visit <u>support.brother.com</u>, and click the **FAQs & Troubleshooting** page.

Error Message	Cause	Action
2-sided Disabled	The back cover of the machine is not closed completely.	Close the back cover of the machine until it locks in the closed position.
	The 2-sided tray is not installed completely.	Install the 2-sided tray firmly in the machine.
Access Denied	The function you want to use is restricted by Secure Function Lock 3.0.	Call your administrator to check your Secure Function Lock Settings.
Cannot Detect	Your machine cannot detect the drum unit.	Remove the toner cartridge and drum unit assembly. Remove the toner cartridge from the
	Your machine cannot detect the	drum unit, and reinstall the toner cartridge back in the drum unit.
	toner cartridge.	Reinstall the toner cartridge and drum unit assembly back in the machine.
Cannot Print ##	The machine has a mechanical	• Press and hold $\textcircled{0}$ to turn off the machine,

Error Message	Cause	Action
Comm.Error	Poor telephone line quality caused a communication error.	Send the fax again or connect the machine to another telephone line. If the problem continues, contact your telephone company and ask them to check the telephone line.
Cooling Down	The temperature of the inside of the machine is too hot. The machine pauses its current print job and goes into Cooling Down mode.	Wait until the machine has finished cooling down. Make sure all vents on the machine are clear of obstructions. When the machine has cooled down, it will resume printing. If the fan is not spinning, disconnect the machine from the power for several minutes, then reconnect it.
Cover is Open	The front cover is not completely closed.	Open and then firmly close the front cover of the machine.
Cover is Open.	The fuser cover is not completely closed or paper was jammed in the back of the machine when you turned on the power.	Close the fuser cover located inside the back cover of the machine. Make sure paper is not jammed inside the back of the machine, and then close the fuser cover.
Cover is Open.	The ADF cover is not completely closed.	Close the ADF cover. If the error message remains, press X.
Disconnected	The other person or other person's fax machine stopped the call.	Try to send or receive again. If calls are stopped repeatedly and you are using a VoIP (Voice over IP) system, try changing the Compatibility to Basic (for VoIP).
Document Jam	The document was not inserted or fed correctly, or the document scanned from the ADF was too long.	Remove the jammed paper from the ADF unit. Clear any debris or scraps of paper from the ADF unit paper path. Press
DR Mode in Use	The machine is set to Distinctive Ring mode. You cannot change the Receive Mode from Manual to another mode.	Set Distinctive Ring to Off.
Drum !	The corona wire on the drum unit must be cleaned.	Clean the corona wire on the drum unit.
	The drum unit or the toner cartridge and drum unit assembly is not installed correctly.	Remove the drum unit, remove the toner cartridge from the drum unit, and put the toner cartridge back into the drum unit. Reinstall the drum unit in the machine.

Error Message	Cause	Action
Drum Error	The drum unit is not installed correctly.	Reinstall the toner cartridge and drum unit assembly.
		If the problem continues, replace the drum unit with a new one.
		See Related Information: Replace the Drum Unit.
Jam 2-sided	The paper is jammed in the 2- sided tray or inside the back cover.	Remove the 2-sided tray and open the back cover to pull out all jammed paper.
Jam Inside	The paper is jammed inside the machine.	Open the front cover, remove the toner cartridge and drum unit assembly, and pull out all jammed paper. Close the front cover.
Jam MP Tray	The paper is jammed in the MP tray.	Remove all jammed paper from in and around the MP tray. Press Retry.
Jam Rear	The paper is jammed in the back of the machine.	Open the fuser cover and remove all jammed paper. Close the fuser cover. If the error message remains, press Retry.
Jam Tray 1	The paper is jammed in the	Pull out the paper tray and remove all jammed

## Document is Jammed under the Document Cover

- 1. Remove any paper from the ADF that is not jammed.
- 2. Lift the document cover.
- 3. Pull the jammed document out to the right. If the document rips or tears, be sure you remove any debris or scraps to prevent future jams.

- 4. Close the document cover.
- 5. Press

▲ Home > Troubleshooting > Document Jams > Remove Small Scraps of Paper Jammed in the ADF

# **Remove Small Scraps of Paper Jammed in the ADF**

- 1. Lift the document cover.
- 2. Insert a piece of stiff paper, such as cardstock, into the ADF to push any small paper scraps through.

- 4. Press X.

▲ Home > Troubleshooting > Paper Jams

## Paper Jams

Always remove the remaining paper from the paper tray, fan and straighten the stack when you are adding new paper. This helps prevent paper jams.

- Clear Paper Jams
- Paper is Jammed in the MP tray
- Paper is Jammed in the Paper Tray
- Paper is Jammed in the Back of the Machine
- · Paper is Jammed inside the Machine
- Paper is Jammed in the 2-sided Tray

▲ Home > Troubleshooting > Paper Jams > Clear Paper Jams

# **Clear Paper Jams**

If paper is jammed or multiple sheets of paper are fed together frequently, do the following:

- Clean the paper pick-up rollers and the separator pad of paper trays. See *Related Information: Clean the Paper Pick-up Rollers*.
- Load paper correctly in the tray. See *Related Information: Load Paper*.
- Set the correct paper size and paper type on your machine. See *Related Information: Paper Settings.*
- Set the correct paper size and paper type on your computer. See Related Information: Print a Document (Windows). See Related Information: Print Using AirPrint.
- Use the recommended paper.
   See Related Information: Using Special Paper.
   See Related Information: Recommended Print Media.

▲ Home > Troubleshooting > Paper Jams > Paper is Jammed in the MP tray

# Paper is Jammed in the MP tray

If the machine's control panel or the Status Monitor indicates that there is a jam in the machine's MP tray, follow these steps:

- 1. Remove the paper from the MP tray.
- 2. Slowly remove any jammed paper from in and around the MP tray.

- 3. Fan the paper stack, and then put it back in the MP tray.
- 4. Reload paper in the MP tray and make sure the paper stays under the maximum paper mark (1) on both sides of the tray.

5. Follow the instructions on the machine's LCD.

• Paper Jams

▲ Home > Troubleshooting > Paper Jams > Paper is Jammed in the Paper Tray

# Paper is Jammed in the Paper Tray

If the machine's control panel or the Status Monitor indicates that there is a jam in the paper tray, follow these steps:

1. Pull the paper tray completely out of the machine.

2. Slowly pull out the jammed paper.

Ŕ

Pulling the jammed paper downward using both hands allows you to remove the paper more easily.

3. Fan the stack of paper to prevent further jams, and slide the paper guides to fit the paper size. Load paper in the paper tray.

4. Make sure the paper is below the maximum paper mark ( $\nabla \nabla$ ).

5. Put the paper tray firmly back into the machine.

▲ Home > Troubleshooting > Paper Jams > Paper is Jammed in the Back of the Machine

# Paper is Jammed in the Back of the Machine

If the machine's control panel or the Status Monitor indicates that there is a jam in the back of the machine (Jam Rear), do the following:

- 1. Leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.
- 2. Open the back cover.

3. Pull the green levers at the left and right sides toward you to release the fuser cover.

# **WARNING**

#### HOT SURFACE

The machine's internal parts will be extremely hot. Wait for the machine to cool down before touching them.

4. Use both hands to gently pull the jammed paper out of the machine.

5. Close the fuser cover.

6. Close the back cover until it locks in the closed position.

▲ Home > Troubleshooting > Paper Jams > Paper is Jammed inside the Machine

# Paper is Jammed inside the Machine

If the machine's control panel or the Status Monitor indicates that there is a jam inside the machine, follow these steps:

- 1. Leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.
- 2. Open the front cover.

3. Remove the toner cartridge and drum unit assembly.

#### HOT SURFACE

The machine's internal parts will be extremely hot. Wait for the machine to cool down before touching them.

4. Pull out the jammed paper slowly.

5. Install the toner cartridge and drum unit assembly into the machine.

6. Close the front cover.

Paper Jams

▲ Home > Troubleshooting > Paper Jams > Paper is Jammed in the 2-sided Tray

# Paper is Jammed in the 2-sided Tray

If the machine's control panel or the Status Monitor indicates that there is a jam in the 2-sided paper tray, follow these steps:

- 1. Leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.
- 2. Pull the paper tray completely out of the machine.

3. At the back of the machine, pull the 2-sided tray completely out of the machine.

4. Pull the jammed paper out of the machine or out of the 2-sided tray.

5. Remove paper that may have jammed under the machine due to static electricity.

6. If paper is not caught inside the 2-sided tray, open the back cover.

7. Pull the green levers at the left and right sides toward you to release the fuser cover.

# 

#### HOT SURFACE

The machine's internal parts will be extremely hot. Wait for the machine to cool down before touching them.

8. Use both hands to gently pull the jammed paper out of the back of the machine.

9. Close the fuser cover.

- 10. Close the back cover until it locks in the closed position.
- 11. Push the 2-sided tray firmly back into the back of the machine.
- 12. Push the paper tray firmly back into the front of the machine.

# **Printing Problems**

If, after reading the information in this table, you still need help, see the latest troubleshooting tips at <u>support.brother.com/faqs</u>.

Difficulties	Suggestions
No printout	Check the machine is not in Power Off mode.
	If the machine is in Power Off mode, press $(\bigcirc)$ , and then
	send the print data again.
	Check that the correct printer driver has been installed and selected.
	Check to see if the Status Monitor or the machine's control panel displays an error.
	Check that the machine is online:
	Windows 11
	Click 📕 > All apps > Windows Tools > Control
	Panel. In the Hardware and Sound group, click View devices and printers. Right-click your model's icon, and click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar and make sure Use Printer Offline is not selected.
	Windows 10, Windows Server 2016, Windows Server 2019, and Windows Server 2022
	Click 🖶 > Windows System > Control Panel. In
	the Hardware and Sound (Hardware) group, click View devices and printers. Right-click your model's name. Click See what's printing. If printer driver options appear, select your printer driver. Click Printer in the menu bar and make sure that Use Printer Offline is not selected.
	Windows Server 2012 R2
	Click <b>Control Panel</b> on the <b>Start</b> screen. In the <b>Hardware</b> group, click <b>View devices and printers</b> . Right-click your model's name. Click <b>See what's</b> <b>printing</b> . If printer driver options appear, select your printer driver. Click <b>Printer</b> in the menu bar and make sure <b>Use Printer Offline</b> is not selected.
	Windows Server 2012
	Move your mouse to the lower right corner of your desktop. When the menu bar appears, click <b>Settings</b> > <b>Control Panel</b> . In the <b>Hardware</b> group, click <b>View</b> <b>devices and printers</b> . Right-click your model's name. Click <b>See what's printing</b> . If printer driver options appear, select your printer driver. Click <b>Printer</b> in the menu bar and make sure that <b>Use Printer Offline</b> is not selected.
The machine is not printing or has stopped printing.	Cancel the print job and clear it from the machine's memory. The printout may be incomplete. Send the print data again. See <i>Related Information:Cancel a Print Job.</i>
The headers or footers appear when the document displays on the screen but they do not show up when printed.	There is an unprintable area on the top and bottom of the page. Adjust the top and bottom margins in your document to allow for this.

