

Notice for Ink Authentication

A device with 2.7 inch or larger size LCD display automatically authenticates the ink cartridge inserted into the device. The device notifies you on the display whether the ink cartridge is a Brother genuine or not. However, for certain non-genuine ink cartridges as well as Brother genuine ink cartridges refilled with third party ink, the device may fail to notify you correctly.

The language of the message varies depending on the country where the device was sold.