Difficulties	Suggestions
The machine prints unexpectedly or it prints garbled text.	Cancel the print job and clear it from the machine's memory. The printout may be incomplete. Send the print data again. See <i>Related Information:Cancel a Print Job.</i>
	Check the settings in your application to make sure they are set up to work with your machine.
	Confirm that the Brother printer driver is selected in your application's Print window.
The machine prints the first couple of pages correctly, then some pages have missing text.	Check the settings in your application to make sure they are set up to work with your machine.
	Your machine is not receiving all of the data sent from the computer. Make sure you connected the interface cable correctly.
The machine does not print on both sides of the paper even though the printer driver setting is 2-sided and the machine supports automatic 2-sided printing.	Check the paper size setting in the printer driver. You must select Letter, Legal, Folio, Mexico Legal, or India Legal paper. Supported paper weight is 16 to 28 lb (60 to 105g/m <sup>2</sup> )
Print speed is too slow.	Reduce the resolution in the printer driver.
	If you have enabled Quiet Mode, disable it in the printer driver or the machine's menu.
	When printing continuously, the printing speed may be automatically reduced to lower the temperature inside the machine.
The machine does not feed paper.	If there is paper in the paper tray, make sure it is straight. If the paper is curled, straighten it. Sometimes it is helpful to remove the paper, turn the stack over and place it back in the paper tray.
	Fan the stack of paper well and place it back to the paper tray.
	Reduce the amount of paper in the paper tray, and then try again.
	(For models with MP Tray) Make sure <b>MP Tray</b> is not selected for <b>Paper Source</b> in the printer driver.
	Clean the paper pick-up rollers.
The machine does not feed paper from the MP tray.	Fan the paper well and place it back in the MP tray.
(For models with MP Tray)	Make sure <b>MP Tray</b> is selected as the <b>Paper Source</b> in the printer driver.
The machine does not feed envelopes.	Load envelopes in the MP tray. Your application must be set to print the envelope size you are using. This is usually done in the Page Setup or Document Setup menu of your application.
Print position is misaligned with the letterhead or preprinted objects.	Adjust the print position using the Print Position setting for each paper tray.

# **Improve the Print Quality**

If you have a print quality problem, print a test page first. If the printout looks good, the problem is probably not the machine. Check the interface cable connections and try printing a different document. If the printout or test page printed from the machine has a quality problem, check the examples of poor print quality and follow the recommendations in the table.

- 1. To get the best print quality, we suggest using recommended print media. Make sure you use paper that meets our specifications.
- 2. Check that the toner cartridge and drum unit are installed correctly.

Examples of poor print quality	Recommendation
	<ul> <li>If the machine displays the Replace Toner status, install a new toner cartridge.</li> </ul>

# **Telephone and Fax Problems**

## **Telephone Line or Connections**

Difficulties	Suggestions
Dialing does not work. (No dial tone)	Check all line cord connections. Make sure the telephone line cord is plugged into the telephone wall jack and the LINE jack of the machine. Make sure your machine has a dial tone by pressing the Hook button in Fax mode. If you subscribe to DSL, VoIP or magicJack services, call your service provider for connection instructions.
	(Available only for some countries.)
	Change the Tone/Pulse setting.
	Send a manual fax by pressing Hook button, and dialing the number. Wait to hear fax- receiving tones before pressing Start button.
	If there is no dial tone, connect a known working telephone and telephone line cord to the jack. Then lift the external telephone's handset and listen for a dial tone. If there is still no dial tone, ask your telephone company to check the line and/or wall jack.
The machine does not	Make sure the machine is in the correct receive mode for your setup.
answer when called.	Check for a dial tone. If possible, call your machine to hear it answer. If there is still no answer, check that the telephone line cord is plugged into the telephone wall jack and the LINE jack of the machine. Make sure your machine has a dial tone by pressing the Hook button in Fax mode. If there is no ringing when you call your machine, ask your telephone company to check the line.

## Handling Incoming Calls

Difficulties	Suggestions
Sending a Fax Call to the machine.	If you answered on an extension telephone, press your Fax Receive Code (the factory setting is *51). If you answered on the external telephone (connected to the EXT. jack), press the Start button to receive the fax. When your machine answers, hang up.
Custom features on a single line.	If you have Call Waiting, Voice Mail, an answering machine, an alarm system or other custom feature on a single telephone line with your machine, it may create a problem sending or receiving faxes.
	<b>For Example:</b> If you subscribe to Call Waiting or some other custom service and its signal comes through the line while your machine is sending or receiving a fax, the signal can temporarily interrupt or disrupt the faxes. Brother's ECM (Error Correction Mode) feature should help overcome this problem. This condition is related to the telephone system industry and is common to all devices that send and receive information on a single, shared line with custom features. If avoiding a slight interruption is crucial to your business, we recommend using a separate telephone line with no custom features.

#### **Receiving Faxes**

Difficulties	Suggestions
Cannot receive a fax.	Check all line cord connections. Make sure the telephone line cord is plugged into the telephone wall jack and the LINE jack of the machine. If you subscribe to DSL, VoIP, or magicJack services, call your service provider for connection instructions. If you are using a VoIP system, try changing the VoIP setting to <i>Basic (for VoIP)</i> . This will lower modem speed and turn off Error Correction Mode (ECM).
	Make sure your machine has a dial tone by pressing the Hook button in Fax mode. If you hear static or interference on your fax line, contact your local telephone provider.

Difficulties	Suggestions
Cannot receive a fax.	Make sure the machine is in the correct Receive Mode. This is determined by the external devices and telephone subscriber services you have on the same line as the Brother machine.
	<ul> <li>If you have a dedicated fax line and want your Brother machine to automatically answer all incoming faxes, you should select Fax Only mode.</li> </ul>
	<ul> <li>If your Brother machine shares a line with an external answering machine, you should select the External TAD mode. In External TAD mode, your Brother machine will receive incoming faxes automatically and voice callers will be able to leave a message on your answering machine.</li> </ul>
	<ul> <li>If your Brother machine shares the line with a Voice Mail subscriber service, see Related Information: Voice Mail.</li> </ul>
	• If your Brother machine is on a line with the Distinctive Ring subscriber service, see <i>Related Information: Distinctive Ring.</i>
	<ul> <li>If your Brother machine shares a line with other telephones and you want it to automatically answer all incoming faxes, you should select the Fax/Tel mode. In Fax/Tel mode, your Brother machine will receive faxes automatically and produce a pseudo/double-ring to alert you to answer voice calls.</li> </ul>
	<ul> <li>If you do not want your Brother machine to answer any incoming faxes automatically, you should select the Manual mode. In Manual mode, you must answer every incoming call and activate the machine to receive faxes.</li> </ul>
	Another device or service at your location may be answering the call before your Brother machine answers. To test this, lower the Ring Delay setting:
	<ul> <li>If the Receive Mode is set to Fax Only or Fax/Tel, reduce the Ring Delay to the minimum value (excluding "0").</li> </ul>
	See Related Information: Set the Number of Rings Before the Machine Answers (Ring Delay).
	<ul> <li>If the Receive Mode is set to External TAD, reduce the number of rings programmed on your answering machine to two.</li> </ul>
	If the Receive Mode is set to Manual, DO NOT adjust the Ring Delay setting.
	Have someone send you a test fax:
	<ul> <li>If you received the test fax successfully, your machine is operating correctly. Remember to rese your Ring Delay or answering machine setting back to your original setting. If receiving problems recur after resetting the Ring Delay, then a person, device, or subscriber service is answering the fax call before the machine has a chance to answer.</li> </ul>
	<ul> <li>If you were not able to receive the fax, then another device or subscriber service may be interfering with your fax reception or there may be a problem with your fax line.</li> </ul>
	If you are using a telephone answering machine (External TAD mode) on the same line as the Brother machine, make sure your answering machine is set up correctly.
	1. Plug the telephone line cord directly from the wall telephone jack to your machine's LINE jack.
	<ol><li>Remove the protective cap from your machine's EXT. jack, and then plug the telephone line cor from your answering machine into the EXT. jack.</li></ol>
	3. Set your answering machine to answer within 4 rings.
	If you are having problems receiving faxes or voice messages, set your answering machine to answer within 2 or 3 rings.
	4. Record the outgoing message on your answering machine.
	<ul> <li>Record five seconds of silence at the beginning of your outgoing message.</li> </ul>
	Limit your speaking to 20 seconds.
	• End your outgoing message with your Fax Receive Code for people sending manual faxes. For example: "After the beep, leave a message or press *51 and Start to send a fax."
	5. Set your answering machine to answer calls.
	6. Set your Brother machine's Receive Mode to External TAD.
	See Related Information: Choose the Correct Receive Mode.
	Make sure your Brother machine's Easy Receive feature is turned On. Easy Receive is a feature that allows you to receive a fax even if you answered the call on an external or extension telephone.
	If you often get transmission errors due to possible interference on the telephone line or if you are using a VoIP system, try changing the Compatibility setting to <i>Basic (for VoIP)</i> .

Difficulties	Suggestions
Cannot receive a fax.	Contact your administrator to check your Secure Function Lock settings.

#### Sending Faxes

Difficulties	Suggestions
Cannot send a fax.	Check all line cord connections. Make sure the telephone line cord is plugged into the telephone wall jack and the LINE jack of the machine. Make sure your machine has a dial tone by pressing the Hook button in Fax mode. If you subscribe to DSL, VoIP, or magicJack services, call your service provider for connection instructions.
	Make sure you pressed Fax and the machine is in Fax mode.
	Print the Transmission Verification Report and check for an error.
	Contact your administrator to check your Secure Function Lock settings.
	Ask the other party to check that the receiving machine has paper.
Poor quality of sent faxes.	Try changing your resolution to Fine or S.Fine. Make a copy to check your machine's scanner operation. If the copy quality is poor, clean the scanner.
Transmission Verification Report says RESULT:NG.	There is probably temporary noise or static on the line. Try sending the fax again. If you are sending a PC-Fax message and get RESULT:NG on the Transmission Verification Report, your machine may be out of memory. To free up extra memory, you can turn off Fax Storage, print fax messages in memory or cancel a delayed fax. If the problem continues, ask the telephone company to check your telephone line.
	If you often get transmission errors due to possible interference on the telephone line or if you are using a VoIP system, try changing the Compatibility setting to Basic (for VoIP).
Sent faxes are blank.	Make sure you are loading the document correctly. When using the ADF, the document should be face up. When using the scanner glass, the document should be face down.
Vertical black lines when sending a fax.	Black vertical lines on faxes you send are typically caused by dirt or correction fluid on the glass strip. Clean the glass strip.

## Printing received faxes

Difficulties	Suggestions
<ul> <li>Condensed print</li> <li>Horizontal streaks</li> <li>Top and bottom sentences are cut off</li> </ul>	This is usually caused by a poor telephone connection. Do a test copy; if your copy looks good, you probably had a bad connection, with static or interference on the telephone line. Ask the other party to send the fax again.
Missing lines	
BCDEFGH bcdefghijk ABCD ibcde 11234	
Vertical black lines when receiving	The corona wire may be dirty.Clean the corona wire in the drum unit.
	The sender's scanner may be dirty. Ask the sender to make a copy to see if the problem is with the sending machine. Try receiving from another fax machine.
Received faxes appear as split or blank pages.	Left and right margins are cut off or a single page is printed on two pages. If the received faxes are divided and printed on two pages or if you get an extra blank page, your paper size setting may not be correct for the paper you are using.
	Turn on Auto Reduction.

▲ Home > Troubleshooting > Telephone and Fax Problems > Set Dial Tone Detection

## **Set Dial Tone Detection**

Setting the Dial Tone to [Detection] shortens the Dial Tone detect pause.

1. Press 🁔 [Settings] > [All Settings] > [Initial Setup] > [Dial Tone].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

2. Press [Detection] or [No Detection].

# 3. Press 📥 .

Telephone and Fax Problems

▲ Home > Troubleshooting > Telephone and Fax Problems > Set Telephone Line Compatibility for Interference and VoIP Systems

# Set Telephone Line Compatibility for Interference and VoIP Systems

Problems sending and receiving faxes due to possible interference on the telephone line may be solved by reducing the modem speed to minimize errors in fax transmission. If you are using a Voice over IP (VoIP) service, we recommend changing the compatibility to Basic (for VoIP).

VoIP is a type of phone system that uses an Internet connection, rather than a traditional phone line.
Telephone providers frequently bundle VoIP together with Internet and cable services.

1. Press 🁔 [Settings] > [All Settings] > [Initial Setup] > [Compatibility].

If your machine displays the [All Settings] menu on the Home screen, skip the [Settings] menu.

- 2. Press the option you want.
  - Select [High] to set the modem speed to 33600 bps.
  - Select [Normal] to set the modem speed to 14400 bps.
  - Select [Basic(for VoIP)] to reduce the modem speed to 9600 bps and turn off Error Correction Mode (ECM). Unless interference is a recurring problem on your telephone line, you may prefer to use this option only when needed.
- 3. Press

## **Error Messages**

The most common error messages are shown in the table.

Error Messages	Cause	Action
The maximum number of devices are already connected using Wi-Fi Direct.	Four mobile devices are already connected to the Wi-Fi Direct network when the Brother machine is the Group Owner.	After the current connection between your Brother machine and another mobile device has shut down, try to configure the Wi-Fi Direct settings again. You can confirm the connection status by printing the Network Configuration Report.
Authentication Error, contact your administrator.	Your authentication setting for the Store Print Log to Network feature is not correct.	<ul> <li>Make sure the Username and Password in Authentication Setting are correct. If the username is part of a domain, enter the username in one of the following styles: user@domain or domain\user.</li> <li>Make sure the time of the log file server matches the time from the SNTP server, or the Date&amp;Time settings.</li> <li>Make sure the SNTP time server settings are configured correctly so the time matches the time used for authentication by Kerberos or NTLMv2. If there is no SNTP server, make sure the Date&amp;Time and Time Zone settings are set correctly using Web Based Management or the control panel so the machine matches the time being used by the server providing the authentication.</li> </ul>
Check User ID and Password.	The Kerberos Authentication error.	Make sure you have entered a correct user name and a password for the Kerberos server. For more information on the Kerberos server settings, contact your network administrator.
	The date, time and time zone settings of the Brother machine are not correct.	Confirm your machine's date, time, and time zone settings.
	The DNS server configuration is not correct.	Contact your network administrator for the information on the DNS server settings.
	The Brother machine cannot connect to the Kerberos server.	Contact your network administrator for the information on the Kerberos server settings.
Connection Error	Other devices are trying to connect to the Wi-Fi Direct network at the same time.	Make sure there are no other devices trying to connect to the Wi-Fi Direct network, and then try to configure the Wi- Fi Direct settings again.
Connection Failed	The Brother machine and your mobile device cannot communicate during the Wi-Fi Direct network configuration.	<ul> <li>Move the mobile device closer to your Brother machine.</li> <li>Move your Brother machine and the mobile device to an obstruction-free area.</li> <li>If you are using the PIN Method of WPS, make sure you have entered the correct PIN.</li> </ul>
File Access Error, contact your administrator.	The Brother machine cannot access the destination folder for the Store Print Log to Network feature.	<ul> <li>Make sure the destination folder name is correct.</li> <li>Make sure the destination folder is write-enabled.</li> <li>Make sure the print log file is not locked. If it is, contact your network administrator.</li> </ul>
	In Web Based Management, you have selected the <b>Cancel</b> <b>Print</b> option in the <b>Error</b> <b>Detection Setting</b> section of the <b>Store Print Log to</b> <b>Network</b> feature.	Wait for about 60 seconds until this message disappears from the LCD.

Error Messages	Cause	Action

Print the Network Configuration Report

Home > Troubleshooting > Network Problems > Use the Network Connection Repair Tool (Windows)

## **Use the Network Connection Repair Tool (Windows)**

Use the Network Connection Repair Tool to fix the Brother machine's network settings. It will assign the correct IP address and Subnet Mask.

Make sure your machine is turned on and is connected to the same network as your computer.

- 1. Launch **Fig** (Brother Utilities), and then click the drop-down list and select your model name (if not already selected).
- 2. Click Tools in the left navigation bar, and then click Network Connection Repair Tool.
- 3. Follow the on-screen instructions.
- 4. Check the diagnosis by printing the Network Configuration Report or the Printer Settings page.

The Network Connection Repair Tool will start automatically if you select the **Enable Connection Repair Tool** option in the Status Monitor. Right-click the Status Monitor screen, and then click **Other Settings** > **Enable Connection Repair Tool**. This is not recommended when your network administrator has set the IP address to Static, since it will automatically change the IP address.

If the correct IP address and the Subnet Mask are still not assigned even after using the Network Connection Repair Tool, ask your network administrator for this information.

• Print the Network Configuration Report

## ▲ Home > Troubleshooting > Network Problems > I Cannot Complete the Wireless Network Setup Configuration

## I Cannot Complete the Wireless Network Setup Configuration

Turn your wireless router off and back on. Then, try to configure the wireless settings again. If you are unable to resolve the problem, follow the instructions below:

Investigate the problem using the WLAN Report.

Cause	Action	Interface
Your security settings (SSID/ Network Key) are not correct.	Confirm the security settings using <b>Wireless Setup Helper</b> (Windows). For more information and to download the utility, go to your model's <b>Downloads</b> page at <u>support.brother.com</u> .	Wireless
	Select and confirm that you are using the correct security settings.	
	- See the instructions supplied with your wireless LAN access point/router for information on how to find the security settings.	
	- The manufacturer's name or model number of the wireless LAN access point/router may be used as the default security settings.	
	- Consult with the access point/router manufacturer, your Internet provider, or network administrator.	
Your Brother machine's MAC address is not allowed.	Confirm that the Brother machine's MAC Address is allowed in the filter. You can find the MAC Address on your Brother machine's control panel.	Wireless
Your wireless LAN access	Enter the correct SSID or Network Key manually.	Wireless
point/router is in Stealth mode (not broadcasting the SSID).	<ul> <li>Check the SSID or the Network Key in the instructions supplied with your wireless LAN access point/router and reconfigure the wireless network setup.</li> </ul>	
Your machine is trying to connect to a 5 GHz Wi-Fi	Change the channel on your wireless LAN access point/router to a channel supported by your machine.	Wireless
network. The current	1. Confirm the channels supported by your machine.	
channel set on your wireless LAN access point/router is not supported.	USA, Canada, Mexico and Caribbean countries: See <i>Related</i> Information: 5 GHz Wi-Fi Network Channels Supported by Your Machine (USA, Canada, Mexico and Caribbean countries only).	
	All other countries: Go to <u>support.brother.com/g/d/a5m6/</u> , select your model, and then click <b>Download</b> for more information.	
	<ol> <li>Check your wireless LAN access point/router's channel setting.</li> <li>Make sure it is set to one of the channels supported by your machine, and not set to "Auto" or "Automatic". For more information about changing the channel setting, see the instructions supplied with your wireless LAN access point/router.</li> </ol>	
	3. Try to connect your machine to your Wi-Fi network again.	
Your security settings (SSID/	Confirm the SSID and password.	Wi-Fi Direct
password) are not correct.	When you are configuring the network manually, the SSID and password are displayed on your Brother machine. If your mobile device supports the manual configuration, the SSID and password will be displayed on your mobile device's screen.	
You are using Android <sup>™</sup> 4.0.	If your mobile device disconnects (approximately six minutes after using Wi-Fi Direct), try the one-push configuration using WPS (recommended) and set the Brother machine as a Group Owner.	Wi-Fi Direct
Your Brother machine is placed too far from your mobile device.	Move your Brother machine within about 3.3 feet (1 meter) of the mobile device when you configure the Wi-Fi Direct network settings.	Wi-Fi Direct
There are some obstructions (walls or furniture, for example) between your	Move your Brother machine to an obstruction-free area.	Wi-Fi Direct

Cause	Action	Interface
machine and the mobile device.		
There is a wireless computer, Bluetooth <sup>®</sup> - supported device, microwave oven, or digital cordless phone near the Brother machine or your mobile device.	Move other devices away from the Brother machine or your mobile device.	Wi-Fi Direct
You have checked and tried all of the above, but your Brother machine still cannot complete the Wi-Fi Direct configuration.	<ul> <li>Turn your Brother machine off and back on. Then, try to configure the Wi-Fi Direct settings again.</li> <li>If you are using your Brother machine as a client, confirm how many devices are allowed on the current Wi-Fi Direct network, and then check how many devices are connected.</li> </ul>	Wi-Fi Direct

#### **For Windows**

If your wireless connection has been interrupted, and you have checked and tried all of the above, we recommend using the Network Connection Repair Tool.

## **Other Problems**

Difficulties	Suggestions
The machine will not turn on.	Adverse conditions on the power connection (such as lightning or a power surge) may have triggered the machine's internal safety mechanisms. Unplug the power cord. Wait for ten minutes, then plug in the power cord
	and press $\textcircled{0}$ to turn on the machine.
	If the problem is not solved, press and hold $\textcircled{(}^{\bigcirc}$ to turn off
	the machine. If you are using a backup battery or surge suppressor device, disconnect it to make sure it is not the problem. Plug the machine's power cord directly into a
	different known working wall outlet and press $(\bigcirc)$ to turn
	on the machine.
The machine cannot print EPS data that includes binary	(Windows)
with the BR-Script3 printer driver.	To print EPS data, do the following:
	1. Windows 11:
	Click > All apps > Windows Tools > Control Panel. In the Hardware and Sound group, click View devices and printers. For Windows 10, Windows Server 2016, Windows Server 2019, and Windows Server 2022:
	Click
	For Windows Server 2012:
	Move your mouse to the lower right corner of your desktop. When the menu bar appears, click <b>Settings</b> > <b>Control Panel</b> . In the <b>Hardware</b> group, click <b>View devices and printers</b> .
	For Windows Server 2012 R2:
	Click <b>Control Panel</b> on the <b>Start</b> screen. In the <b>Hardware</b> group, click <b>View devices and printers</b> .
	<ol> <li>Right-click your model's icon with BR-Script3 in the name, select Printer properties.</li> </ol>
	If your model with <b>BR-Script3</b> in the name does not appear, right-click your model's icon, select <b>Printer properties</b> , and then select your model with <b>BR-Script3</b> in the name.
	3. From the <b>Device Settings</b> tab, choose TBCP (Tagged Binary Communication Protocol) in <b>Output Protocol</b> .
The Brother software cannot be installed.	(Windows)
	If the Security Software warning appears on the computer screen during the installation, change the Security Software settings to permit the Brother product setup program or other program to run.
	<b>(Mac)</b> If you are using a firewall function of anti-spyware or antivirus security software, temporarily disable it and then install the Brother software.

Difficulties	Suggestions
Cannot make a copy.	Make sure you pressed Copy and the machine is in Copy mode.
	Contact your administrator to check your Secure Function Lock settings.
Vertical black line appears in copies.	Black vertical lines on copies are typically caused by dirt or correction fluid on the glass strip, or the corona wire is dirty. Clean the glass strip and scanner glass and the white bar and white plastic above them.
Copies are blank.	Make sure you are loading the document correctly.

## Scanning difficulties

Difficulties	Suggestions
TWAIN or WIA errors appear when starting to scan. (Windows)	Make sure the Brother TWAIN or WIA driver is selected as the primary source in your scanning application. For example, in Nuance <sup>™</sup> PaperPort <sup>™</sup> 14SE, click <b>Desktop</b> > <b>Scan Settings</b> > <b>Select</b> to select the Brother TWAIN/WIA driver.
OCR does not work.	Try increasing the scanning resolution.
Cannot scan.	Contact your administrator to check your Secure Function Lock settings.

## Software difficulties

tions
s) install program again. This program will repair stall the software.

  - Reset Functions Overview

#### **Related Topics:**

• Reset the Network Settings to the Factory Settings

Home > Troubleshooting > Reset Your Machine > Reset Functions Overview

## **Reset Functions Overview**

The following reset functions are available:

<sup>6</sup> Unplug the interface cable before you choose Network Settings Reset function, All Settings Reset function or Factory Reset function.

1. Machine Reset

Reset all the machine's settings that you have changed, such as Date and Time and Ring Delay.

The Address Book, fax reports, and Call history will remain. (For models with facsimile function)

2. Network Settings Reset (For Network Models)

Reset the print server back to its default factory settings (includes Password and IP Address information).

3. Address Book and Fax Settings Reset

This function resets the following settings:

The following settings, with the exception of the Address Book and the Setting Lock password, apply to models with facsimile function.

Address Book

(Addresses and Groups)

- Programmed fax jobs in the memory (Delayed Fax)
- Station ID (name and number)
- Coverpage Message
- Fax receive settings

(Remote Access Code, Fax Storage, Fax Forwarding, and PC-Fax Receive (Windows only))

- Report
  - (Transmission Verification Report / Tel Index List / Fax Journal)
- Setting Lock password (available models only)
- 4. All Settings Reset

Reset all the machine's settings back to the settings that were set at the factory.

All Settings Reset takes less time than Factory Reset.

5. Factory Reset

Use the Settings Reset function to reset all of the machine's settings to the settings originally set at the factory.

Factory Reset takes more time than All Settings Reset.

We strongly recommend you perform this operation when you dispose of the machine.

▲ Home > Routine Maintenance

## **Routine Maintenance**

- Replace Supplies
- Clean the Machine
- Check the Remaining Part Life
- Pack the Machine and the Toner Cartridge Together
- Replace Periodic Maintenance Parts

Home > Routine Maintenance > Replace Supplies

## **Replace Supplies**

You must replace supplies when the machine indicates that the life of the supply is over.

#### **IMPORTANT**

To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.

#### **Toner Cartridge**

## NOTE

- Be sure to seal the used supplies tightly in a bag so that toner powder does not spill out of the cartridge.
- Brother is committed to minimizing the environmental impact due to waste. For more information on recycling options, contact your local recycling office or visit:
  - In USA: <u>www.brother-usa.com/Environment</u>
  - In Canada: <u>www.brother.ca/en/environment</u>
- We recommend placing both the new and the used supplies on a piece of paper to prevent accidentally spilling or scattering the contents.
- Using paper that is not a direct equivalent for a recommended print media may reduce the life of supplies and machine parts.
- The projected life for each of the toner cartridges is based on ISO/IEC 19752. Frequency of replacement will vary depending on the print volume, percentage of coverage, types of media used, and powering on/off the machine.
- Frequency of replacing supplies except toner cartridges will vary depending on the print volume, types of media used, and powering on/off the machine.
- Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.

Both the toner cartridge and the drum unit feature an Integrated Circuit (IC) chip. DO NOT touch these surfaces. Touching the IC chips may cause contamination or damage, and may interfere with the machine's ability to detect these components.

#### **Related Information**

- Routine Maintenance

Error and Maintenance Messages

▲ Home > Routine Maintenance > Replace Supplies > Replace the Toner Cartridge

## **Replace the Toner Cartridge**

- 1. Make sure the machine is turned on.
- 2. Open the front cover.

3. Remove the toner cartridge and drum unit assembly from the machine.

4. Push down the green lock lever and take the toner cartridge out of the drum unit.

5. Unpack the new toner cartridge.

6. Remove the protective cover.

Ø

Ø

7. Hold the toner cartridge by the handle and shake it from left to right several times, as shown. Then push it firmly into the drum unit until it locks into place.

Make sure you put the toner cartridge in correctly or it may separate from the drum unit.

8. Clean the corona wire inside the drum unit by gently sliding the green tab from left to right and right to left several times.

Be sure to return the tab to the Home position ( $\blacktriangle$ ). The arrow on the tab must be aligned with the arrow on the drum unit. If it is not, printed pages may have a vertical stripe.

9. Reinsert the toner cartridge and drum unit assembly back into the machine.

- 10. Close the front cover of the machine.
- After replacing a toner cartridge, DO NOT turn off the machine or open the front cover until the machine's display returns to Ready Mode.
  - The toner cartridge that comes with your Brother machine is a Starter toner cartridge.
  - It is a good idea to keep a new toner cartridge ready for use when you see the Toner Low warning.
  - · DO NOT unpack the new toner cartridge until you are ready to install it.
  - If a toner cartridge is left unpacked for a long time, the toner life will be shortened.
  - We recommend using genuine Brother supplies to ensure stable print quality and performance. Although not all non-genuine supplies may cause quality issues, it is possible that some may adversely affect print quality or cause machine malfunction. Brother may charge for repairing your machine if it is proven that non-genuine supplies caused the damage, even if the machine is still covered by the warranty.

4. Push down the green lock lever and take the toner cartridge out of the drum unit.

5. Unpack the new drum unit.

6. Remove the protective cover.

7. Push the toner cartridge firmly into the new drum unit until it locks into place.

Make sure you put the toner cartridge in correctly or it may separate from the drum unit.

8. Reinsert the toner cartridge and drum unit assembly back into the machine.

9. Close the front cover of the machine.

## NOTE

- Drum wear and tear occurs due to use and rotation of the drum and interaction with paper, toner, and other materials in the paper path. In designing this product, Brother decided to use the number of rotations of the drum as a reasonable determinant of the drum life. When a drum reaches the factoryestablished rotation limit corresponding to the rated page yield, the product's LCD will advise you to replace the drum. The product will continue to function; however, print quality may not be optimal.
- If an unpacked drum unit is placed in direct sunlight (or room light for long periods of time), the unit may be damaged.
- There are many factors that determine the actual drum life, such as the temperature, humidity, type of
  paper, type of toner used and so on. Under ideal conditions, the average drum life is estimated at
  approximately 75,000 pages based on three pages per job and 45,000 pages based on one page per job
  (A4/Letter single-sided pages). The number of pages may be affected by a variety of factors including,
  but not limited to, media type and media size.

Because we have no control over the many factors that determine the actual drum life, we cannot guarantee a minimum number of pages that will be printed by your drum.

• The machine should be used only in a clean, dust-free environment with adequate ventilation.

We recommend using genuine Brother supplies to ensure stable print quality and performance. Although not all non-genuine supplies may cause quality issues, it is possible that some may adversely affect print quality or cause machine malfunction. Brother may charge for repairing your machine if it is proven that non-genuine supplies caused the damage, even if the machine is still covered by the warranty.

## **Clean the Machine**

Clean the outside and inside of the machine regularly with a dry, lint-free cloth.

When you replace the toner cartridge or the drum unit, make sure you clean the inside of the machine. If printed pages are stained with toner, clean the inside of the machine with a dry, lint-free cloth.

## **WARNING**

DO NOT use flammable substances, any type of spray, or an organic solvent/liquid containing alcohol or ammonia to clean the inside or outside of the product. Doing so could cause a fire. Instead, use only a dry, lint-free cloth.

#### IMPORTANT

- DO NOT use isopropyl alcohol to remove dirt from the control panel. It may crack the panel.
- To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations. Toner cartridge

Both the toner cartridge and the drum unit feature an IC chip. DO NOT touch these surfaces. Touching the IC chips may cause contamination or damage, and may interfere with the machine's ability to detect these parts.

## **Clean the Drum Unit**

If your printout has dots or other repeating marks at 3.7 in. (94 mm) intervals, the drum may have foreign material, such as glue from a label, stuck on the drum surface.

- 1. Make sure the machine is in Ready mode.
- 2. Press <sup>1</sup>/<sub>1</sub> [Settings] > [All Settings] > [Print Reports] > [Drum Dot Print].
- 3. Press [Yes].

The machine prints the Drum Dot Check Sheet.

- 4. Press
- 5. Press and hold  $(\bigcirc)$  to turn off the machine.
- 6. Open the front cover.

7. Remove the toner cartridge and drum unit assembly from the machine.

8. Push down the green lock lever and take the toner cartridge out of the drum unit.

9. Turn the drum unit as shown in the illustration. Make sure that the drum unit gear (1) is on the left side.

10. Use the numbered markers next to the drum roller to find the mark on the drum. For example, a dot in column 2 on the check sheet means that there is a mark in drum region "2".

11. Turn the drum unit edge toward you while looking at the drum surface to find the mark.

## IMPORTANT

To avoid print quality problems, DO NOT touch the surface of the drum unit, only the edge.

12. Wipe the drum unit surface gently with a dry cotton swab until the mark or foreign material on the surface comes off.

## NOTE

Ø

DO NOT clean the surface of the photosensitive drum with a sharp object or any liquids.

13. Push the toner cartridge firmly into the drum unit it locks into place.

Make sure you put the toner cartridge in correctly or it may separate from the drum unit.

14. Reinsert the toner cartridge and drum unit assembly back into the machine.

- 15. Close the front cover of the machine.
- 16. Press () to turn on the machine.

Clean the Machine

### Pack the Machine and the Toner Cartridge Together

# **WARNING**

• When you move the machine, carry the machine as shown in the illustration.

• To prevent possible injuries, at least two people should lift the product by holding it at the front and back.

Ø

Ø

- If the machine has Optional Tray(s) installed, remove the Optional Tray(s) BEFORE moving the machine.
   Attempting to move the machine without removing the Optional Tray(s) may cause injury to you or damage to the machine.
- Pack the Optional Tray(s) separately in the original carton with original packing material.

If for any reason you must ship your machine, carefully repack the machine in the original packaging to avoid any damage during transit. The machine should be adequately insured with the carrier.

- 1. Press and hold ( $\bigcirc$ ) to turn off the machine. Leave the machine off for at least 10 minutes to cool down.
- 2. Disconnect all the cables, and then unplug the power cord from the AC power outlet.

Some models are equipped with a non-detachable AC power cord. If your cord is not detachable, fold it loosely and rest it on top of the machine so it packs easily.

3. Put the machine into the bag it originally came in.

4. Pack the machine, the printed materials, and the AC power cord (if applicable) in the original carton with the original packing material as shown. (The original packing material may differ depending on your country or model.) If you are returning your machine to Brother as part of the Exchange Service, pack only the machine.

- 5. Close the carton and tape it shut.
- 6. If you have a Lower Tray, repack it as shown.

Routine Maintenance

▲ Home > Routine Maintenance > Replace Periodic Maintenance Parts

### **Replace Periodic Maintenance Parts**

Replace the following parts regularly to maintain the best print quality. The parts listed below must be replaced after printing approximately 50,000 pages <sup>1</sup> for the Paper Feeding Kits of the MP tray and approximately 200,000 pages <sup>1</sup> for the Paper Feeding Kits of the standard paper tray, the Paper Feeding Kits of the optional paper tray, Fuser Unit, and Laser Unit.

Contact Brother Customer Service or a Brother Authorized Service Center when the following messages appear on the LCD:

LCD Message	Description			
Maintenance	Replace the Fuser Unit.			
Replace Fuser <sup>2</sup>				
Maintenance	Replace the Laser Unit.			
Replace Laser <sup>2</sup>

The Transmission report prints a Transmission Verification Report of your last transmission.

#### Address Book

The Address Book report prints a list of names and numbers stored in the Address Book memory.

#### **Fax Journal**

The Fax Journal prints a list of information about your last 200 incoming and outgoing faxes. (TX means Transmit, RX means Receive.)

#### **User Settings**

The User Settings report prints a list of your current settings.

#### **Printer Settings**

The Printer Settings report prints a list of your current printer settings.

#### Network Configuration (Models with network functionality)

The Network Configuration report prints a list of your current network settings.

#### **Print File List**

The Print File List prints a list of the fonts and print macro/stream setting stored in the machine.

#### **Drum Dot Print**

The Drum Dot Print prints the drum dot sheet, which helps when it is time to clean the drum unit.

#### WLAN Report (Models with wireless network functionality)

The WLAN Report prints the wireless LAN connectivity diagnosis.

		Tray 5 <sup>12</sup>	X Offset	Move the print start position (at the upper left corner of pages) of paper you loaded in the Optional Tray (Tray 5) horizontally from -500 (left) to +500 (right) dots in 300 dpi.
			Y Offset	Move the print start position (at the upper left corner of pages) of paper you loaded in the Optional Tray (Tray 5) vertically from -500 (up) to +500 (down) dots in 300 dpi.
	Skip Tray <sup>1</sup>	-	-	Select a specific tray to skip if you know it is loaded with the wrong size paper.
	Separator Tray 1	-	-	Select the tray that contains the paper used as the separator paper, which is inserted between each print job.
	Paper Low Notice	Paper Low Notice	-	Select whether or not to display a message indicating the paper tray is nearly empty.
	(available for certain models)	Notice Level	-	Select the minimum paper level that will trigger the message.
	Check Paper	-	-	Select whether or not to display a message indicating you must check the paper type and paper size.
Volume	Ring	-	-	Adjust the ring volume.
	Веер	-	-	Adjust the beeper volume.
	Speaker		_	Adjust the speaker volume.

Level 3	Level 4	Level 5	Level 6	Descriptions	
LCD	Backlight	-	-	Adjust the brightness of the LCD backlight.	
Settings	Dim Timer	-	-	Set how long the LCD backlight stays on after returning to the Home screen.	
Notice Settings	Document Alert (available for certain models)	-	-	Select whether to alert you when the document is left on the scanner glass.	
	Scan Result(Skip Blank Page)	-	-	Displays the total scanned pages and skipped pages after scanning is completed.	
Ecology	Eco Mode	-	-	<pre>Turn on the following machine settings at the same time:     2-sided Print: Long Edge<sup>3</sup>     Sleep Time: 0 Min     Dim Timer: 10 Secs     Quiet Mode: On<sup>3</sup></pre>	
				• Toner Save: On 3	
	Toner Save	-	-	Increase the page yield of the toner cartridge.	
	Sleep Time	-	-	Set how much time should pass before the machir enters Power Saving mode.	
	Quiet Mode	-	-	Decrease printing noise.	
	Auto Power Off	-	-	Set the number of hours that the machine will remain in Deep Sleep mode before going into Power Off mode.	
Improve Output	-	-	-	Enable the Reduce Curl feature or the Toner Fixing feature to improve print output.	
Delete	Macro ID	-	-	Delete the registered Macro data.	
Storage	Stream ID	-	-	Delete the registered Stream data.	
	Font ID	-	-	Delete the registered Font data.	
	Delete All	-	-	Restore your machine's Macro/Stream and Font data to the factory settings.	
	Initialize USB Flash Drive (Available only when the USB flash drive is selected in the Job Save Location menu.)	-	-	Initialize the USB flash drive for USB Storage Print. Initializing the USB flash drive takes more than 40 minutes. This initialization process does not make the data completely unrecoverable.	

<sup>1</sup> Available if the Optional Tray(s) is installed.

<sup>2</sup> Supported models only.

<sup>3</sup> Changing this setting is possible only after you change certain machine settings in Web Based Management.

#### [Shortcut Settings]

## [All Settings] > [Shortcut Settings]

	Delete	Delete the shortcut.	

Level 3	Level 4	Descriptions
(Select a shortcut button)	Register Card/NFC	Assign a shortcut to an ID card.
	Delete Card/NFC	Remove a shortcut from an ID card.

## [Fax]

## [All Settings] > [Fax]

Level 3	Level 4	Level 5	Descriptions	
Setup Receive	Ring Delay	-	Set the number of rings before the machine answers in Fax or Fax/Tel mode.	
	Receive Mode	-	Select the Receive Mode that best suits your needs.	
	F/T Ring Time	-	Set the length of the pseudo/double-ring time in Fax/Tel mode.	
	Fax Preview	-	View received faxes on the LCD.	
	Easy Receive	-	Receive fax messages automatically when you answer a call and hear fax tones.	
	Remote Codes	Remote Codes Fax Receive Code	Answer calls at an extension or external telephone and use codes to turn on or off the Remote Codes. You can personalize the codes.	
		Tel Answer	_	
	Auto Reduction	-	Reduce the size of incoming faxes.	
	PC Fax Receive	-	Set the machine to send faxes to your computer. If you enable this feature, you can turn on the Backup Print safety feature.	
	Memory Receive	Off	-	
	Memory Receive	Fax Forward	Set the machine to forward fax messages or to	
		Fax Storage	store incoming faxes in the memory (so you can retrieve them while you are away from your machine).	
			If you select Fax Forward or Fax Storage, you can turn on the Backup Print safety feature.	
		Forward to Cloud	Forward incoming faxes to the online service.	
		Forward to Network	Forward incoming faxes to a network destination.	
	Fax Rx Stamp	-	Print the received time and date on the top of incoming faxes.	
	2-sided	-	Print incoming faxes on both sides of the paper.	
Setup Send	Batch TX	-	Combine delayed faxes to the same fax number at the same time of day into one transmission.	
	Coverpage	5.	Set up your own comments for the fax cover page.	
	Message	6.		
	Auto Redial	-	Set the machine to redial the last fax number after five minutes, if the fax did not go through because the line was busy.	
	Destination	-	Set the machine to display the destination information on the LCD during fax dialing.	
Report Setting	Transmission	-	Select the initial setup for the Transmission Verification Report.	

Level 3	Level 4	Level 5	Descriptions
Report Setting	Journal Period	Journal Period	Set the interval for automatic printing of the Fax Journal.
		Time	If you select an option other than Off and Every 50 Faxes, you can set the time for the option.
		Day	If you select Every 7 Days, you can set the day of the week.
Print Fax	-	-	Print incoming faxes stored in the machine's memory.
Remote Access	-	-	Set your own code for Remote Retrieval.
Dial Restriction	ial Restriction Dial Pad -		Restrict the dialing when using the dial pad.
	Address Book	-	Restrict the dialing when using the Address Book.
	Shortcuts	-	Restrict the dialing when using a Shortcut.
	LDAP Server	-	Restrict the dialing of LDAP server numbers.
Remaining Jobs	-	-	Check which scheduled jobs are in the machine's memory and cancel selected jobs.
Miscellaneous	Distinctive	Distinctive	Turn on the telephone company's Distinctive Ring subscriber service to register your new ring pattern on the machine.
		Ring Pattern	Register your new ring pattern on the machine.

## [Printer]

## [All Settings] > [Printer]

Level 3	Level 4	Level 5	Descriptions		
Emulation	-	-	Select the emulation mode.		
Resolution	-	-	Select a print resolution.		
Density	-	-	Increase or decrease the print density.		
Print Settings	-	-	Set your print settings to Text or Graphics.		
Print Options	Font List	HP LaserJet	Print a list of the machine's internal fonts.		
		BR-Script 3			
	Test Print	-	Print a test page.		
2-sided	2-sided Print	-	Enable or disable 2-sided printing and choose long edge or short edge.		
	Single Image	-	For a print job where the last page is a 1-sided image, select the 1-sided Feed option to reduce printing time.		
			When you use Letterhead or Preprinted paper, you must select the 2-sided Feed option. If you select 1-sided Feed for Letterhead or Preprinted paper, the last page will be printed on the reverse side.		
Auto Continue	-	-	Select this setting if you want the machine to clear pape size errors or media type errors, and use paper from other trays.		
Paper Type	-	-	Set the paper type.		
Paper Size	-	-	Set the paper size.		
Copies	-	-	Set the number of printed pages.		
Orientation	-	-	Set pages to print in either portrait or landscape orientation.		

Level 3	Level 4	Level 5	Descriptions	
Print Position	-	-	Access the Print Position setting menus.	
Auto FF	-	-	Allow the machine to print any remaining data automatically.	
HP LaserJet	Font No.	Font No.	Set the font number.	
		Soft Font No.	Set the soft font number. This menu appears if a soft font is installed on your Brother machine.	
	Font Pitch	-	Set the font pitch. (Available only for certain fonts.)	
	Font Point	-	Set the font size. (Available only for certain fonts.)	
	Symbol Set	-	Select the symbol or character set.	
	Table Print	-	Print the code table.	
	Auto LF	-	ON: CR -> CR+LF, OFF: CR -> CR	
	Auto CR	-	ON: LF -> LF+CR, FF -> FF+CR, or VT -> VT+CR OFF: LF -> LF, FF -> FF, or VT -> VT	
	Auto WRAP	-	Select whether you want a line feed and carriage return when the carriage position reaches the right margin.	
	Auto SKIP	-	Select whether you want a line feed and carriage return when the carriage position reaches the bottom margin.	
	Left Margin	-	Set the left margin at column 0 to 70 columns at 1 cpi.	
	Right Margin	-	Set the right margin at column 10 to 80 columns at 1 cpi.	
	Top Margin	-	Set the top margin distance from the top edge of the paper.	
	Bottom Margin	-	Set the bottom margin distance from the bottom edge of the paper.	
	Lines	-	Set the number of lines on each page.	
	Tray Command	-	Select this setting if a tray mismatch appears when you use the HP drivers.	
Epson FX-850	Font No.	Font No.	Set the font number.	
		Soft Font No.	Set the soft font number. This menu appears if a soft font is installed on your Brother machine.	
	Font Pitch	-	Set the font pitch. (Available only for certain fonts.)	
	Font Point	-	Set the font size. (Available only for certain fonts.)	
	Character Set	-	Select the symbol or character set.	
	Table Print	-	Print the code table. If Change Emulation appears on the LCD, choose the option you want.	
	Auto LF	-	ON: CR -> CR+LF, OFF: CR -> CR	
	Auto Mask	-	Set the top and bottom margins to two-lines each. When you set Auto Mask to On, this setting overrides the Top Margin and Bottom Margin settings.	
1	T . CL . M	_	Set the left margin at column 0 to 70 columns at 1 cpi.	
	Left Margin	-	Set the left margin at column 0 to 70 columns at 1 op.	

Level 3	Level 4	Level 5	Descriptions		
Epson FX-850	Top Margin	-	Set the top margin distance from the top edge of the paper.		
	Bottom Margin	-	Set the bottom margin distance from the bottom edge of the paper.		
	Lines	-	Set the number of lines on each page.		
IBM Proprinter	Font No.	Font No.	Set the font number.		
		Soft Font	Set the soft font number.		
		No.	This menu appears if a soft font is installed on your Brother machine.		
	Font Pitch	-	Set the font pitch.		
			(Available only for certain fonts.)		
	Font Point	-	Set the font size.		
			(Available only for certain fonts.)		
	Character Set	-	Select the symbol or character set.		
	Table Print	-	Print the code table.		
			If Change Emulation appears on the LCD, choose the option you want.		
	Auto LF	-	ON: CR -> CR+LF, OFF: CR -> CR		
	Auto CR	-	ON: LF -> LF+CR, FF -> FF+CR, or VT -> VT+CR		
			OFF: LF -> LF, FF -> FF, or VT -> VT		
	Auto Mask	-	Set the top and bottom margins to two-lines each. When you set Auto Mask to On, this setting overrides the Top Margin and Bottom Margin settings.		
	Left Margin	-	Set the left margin at column 0 to 70 columns at 1 cpi.		
	Right Margin	-	Set the right margin at column 10 to 80 columns at 1 cpi.		
	Top Margin	-	Set the top margin distance from the top edge of the paper.		
	Bottom Margin	-	Set the bottom margin distance from the bottom edge of the paper.		
	Lines	-	Set the number of lines on each page.		
BR-Script 3	Error Print	-	Choose whether the machine prints the error information when errors occur.		
PDF	Multiple Page	-	Set the page layout when printing multiple pages.		
	PDF Print Options	-	Set the PDF Print setting to print either comments (Markup) or stamps in the PDF file, along with the text.		
	PDF Fit to Page	-	Select if the machine scales or resizes the pages in the PDF file to fit the selected paper size.		
Carbon Menu	Carbon Copy	-	Enable or disable the Carbon Copy function.		
	Copies	-	Set the number of printed pages.		
	Copy1 Tray	-	Select the tray you use for Copy1.		
	Copy1 Macro	-	Select a macro/stream for Copy1.		
	Copy2 Tray Copy8 Tray	-	Select the tray you use for Copy2 to Copy8.		
	Copy2 Macro Copy8 Macro	-	Select a macro/stream for Copy2 to Copy8.		
Job Save Location	-	-	Select the location where you want to save print jobs.		

Level 3	Level 4	Level 5	Descriptions
(available for certain models)			
Reset Printer	-	-	Restore the machine settings to the factory settings.

## **Change Machine Settings Using Web Based Management**

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS).

- What is Web Based Management?
- Access Web Based Management
- Set or Change a Login Password for Web Based Management
- Set Up Your Machine's Address Book Using Web Based Management

▲ Home > Machine Settings > Change Machine Settings Using Web Based Management > What is Web Based Management?

## What is Web Based Management?

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS).

• We recommend using the latest version of the following web browsers:

- Microsoft Edge, Firefox, and Google Chrome<sup>™</sup> for Windows
- Safari, Firefox, and Google Chrome<sup>™</sup> for Mac
- Google Chrome<sup>™</sup> for Android<sup>™</sup>
- Safari and Google Chrome<sup>™</sup> for iOS
- Ensure that JavaScript and Cookies are always enabled, regardless of which browser you use.
- Make sure your machine is On and connected to the same network as your computer, and that your network supports the TCP/IP protocol.

Change Machine Settings Using Web Based Management

brother

▲ Home > Machine Settings > Change Machine Settings Using Web Based Management > Access Web Based Management

## Access Web Based Management

- We recommend using the latest version of the following web browsers:
  - Microsoft Edge, Firefox, and Google Chrome<sup>™</sup> for Windows
  - Safari, Firefox, and Google Chrome<sup>™</sup> for Mac
  - Google Chrome<sup>™</sup> for Android<sup>™</sup>
  - Safari and Google Chrome<sup>™</sup> for iOS
- Ensure that JavaScript and Cookies are always enabled, regardless of which browser you use.
- We recommend using the HTTPS security protocol when configuring settings using Web Based Management.
- When you use HTTPS for Web Based Management configuration, your browser will display a warning dialog box. To avoid displaying the warning dialog box, you can install a self-signed certificate to use SSL/TLS communication. For more information, see *Related Information*.
- The default password to manage this machine's settings is located on the back of the machine and marked "Pwd". We recommend immediately changing the default password to protect your machine from unauthorized access.

You can also find the default password in the Network Configuration Report.

>> Access Web Based Management from your Web Browser

>> Access Web Based Management from Brother iPrint&Scan (Windows/Mac)

>> Access Web Based Management from Brother Utilities (Windows)

## Access Web Based Management from your Web Browser

- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

• If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example: https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

For example: https://brn123456abcdef

- The NetBIOS name can be found in the Network Configuration Report.
- 3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. If you want to pin the navigation menu on the left side of the screen, click  $\equiv$  and then click  $\mathbf{x}$ .

You can now change the machine's settings.

## Access Web Based Management from Brother iPrint&Scan (Windows/Mac)

1. Start Brother iPrint&Scan.

Windows

Launch **[Section Print&Scan**].

• Mac

In the **Finder** menu bar, click **Go > Applications**, and then double-click the iPrint&Scan icon.

The Brother iPrint&Scan screen appears.

- 2. If your Brother machine is not selected, click the **Select your Machine** button, and then select your model name from the list. Click **OK**.
- 3. Click **\*\*** (Machine Settings).
- 4. Click All Settings.

The Web Based Management page appears.

5. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

6. If you want to pin the navigation menu on the left side of the screen, click  $\equiv$  and then click 🗾

You can now change the machine's settings.

You can also access Web Based Management from Brother Mobile Connect for mobile devices.

## Access Web Based Management from Brother Utilities (Windows)

- 1. Launch **F** (Brother Utilities), and then click the drop-down list and select your model name (if not already selected).
- Click **Tools** in the left navigation bar, and then click **Machine Settings**. The Web Based Management page appears.
- 3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. If you want to pin the navigation menu on the left side of the screen, click  $\equiv$  and then click  $\mathbf{x}$ .

You can now change the machine's settings.

If you change the protocol settings, you must restart the machine after clicking **Submit** to activate the configuration.

After configuring the settings, click Logout.

▲ Home > Machine Settings > Change Machine Settings Using Web Based Management > Set or Change a Login Password for Web Based Management

## Set or Change a Login Password for Web Based Management

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**". We recommend immediately changing the default password to protect your machine from unauthorized access.

- 1. Start your web browser.
- 2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

 If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example: https://SharedPrinter

- If you enable a NetBIOS name, you can also use the node name.
  - For example: https://brn123456abcdef
- The NetBIOS name can be found in the Network Configuration Report.
- 3. Do one of the following:
  - If you have previously set your own password, type it, and then click Login.
  - If you have not previously set your own password, type the default login password, and then click Login.
- 4. Go to the navigation menu, and then click **Administrator > Login Password**.
  - The default password to manage this machine's settings is located on the back of the machine and marked "Pwd".
    - Start from ≡, if the navigation menu is not shown on the left side of the screen.
- 5. To change the password, type your current password in the Enter Old Password field.
- 6. Following the on-screen Login Password guidelines, type your new password in the Enter New Password field.
- 7. Retype the new password in the Confirm New Password field.
- 8. Click Submit.

You can also change the lockout settings in the Login Password menu.

Change Machine Settings Using Web Based Management

▲ Home > Machine Settings > Change Machine Settings Using Web Based Management > Set Up Your Machine's Address Book Using Web Based Management

## Set Up Your Machine's Address Book Using Web Based Management

- We recommend using the HTTPS security protocol when configuring settings using Web Based Management.
- When you use HTTPS for Web Based Management configuration, your browser will display a warning dialog box.
- 1. Start your web browser.
- Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is your machine's IP address).

For example:

https://192.168.1.2

• If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

For example: https://SharedPrinter

- If you enable a NetBIOS name, you can also use the node name.
   For example: https://brn123456abcdef
- The NetBIOS name can be found in the Network Configuration Report.
- 3. If required, type the password in the Login field, and then click Login.

The default password to manage this machine's settings is located on the back of the machine and marked "**Pwd**".

4. Go to the navigation menu, and then click **Address Book**.

Start from  $\equiv$ , if the navigation menu is not shown on the left side of the screen.

- 5. Add or update the Address Book information as needed.
- 6. Click Submit.

Noise Level	Sound Pressure <sup>5</sup>	Printing	LpAm = 54.0 dB (A)
		Printing	LpAm = 50 dB (A)
		(Quiet Mode)	
		Ready	LpAm = Up to 35.0 dB (A)
	Sound Power	Printing <sup>5</sup>	LWAc = 7.06 B (A)
		Printing	LWAc = 6.54 B (A)
		(Quiet Mode)	
		Ready	LWAc = Up to 4.9 B (A)
Temperature	Operating		From 50°F to 90.5°F (10°C to 32.5°C)
	Storage		From 32°F to 104°F (0°C to 40°C)
Humidity	Operating		20% to 80% (without condensation)
	Storage		35% to 85% (without condensation)
Automatic Docun	nent Feeder (ADF)		Up to 80 sheets
			For best results we recommend:
			<ul> <li>Temperature: 68°F to 86°F (20°C to 30°C)</li> </ul>
			• Humidity: 50% to 70%
			• Paper: 20 lb (80 g/m <sup>2</sup> )

<sup>1</sup> Measured diagonally.

<sup>2</sup> Measured when the machine is connected using the same network connection as the ENERGY STAR Ver. 3.1 test method.

- <sup>3</sup> Measured according to IEC 62301 Edition 2.0.
- <sup>4</sup> Power consumption varies slightly depending on the usage environment.
- <sup>5</sup> Measured in accordance with the method described in ISO 7779.

## **Document Size Specification**

Document Size	ADF Width	4.1 in. to 8.5 in. (105 mm to 215.9 mm)
	ADF Length	5.8 in. to 14.0 in. (147.3 mm to 355.6 mm)
	Scanner Glass Width	Maximum 8.5 in. (216 mm)
	Scanner Glass Length	Maximum 14 in. (355.6 mm)

## Print Media Specifications

Paper Input	Paper Tray (Standard)	Paper Type	Plain Paper, Letterhead, Colored Paper, Thin Paper, Recycled Paper, Thick Paper
		Paper Size	A4, Letter, B5 (JIS), A5, A5 (Long Edge), A6, Executive, Legal, Mexico Legal, India Legal, Folio, 16K (195x270 mm), A4 Short (270mm Paper)
		Paper Weight	16 to 43 lb (60 to 163 g/m <sup>2</sup> ) <sup>1</sup>
		Maximum Paper Capacity	Up to 520 sheets of 20 lb (80 g/m <sup>2</sup> ) Plain Paper
	Multi-Purpose Tray (MP tray)	Paper Type	Plain Paper, Letterhead, Colored Paper, Thin Paper, Thick Paper, Thicker Paper, Recycled Paper, Bond, Label, Envelope, Env.Thin, Env.Thick
		Paper Size	Width:
			2.75 to 8.5 in. (69.8 to 215.9 mm)
			Length:
			5 to 14 in. (127 to 355.6 mm)
			Envelope:

Paper Input	Multi-Purpose Tray (MP		COM-10, DL, C5, Monarch
	tray)	Paper Weight	16 to 60 lb (60 to 230 g/m <sup>2</sup> ) <sup>1</sup>
		Maximum Paper Capacity	<ul> <li>Up to 100 Sheets of 20 lb (80 g/m<sup>2</sup>) Plain Paper</li> <li>Envelope: Up to 0.43 in. (11 mm) thick</li> </ul>
	Paper Tray 2, 3 (Optional) <sup>2</sup>	Paper Type	Plain Paper, Letterhead, Colored Paper, Thin Paper, Recycled Paper, Thick Paper
		Paper Size	A4, Letter, B5 (JIS), A5, Executive, Legal, Mexico Legal, India Legal, Folio, 16K (195x270 mm), A4 Short (270mm Paper)
		Paper Weight	16 to 32 lb (60 to 120 g/m <sup>2</sup> ) <sup>1</sup>
		Maximum Paper Capacity	• LT-5505
			Up to 250 sheets of 20 lb (80 g/m <sup>2</sup> ) Plain Paper
			• LT-6505
			Up to 520 sheets of 20 lb (80 g/m <sup>2</sup> ) Plain Paper
Paper Output <sup>3</sup>	Face Down Output Tray		Up to 250 Sheets of 20 lb (80 g/m <sup>2</sup> ) Plain Paper (face down delivery to the face down output paper tray)
	Face Up Output Tray		Up to 10 sheets (face up delivery to the face up output tray)
2-sided	Automatic 2-sided Printing	Paper Type	Plain Paper, Letterhead, Colored Paper, Thin Paper, Recycled Paper
		Paper Size	Letter, Legal, Mexico Legal, India Legal, Folio
		Paper Weight	16 to 28 lb (60 to 105 g/m <sup>2</sup> )

 $^1$   $\,$  For paper of 28 lb (105 g/m^2) and above, open the back cover to use the face up output tray.

<sup>2</sup> Maximum number of Lower Trays: Up to two Lower Trays in any combination.

<sup>3</sup> For labels, we recommend removing the printed sheets from the output paper tray immediately after they exit the machine to avoid the possibility of smudging.

## **Fax Specifications**

Compatibility		ITU-T Super Group 3
Coding Syster	n	MH / MR / MMR / JBIG
Modem Speed	l	33,600 bps (with Automatic Fallback)
2-sided Print F	Receiving	Yes
Automatic 2-s	ided Sending	Yes (from the ADF)
Scanning Wid	th	Maximum 8.19 in. (208 mm)
Printing Width	1	Maximum 8.17 in. (207.4 mm)
Gray Scale		8 bit / 256 levels
Resolution Horizontal		203 dpi
Vertical		Standard: 98 dpi
		Fine: 196 dpi
		Super fine: 392 dpi
		Photo: 196 dpi
Address Book		300 Locations
Groups		Up to 20
Broadcasting		350 Locations
Automatic Red	dial	1 time at 5-minute intervals
Memory Trans	mission	Up to 500 pages <sup>1</sup>

<sup>1</sup> 'Pages' refers to the 'ITU-T TestChart Document No.1' (a typical business letter, Standard resolution, JBIG code).

## **Copy Specification**

Copy Width	Maximum 8.27 in. (210 mm)	
Automatic 2-sided Copy	Yes (from the ADF)	
Sort Copy Yes		
Stack Copy	Up to 999 pages	
Enlarge/Reduce	25 to 400% (in increments of 1%)	
Resolution	Maximum 1200 x 600 dpi	
First Copy Out Time <sup>1</sup>	Less than 8.7 seconds at 73.4°F (23°C)	

<sup>1</sup> From Ready Mode and standard tray.

## **Scanner Specifications**

Color / Black	Yes / Yes	
TWAIN Compliant	Yes	
	(Windows 10 / Windows 11)	
WIA Compliant	Yes	
	(Windows 10 / Windows 11)	
Color Depth	48 bit color Processing (Input)	
	24 bit color Processing (Output)	
Gray Scale	16 bit color Processing (Input)	
	8 bit color Processing (Output)	
Resolution <sup>1</sup>	Up to 19200 x 19200 dpi (interpolated)	
	• Up to 1200 x 1200 dpi (from Scanner Glass)	
	• Up to 600 x 600 dpi (from the ADF)	
Scanning Width	Maximum 8.27 in. (210 mm)	
Automatic 2-sided Scanning	Yes (from the ADF)	

Maximum 1200 × 1200 dpi scanning with the WIA driver in Windows 10 and Windows 11 (resolution up to 19200 × 19200 dpi can be selected by using the scanner utility)

## **Printer Specifications**

Automatic 2-sided Print <sup>1</sup>		Yes	
Emulation		PCL6, BR-Script3, IBM Proprinter XL, Epson FX-850, PDF version1.7, XPS version 1.0	
Resolution		Up to 1200 x 1200 dpi	
Print Speed <sup>2</sup> 1-sided Print <sup>34</sup>		Up to 52 pages/minute (Letter size) Up to 50 pages/minute (A4 size)	
	2-sided Print	Up to 24 sides/minute (Up to 12 sheets/minute) (Letter size) Up to 24 sides/minute (Up to 12 sheets/minute) (A4 size)	
First Print Time 5 6 7Less than 6		Less than 6.7 seconds at 73.4°F (23°C)	

<sup>1</sup> The default setting is 2-sided in the USA and some other countries.

<sup>2</sup> The print speed may be slower when the machine is connected by wireless LAN.

- <sup>3</sup> The print speeds of "1-sided Print" were measured in accordance with ISO/IEC 24734.
- <sup>4</sup> This speed is based on 1-sided printing. If your model's default print setting is "2-sided", change to "1-sided" for these results.
- <sup>5</sup> Printing from Ready mode and standard tray.
- <sup>6</sup> Length of time from when the machine is started until paper output is complete (except when the machine is turned on or when an error is fixed)
- <sup>7</sup> This applies when printing on A4- or Letter-size paper from the standard tray. It could be longer however, depending on the paper size and the amount of print data.

#### **Interface Specifications**

USB	Type: USB Type-B receptacle			
	Version: USB 2.0 High-Speed <sup>1 2</sup>			
	Use a USB 2.0 interface cable that is no more than 6 feet (2 meters) long.			
	<ul> <li>Type: USB Type-A receptacle (Front)<sup>3</sup></li> </ul>			
	• Type: USB Type-A receptacle (Rear) <sup>3</sup>			
	Version: USB 2.0 High-Speed			
	Connect a USB flash drive for USB Storage Print.			
LAN	10Base-T/100Base-TX/1000Base-T <sup>4</sup>			
Wireless LAN	IEEE 802.11a/b/g/n (Infrastructure Mode)			
	IEEE 802.11a/g/n (Wi-Fi Direct <sup>®</sup> )			
NFC <sup>5</sup>	Yes			

1 Your machine has a USB 2.0 Hi-Speed interface. The machine can also be connected to a computer that has a USB 1.1 interface.

- <sup>2</sup> Third party USB hub devices are not supported.
- <sup>3</sup> USB host port
- <sup>4</sup> Use a Category 5e (or greater) network cable.
- <sup>5</sup> When you connect an external IC card reader, use a HID class driver supported device.

## **Direct Print Feature Specifications**

	<b>y</b> PDF version1.7, JPEG, Exif+JPEG, PRN (created by the machine's own printer driver), TIFF (scanned by Brother models), XPS version 1.0	
Interface	USB direct interface: Front x1, Rear x1	

#### **Supported Protocols and Security Features**

Supported protocols and security features may differ depending the models.

#### Ethernet

10Base-T/100Base-TX/1000Base-T

#### Protocols (IPv4)

ARP, RARP, BOOTP, DHCP, APIPA (Auto IP), WINS/NetBIOS name resolution, DNS Resolver, mDNS, LLMNR responder, LPR/LPD, Custom Raw Port/Port9100, POP3, SMTP Client, IPP/IPPS, FTP Client and Server, CIFS Client, TELNET Server, SNMPv1/v2c/v3, HTTP/HTTPS server, TFTP client and server, ICMP, Web Services (Print/Scan), SNTP Client, LDAP/LDAPS, IMAP4, Syslog

#### Protocols (IPv6)

NDP, RA, DNS resolver, mDNS, LLMNR responder, LPR/LPD, Custom Raw Port/Port9100, IPP/IPPS, POP3, SMTP Client, FTP Client and Server, CIFS Client, TELNET Server, SNMPv1/v2c/v3, HTTP/HTTPS server, TFTP client and server, ICMPv6, SNTP Client, LDAP/LDAPS, Web Services (Print/Scan), IMAP4, Syslog

#### **Network Security (Wired)**

APOP, SMTP-AUTH, SSL/TLS (IPP, HTTP, SMTP, FTP, POP3, IMAP4, LDAP), SNMP v3 802.1x (EAP-MD5, EAP-FAST, PEAP, EAP-TLS, EAP-TTLS), Kerberos, IPsec

#### **Network Security (Wireless)**

APOP, SMTP-AUTH, SSL/TLS (IPP, HTTP, SMTP, FTP, POP3, IMAP4, LDAP), SNMP v3, 802.1x (EAP-FAST, PEAP, EAP-TLS, EAP-TTLS), Kerberos, IPsec

#### **Wireless Network Security**

WEP 64/128 bit, WPA-PSK (TKIP/AES), WPA2-PSK (TKIP/AES), WPA3-SAE (AES) (Wi-Fi Direct supports WPA2-PSK (AES) only)

#### **Wireless Certification**

Wi-Fi Certification Mark License (WPA3<sup>™</sup> - Enterprise, Personal), Wi-Fi Protected Setup<sup>™</sup> (WPS) Identifier Mark License, Wi-Fi CERTIFIED<sup>™</sup> Wi-Fi Direct

## **Computer Requirements Specifications**

Supported Operating Systems And Software Functions

For the latest supported OS, go to your model's Supported OS page at support.brother.com/os.

Computer Platform & Operating System Version		Computer Interface		Processor	Hard Disk Space to Install <sup>1</sup>		
		USB <sup>2</sup>	10Base-T/ 100Base- TX/ 1000Base- T (Ethernet)	Wireless 802.11a/b/ g/n		For Drivers	For Applicatio ns (including Drivers)
Windows Operating System	Windows 10 Home / 10 Pro / 10 Education / 10 Enterprise <sup>3 4</sup>	Printing PC Fax <sup>5</sup> Scanning			32 bit (x86) or 64 bit (x64) processor	80 MB	1.8 GB
	Windows 11 Home / 11 Pro / 11 Education / 11 Enterprise <sup>3 4</sup>				64 bit (x64) processor		
	Windows Server 2012	Printing Scanning	Printing		64 bit (x64) processor		80 MB
	Windows Server 2012 R2						
	Windows Server 2016						
	Windows Server 2019						
	Windows Server 2022						
Мас	macOS v11	Printing		64 bit processor	N/A	500 MB	
Operating System <sup>6</sup>	macOS v12	PC-Fax (Send) <sup>5 7</sup> Scanning					
	macOS v13						
Chrome OS		Printing Scanning			N/A	N/A	N/A

1 An Internet connection is required to install the software if the installation disc is not supplied.

<sup>2</sup> Third party USB ports are not supported.

- <sup>3</sup> For WIA, 1200x1200 resolution. Brother Scanner Utility enables resolutions up to 19200 x 19200 dpi.
- <sup>4</sup> PaperPort<sup>™</sup> 14SE supports Windows 10 and Windows 11.
- <sup>5</sup> PC-Fax supports black and white only.

6 macOS Disclaimer AirPrint capable: Printing or scanning via Mac requires using AirPrint. Mac drivers are not provided.

#### 7 AirPrint only.

For the latest driver updates, go to your model's **Downloads** page at <u>support.brother.com</u>.

# 5 GHz Wi-Fi Network Channels Supported by Your Machine (USA, Canada, Mexico and Caribbean countries only)

When connecting your machine to a 5 GHz Wi-Fi network, make sure your wireless LAN access point/router is set to one of the channels available in your country and listed in the table below (recommended channel: 5.18 - 5.24 GHz). For more information about changing the channel setting, see the instructions supplied with your wireless LAN access point/router.

Wi-Fi 5 GHz Channels	5.18 - 5.24 GHz (36/40/44/48)
	5.26 - 5.32 GHz (52/56/60/64)
	5.5 - 5.72 GHz (100/104/108/112/116/132/136/140/144)
	5.745 - 5.825 GHz (149/153/157/161/165)

## **Supplies**

Ø

When the time comes to replace supplies, such as the toner cartridge or drum unit, an error message will appear on your machine's control panel or in the Status Monitor. For more information about the supplies for your machine, visit <u>go.brother/original</u> or contact your local Brother dealer.

- The toner cartridge and drum unit are two separate parts.
- The Supply Order Number (No.) varies depending on your country and region.

Supply	Supply Order No.	Approximate Life (Page Yield)	Applicable Models
Toner Cartridge	Standard Toner: TN920 (Not available in Mexico)	Approximately 3,000 pages	MFC-EX915DW
	High Yield Toner: TN920XL	Approximately 6,000 pages	MFC-EX915DW
	Super High Yield Toner: TN920XXL	Approximately 11,000 pages <sup>1 2</sup>	MFC-EX915DW
	Ultra High Yield Toner: TN920UXXL	Approximately 18,000 pages <sup>1 2</sup>	MFC-EX915DW
	Maximum Yield Toner: TNE90	Approximately 25,000 pages <sup>1 2</sup>	MFC-EX915DW
	Starter Toner: (Supplied with your machine)	Approximately 25,000 pages <sup>1 2</sup>	MFC-EX915DW
Drum Unit DR925		Approximately 75,000 pages <sup>3</sup>	MFC-EX915DW

1 Letter or A4 size single-sided pages

<sup>2</sup> The approximate cartridge yield is declared in accordance with ISO/IEC 19752.

<sup>3</sup> Approximately 75,000 pages based on three pages per job and 45,000 pages based on one page per job (A4/Letter single-sided pages). The number of pages may be affected due to a variety of factors including but not limited to media type and media size.
